RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

Asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 14, 1874.

Stock Exchange and Money Market.

There has been more inquiry for accommodation in the loan and discount line, and the Money market has been ruling somewhat firmer. The increased demand for aid grows out of the more general show of activity in financial and commercial circles, and the more confident temper of operators, who manifest more willingness to make new ventures in stocks, bonds, produce and merchandise. Call loans have been quoted at from 2@4 per cent, and very choice to prime discounts at from 5½@8 per cent per annum. Within this range, there has been a livlier movement of money reported, since our last, than has been usual of late, much to the satisfaction of lenders. The City banks, last week reduced their reserve of legal tender notes $169,800, and enlarged their deposit item $901,200, while augmenting their specie average $553,700. They also report an increase of $1,108,000 in the loans and discounts, and of $25,400 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $55,067,167, against $56,877,844, the preceding week; and a coin board of $56,246,758, against $60,304,393, on the previous return. The City bank exchanges, during the week, were $446,534 180, or a daily average of $89,306,836. The customs revenue of the port, during the week, was $1,546,000. The City banks reported their average of gold last week at $12,574,800, and their greenback average at $59,451,700. Their deposits stood at $226,753,900. The loan item was $285,066,500, The circulation was $25,082,400.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $15,388,025.

The aggregate of the outstanding U. S. currency, of all denominations, Nov. 1, was $430,752,687. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is near 350 millions.

The U. S. Treasury balances at the opening of business on Wednesday were as follows: Currency, $16,206,276; special deposit of legal tenders for redemption of certificates or deposit, $54,900,000; coin, including $21,593,400 in coin certificates, $83,681,727.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 38½ millions.

Gold has been fairly active, on a steadier basis as to price. The demand has been mostly speculative; the inquiry for Custom House purposes, as well as for export, having been on a reduced scale. The extremes of the week have been 110 @110⅜, closing on Wednesday at 110¼, as against 110¼ on Wednesday of the preceding week. The specie outflow last week was only $328,485. The imports of specie at this port since Jan. 1, have been $4,791,082, against $15,102,494 same time last year. The customs demand for Gold last week averaged $297,778 a day. Foreign Exchange has been more active and quoted higher, with Bankers' sixty day bills on London leading off on Wednesday at $4 84½@$4 85½; sight bills on London at 4 88@$4 89 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,161,241.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,771,028.

Government Securities have been in much better demand, especially on investment account, at firmer and buoyant prices. The offerings of the favorite issues, particularly of the later gold bearing bonds and the currency six per cents, have been comparatively limited.

U. S sixes of 1881 closed on Wednesday of this week at 119⅛@119½; U. S. Five-Twenties of 1862, (ex-Nov. coupon) at 111¼@111⅜; U. S. Five-Twenties of 1864 (ex-Nov. coupon) at 113¾ @114; U. S. Five-Twenties of 1865, (ex-Nov. coupon) at 114⅞@115; U. S. Five-Twenties of 1865 consolidated, 117⅛@117⅜; U. S. Five-Twenties of 1867, 117⅞@118⅛; U. S. Five-Twenties of 1868, 118@118¼; U. S. Ten-forties at 112⅞ @113; U. S. Fives of 1881, (Funding Loan) 111½@111¾; Six per cent. currency Sixes from 118⅛@118¼.

The Stock Exchange dealings have been on an enlarged scale and the market has been generally quite buoyant, though the later transactions

indicated some irregularity as to values. A good investment demand has been noted for State and Railway bonds, at generally improved prices. Railway and miscellaneous share property has been more active, and quoted firmer, though, at the close, somewhat unsettled.

General business has shown rather more animation. The Breadstuff trade has been brisker, but prices have been quoted weaker and irregular. Provisions have been more freely dealt in; Lard has advanced sharply, on extensive speculative purchases. Cotton has been more active, chiefly for forward delivery, but, under accumulating supplies, has been depressed in value. Naval Stores, Petroleum, Oils, Hides, and Tobacco have attracted less attention. Seeds, Wool and Fruit, in fair demand. Groceries dull and lower. Foreign merchandise in less demand at about former figures in most instances. Metals have been quite moderately dealt in, as a rule. Scotch Pig Iron, steady, but quiet. 600 tons, of recent receipt had been disposed of, previous to arrival. American Pig Iron, offered freely and quoted lower and irregular, yet not active; 1000 tons Crane at the works, sold at equal to $25 75 per ton. Eglinton Pig Iron quoted from yard at $37; Glengarnock, $39@$40; No. 1 American Pig at $25 50@$28 00; No. 2 do. at $25@$26 50; Forge, $23@$25; English Rails at $48@$50, gold; American Rails at works, $55@$60; Old Rails, $31@$34. Wrought Scrap, $30@$32. Ocean freights have been more active, closing more firmly.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New Jersey R. R., 129; Pacific R. R. of Mo., 39⅛; do. 1st mort., 81; do. 2d mort., 70; St. Louis, and Iron Mt. R. R., 22; do 1st mort., 85½; do. 2d mort., 60; Albany and Susquehanna R. ☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending October 31, at 529,248 tons, and for the coal year 15,926,208 tons, against 16,988,574 tons to corresponding time last year, being a decrease of 1,042,366 tons. The bituminous tonnage for the week is 70,453 tons, and for the year 2,808,889 tons, against 2,798,019 tons to same time last year, giving a total of all kinds for the week of 599,701 tons, and for the year of 18,735,047 tons, against 19,766,593 tons to the same time last year, being a decrease of 1,031,546 tons.

Trans-Allegheny Canal.

The project, which is of the greatest importance to Pittsburg, will come before Congress at the coming session, and a brief statement as to what has been done and what is expected in the future will, no doubt, be interesting at this time. In the winter of 1872 an appropriation of $5,000 was obtained, principally through the efforts of Pennsylvania Congressmen, for the purpose of making a preliminary survey. In the winter of 1873 the Youghiogheny interest, with other routes, obtained $200,000 to make surveys of a water route from the Ohio to the seaboard. Gen. Sedgwick is at the head of the work, and is now on the Youghiogheny route, with three corps of engineers. He will be able to complete his surveys by the time Congress opens, and can give estimates and profiles of the whole route from the mouth of the Youghiogheny river to Cumberland.

The general plan is to slackwater the river from its junction with the Monongahela to Connellsville. From thence, by a seventy foot canal, to cross the mountain with a tunnel, to be only two miles long. This is, of course much cheaper than the nine-mile tunnel, which would have to be built by the Kanawha route. As we announced a few days ago a pass has been discovered, which, if adopted for the canal route, would make a tunnel unnecessary. Baker's Pass, at Big Savage Mountain, is not more than 1,800 feet above the sea level. We are not yet advised whether Gen. Sedgwick has had an engineering party to reconnoitre the locality, but hope that it may be done in time to be incorporated into the report.

In regard to the water supply, some parties contend that it was sufficient. We have Gen. Sedgwick's authority for saying that the supply will be such that he can build reservoirs which will hold three times as much water as will be necessary, and the rain-fall is ten times as great as would be required to keep the canal filled, so there can be no question as regards the water supply.

There is as yet a lamentable lack of statistics concerning the amount of business which may be reasonably expected to fall into the Trans-Allegheny canal. But it is quite certain that, being connected with the great Mississippi valley navigation and its over 30,000 miles of shore line alone, the trade of the canal from this source would be very large indeed. Another important matter in which Pittsburg and vicinity is deeply interested is the shipment of coal. Gas coal alone is an important item, much more important than appears at first sight. Westmoreland county ships now annually 1,500,000 tons, and this branch of the coal trade is steadily increasing. What the people of the Eastern States would gain by having this commodity brought cheaper to their towns we can safely leave to the Yankees to figure up.

The tonnage of ore, limestone, heavy manufactures, &c., East and West, would easily amount to several millions per year; in fact, a well informed merchant of this city said yesterday that it was difficult to estimate the business of the canal. He is by no means a visionary gentlemen, but his estimates are so detailed, and appear so unanswerable withal, that it left no doubt in our mind that the canal, if built, would do a great deal of good. —*Pittsburg Chronicle.*

Narrow Gauge Railroads.

Narrow gauge railroads have been built in most of the States and Territories of the Union, but as a rule for short distances only. The number of miles built is 1677, and the number of miles of projected road 5461. The cost of building these roads and of running them afterwards is much less than for the standard gauge roads, and it is claimed that they are as safe and durable as roads of wider gauge. In Pennsylvania there are upwards of 125 miles of narrow gauge roads already built, but no road is of greater length than 25 miles. The Denver and Rio Grande Railway in Colorado is, we believe, the longest "narrow gauge" railway in actual operation. It skirts the foot hills of the Rocky Mountains for about a hundred and fifty miles.

Oil Creek and Allegheny River Railroad.

The financial condition of this company on the 13th of July, 1874, (the date when the Receiver took possession,) was as follows:

Assets.		
Construction and equipment		$9,609,837 91
Contingent fund		50,258 66
Jay Cooke & Co		5,881 49
Defaulted agents		26,612 01
Empire Transportation Company		18,994 89
Tidioute and Titusville R. R. Co.		6,500 00
Titusville and Petroleum Centre R. R. Co		97,046 02
Individuals and companies		88,900 44
Fuel and material on hand		40,691 51
Due from railroad companies		99,571 63
Due from agents, etc		21 039 45
Cash in hands of Treasurer		72,443 64
Total		$10,137,777 65
Liabilities.		
Capital stock		$4,959,450 00
Oil Creek Railroad mortgage bonds	$580,000	
Warren & Franklin Railroad bonds	1,500,000	
Consolidated bonds	1,100,000	
Union & Titusville Railroad bonds	500,000	
		3,680,000 00
Profit and loss account		1,026,507 32
State of Pennsylvania		6,440 00
Titusville Pipe Company		13,959 93
Unpaid vouchers		145,186 77
Bills payable		17 780 58
Due railroad companies		289,453 05
Total		$10,137,777 65

Railroad Earnings.

The earnings of the Burlington, Cedar Rapids and Minnesota Railway Company for the month of October, 1874, were $142,314 07, against $129,909 04 in October, 1873, an increase of $12,315 03.

The earnings of the Chicago, Danville and Vincennes Railroad Company in October, 1874, were $81,918, against $79,095 in October, 1873, an increase of $2,823.

The earnings of the St. Louis, Alton and Terre Haute Railroad (main line) in October, 1874, were $123,747, against $112,378 in October 1873, an increase of $11,369.

The earnings of the Atlantic and Pacific Railroad for the week ending November 7, 1874, were $104,900, against $98,147 for the corresponding week in 1873, an increase of $6,753.

For other earnings, as far as reported, see page 1446 this week's issue.

Illinois Central Railroad.

During the month of October, 1874, 3,748.65 acres of Land were sold for $27,714 91.

The Cash collected on Land Contracts during the same time was $35,880 11.

The Traffic on the Main Line in Illinois in October, 1874, was $610,018 20, against $610,728 31 in October, 1873.

The Traffic of the Iowa Lines (leased at 35 per cent of gross receipts), was $194 078 75, against $186,393 23 in October, 1873.

The total traffic on the Main Line in Illinois, and on the Iowa Lines, in October, 1874, was $804,096 95, against $797,121 54 in October, 1873—an increase of $6,975 41.

Dividends and Interest.

The Boston and Albany Railroad Company has declared a dividend of five dollars per share, payable at the office of the Treasurer, 40 State St., Boston, on the 16th inst.

The Boston and Maine Railroad Company has declared a dividend of four dollars per share, payable on the 14th inst.

The Boston and Providence Railroad Company has declared a dividend of five dollars per share, payable on the 14th inst.

The Catawissa Railroad Company announces a dividend of $1 42½ per share on the preferred stock, and 21 cents per share on the second preferred stock, payable on the 16th instant.

The Stoneham Horse Railroad pays a dividend of $6 per share.

The regular guaranteed quarterly dividend of the Cleveland and Pittsburgh Railroad Company, at the rate of seven per cent per annum, on the new guaranteed stocks, will be paid on and after the 1st December proximo at the office of the Farmers' Loan and Trust Company, No. 26 Exchange place, New York.

The preferred stock dividend of the Ohio and Mississippi Railroad Company, due March 1, 1875, will be paid, with accrued interest, to date of presentation, at the office of the company, No. 52 William street, New York.

The interest coupons of the seven per cent gold mortgage bonds of the Denver and Rio Grande Railway Company maturing Nov. 1, 1874, will be paid on presentation to Duncan, Sherman & Co., 11 Nassau st., N. Y.

Coupons on the first mortgage bonds of the Toledo, Peoria and Warsaw Railway Co., Western Division, due Aug. 1, 1874, will be purchased at their face value by L. V. F. Randolph, No. 21 Nassau st., N. Y.

For other dividends, and interest payable in November, see pages 1447 to 1457, inclusive, this week's issue.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for September, 1874, were $1,063,993 05, the expenses $393,180 51, and the net earnings $670,812 90. In September, 1873, the earnings were $1,068,936, 66, the expenses $501,838 54, and the net earnings $567,098 12—showing a decrease in earnings of $4,943 61, with a decrease in expenses of $98,771 17, making an increase in net earnings of $103,714 78. For the nine months ending September 30, 1874, the earnings were $7,520,184 98, the expenses $3,563,212 59, and the net earnings $3,956,968 39—showing an increase in earnings, as compared with the corresponding period of the previous year, of $154,160 37, with a decrease in expenses of $129,666 16—making an increase in net earnings of $283,826 53.

☞ A dispatch from Salt Lake City says the Union Pacific Railroad Company has taken a half interest in the Utah Southern, and the latter road is to be pushed forward at once 25 miles from Provo.

☞ The officers of the Indianapolis, Cincinnati and Lafayette Railroad company, elected on the 3d inst, are: M. E. Ingalls, President; C. H. Booth, Secretary; F. Osborn, Treasurer. There was no change in Superintendent.

Baltimore and Ohio Railroad.

The St. Louis *Courier* says that the Baltimore and Ohio Railroad is "the most successful trunk line in the country," and sums up the history, facilities and advantages of the great Baltimore route and market as follows:

Whatever may be the opinion of certain inland cities at certain times on the subject of railroads, it must be admitted, after all is said and done, that the welfare of these same cities is intimately connected with, if not dependent upon these same railroads, and so will be as long as railroads are the veins that circulate the life blood of the country.

Our neighbor, Chicago, is fortunate in having in immediate prospect a new friend and feeder, the Baltimore and Ohio railroad, that company having just completed their track from a southern point on their Lake Erie division to Chicago, this being the last link in the Baltimore and Ohio chain between that city and tide water.

The company has also made extensive improvements on the Marietta and Cincinnati railroad. Their new "cut off"—a straight line between Athens and Parkersburg—lessens the time between Cincinnati and Baltimore two hours. The value of such an alteration is obvious to every business man without further comment.

As this great carrier extends one of its long arms in our direction, also, an outline of its progress and present condition may be interesting to our readers.

The Baltimore and Ohio railroad germinated in 1828, and grew solely out of the demands of a local traffic in the neighborhood of Baltimore. From that time till the breaking out of the war its history is one of slow but sure and healthy growth—the growth of a giant oak rather than that of a mushroom—in the course of which it extended its terminal points westward, and improved its terminal facilities eastward until it became a great "trunk line." The war damaged its equipment but did not cripple its energies nor stop its progress, evidences of which are seen along its whole line from Baltimore to Cincinnati and Chicago. The road has in operation a line of seven steamships, running between Bremen and Baltimore. These land their passengers and baggage at Locust Point, within a few feet of the cars that take them westward, thus avoiding all the expense, delay and confusion of a long omnibus transfer.

The first American sight that astonishes our German friends are two immense grain elevators of this company, one of which, just completed, towers 175 feet from tide-water to roof, and has a capacity for 1,500,000 bushels. Every possible facility has been provided for the handling of other classes of freight. By means of tracks extended over the water, coal cars dump their contents directly in the hold of the vessel below; and in the year 1873 more than 2,000,000 tons were thus speedily and economically transferred.

The company has also displayed excellent judgment in fitting their road for the passenger traffic. Large and commodious hotels have been established at convenient points along the line. These have been erected with a view to that increase of business in the future, which past experience has given them reason to expect, and are tastefully built and carefully managed. The passenger coaches of the Baltimore and Ohio railroad are strong and comfortable, and by no means devoid of artistic adornment. Such pleasant surroundings at once put the traveler in a mood to enjoy the scenery for which this route is so celebrated, and it is wonderfully pleasing, an ever-changing panorama of the beautiful, the grand, the historic.

As a natural consequence of its attractions facilities, and good management, the financial condition of the Baltimore and Ohio railroad has steadily improved, until to-day it stands pre eminently a "solid" road. It has a surplus fund of $29,000,000, and its stock ranges from sixty to seventy per cent, above par; therefore it can readily obtain loans upon reasonable terms in European markets, when its rivals cannot secure them at any price. It supports no watered stock, and but a small debt, and hence it finds a profit in carrying passengers and freight at a rate which could not be remunerative to other roads. It extends its track, not by leasing old lines upon terms which must eat up the profits of the investment, nor by purchasing with money obtained on watered stock, or borrowed at an enormous rate of interest. Such a financial policy as this could never have made the Baltimore and Ohio railroad what it is to-day—the most successful trunk line in the country.

Denver and Rio Grande Railway.

The Denver and Rio Grande Railway makes the following general exhibit of its earnings and expenses for the month ending Sept. 30, 1874:

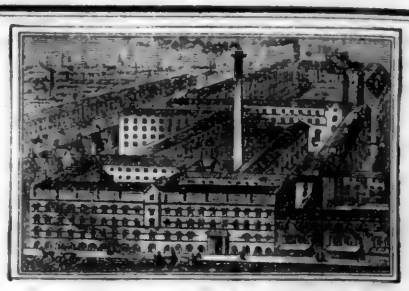
EARNINGS.

Freight:		
Ordinary		$18,654 49
Government		381 42
Total		$19,035 91
Passenger:		
Ordinary	$15,978 32	
United States troops	162 80	
Expresses	545 25	
United States mails	694 17	
		17,380 54
Miscellaneous:		
Sundry sources		81 95
Gross earnings, 118 miles		$36,498 40

EXPENSES.

Conducting transportation	$4,951 20
Motive power	5,094 88
Maintenance of cars	518 18
Maintenance of way	8,097 37
General expenses	1,217 60
Total expenses	$19,878 73
Net proceeds to balance	16,619 67
Total	$36,498 40

Net earnings, 45.53 per cent.



COMPARATIVE.

Gross earnings, as above	$36,498 40
Gross earnings, same month 1873, same mileage	34,326 24
Increase, 6.3 per cent	2,172 16
Net earnings, as above	$16 619 67
Net earnings, same month 1873	18,769 31
Decrease, 11.4 per cent	$2,149 64

Pennsylvania Railroad.

At a meeting of the directors of this company, held in Philadelphia on the 3d inst., the usual semi-annual dividend of 5 per cent. was declared. A statement of the operations of the company on its works east of Pittsburg, during the past six months, was presented, showing gross receipts of $19,696,642 and net receipts of $9,444,386. After paying interest on bonds, semi-annual main line payment, and dividends and interest on the New Jersey lines, there is a balance of $5,141,856. After reserving $876,333 for contingencies, there is $4,265,423 available for the dividend, which on a capital stock of $68,443,800 will amount to $3,422,165, and with the State tax, which the company pays, to $3,730,159. This leaves a balance to credit of profit and loss of $535,364. These figures cover a half year in which business was probably never before in the history of the company so much paralyzed, and would indicate assurance for the future.

☞ The earnings of the Central Pacific Railroad in October, 1874, were $1,507,000, against $1,375,470 in October, 1873, and $1,285,567 in October, 1872. For the ten months ending October 31, 1874, the earnings were $11,824,903, against $11,574,276 for the first ten months of 1873, and $10,593,011 for the first ten months of 1872.

Manufactory of the Spencerian Steel Pens, Birmingham, England.

SPENCERIAN
DOUBLE ELASTIC
STEEL PENS

The superiority and excellence of these justly celebrated Pens, are appreciated, as is shown in their constantly increasing sale. They are comprised in 15 numbers, of which *one number* alone has an annual sale of more than

5,000,000.

The *Spencerian Pens* are manufactured of the very best material by the most expert workmen in Europe, and are famous for their elasticity, durability, and evenness of point.

The Spencerian Pens are for Sale by all Dealers.

We make Fifteen Numbers of Pens, differing in flexibility and fineness of point, adapted to every style of writing, as follows:

No. 1. College Pen. *Point Fine; Action Perfect.* This is a great favorite with our leading penmen, is largely used in the Schools and Commercial Colleges throughout the country, and gives better satisfaction than any Pen before the American Public.

No. 2. Counting-House Pen. *Point Fine and Flexible,* well adapted to the use of Correspondents and Accountants.

No. 3. Commercial Pen. *Point Medium.* An Easy Writing Business Pen.

No 4. Ladies' Extra Pen. *Point Extra Fine and Flexible.* For Delicate Fine Hand Writing this is a very superior Pen.

No. 5. School Pen. *Point Fine, Medium in Flexibility.* For a durable School Pen it has never been equaled.

No. 6. Flourishing Pen. *Point Long, Flexible and Medium in Fineness.* For Off-hand Flourishing.

No. 7. Quill Pen. *Point Medium, Quill Action.* A Smooth, Easy Writing Pen. Its name well represents its qualities.

No. 8. Congress Pen. (New.) *Medium Flexible Point.* A *very* superior Pen for all styles of writing. This Pen undergoes a process that renders it non-corrosive and *three times* more durable than any ordinary steel Pen.

No. 9. Bank Pen. *Point Long and Flexible.* A great favorite with Accountants, Tellers, &c.

No. 10. Custom-House Pen. *Point Medium.* Well adapted to all styles of Bold-hand Writing.

No. 11. University Pen. *Point Medium, very Smooth and Flexible.* The action of this celebrated Pen is very fine.

No. 12. Epistolaire Pen. *Point very Fine and very Flexible.* This is the Finest Pointed Pen made, and for very Delicate Writing, Map and Fine Pen Drawing, it has no equal.

No. 13. Engrossing Pen. *Point Blunt and Smooth.* Particularly adapted to Coarse-hand Writing and Engrossing.

No. 14. Artistic Pen. *Flexible, with extra fine Point.* This Exquisite and Truly Celebrated Pen is the Best Pen extant for Fine Ornamental Writing.

No. 15. The Queen. *Point extra fine.* Admirably adapted to all kinds of Fine Writing.

☞ *Sample Cards containing all the FIFTEEN Numbers, securely enclosed, will be sent by mail on receipt of 25 cents.*

American Railroad Journal.

New York, Saturday, November 21, 1874.

Union Pacific Railroad.

The Solicitor of the Treasury has called on the Union Pacific Railroad Company for 5 per cent of the net earnings of the road from November, 1869, to Oct. 31, 1874, making a total of $1,040,056, to be paid within sixty days. The company resists the demand, alleging that under the provisions of its charter the five per cent was to be paid only after completion of the road. In 1869 a committee of citizens was appointed to examine the condition of the road, and they reported that the company would have to expend $1,000,000 before the road could be deemed completed under the law, and the Government meantime withheld the land grant patents from the company as a guaranty for its completion. This Fall the company announced that the road was completed and called the Government to send its commissioners to make examination and report as to the completeness of the work, and these commissioners reported favorably, showing that the company had expended $500,000 more than was called for by the committee of citizens. Under this state of facts it is claimed by the company that the road has not been completed within the purview of the charter only for the period which has elapsed since the acceptance of the report of the Government Commissioners.

Baltimore and Ohio Railroad.

At the annual meeting of the stockholders of this company, held in Baltimore on the 16th inst., the following gentlemen were unanimously elected directors, by a vote of 39,787 shares, viz: Gallo way Cheston, Samuel W. Smith, Francis Burnes, John Spear Nicholas, John Gregg, Francis T. King, C. Oliver O'Donnell, James Harvey, William W. Taylor, Samuel Kirby, John King, Jr., and C. A. Von Lingen. The annual report of the President and Directors for the fiscal year ending September 30, 1874, was presented and read. From this we learn that the revenues of the Main Stem, (including the Winchester and Potomac, the Winchester and Strasburg, the Strasburg and Harrisonburg, the Washington County, and the Metropolitan Railroads) were $11,693,955 55, the expenses $6,675,895 26, and the net profits $5,018,060 29. Compared with the fiscal year 1873, the earnings have decreased $558,888 23, and the working expenses $642,152 53, making a comparative increase in the net profits of $83,264 30. Compared with the fiscal year 1872, the increase of earnings being $1,039,483 93, and of working expenses $553,495 33, the increase of net profits amounts to $485,988 60. The percentage of expenses to earnings was: in 1874, 57.08; in 1873, 59.72; and in 1872, 57.46.

During the year the sinking fund for the redemption of the city loan increased to $1,647,753 20, showing a gain of $108,900.

The profit and loss account shows an increase for the past year of $3,111,028 97, which added to the surplus income of previous years, increases that amount to $32,144,160 15. The entire mortgage indebtedness (including a loan made in January last of £2,000,000 in currency and sterling,) is $29,061,564 80. It is thus shown that the surplus fund representing capital derived from net earnings invested in its branch and connecting roads, and in the great improvements that have been continuously constructed on the main stem, which is not represented by either stock or bonds, exceeds the entire mortgage indebtedness of the company $3,082,595 85.

The aggregate earnings of the Main Stem (including the roads above named) and of the Washington Branch, the Parkersburg Branch, the Central Ohio Division, the Lake Erie Division, the Chicago Division, the Wheeling, Pittsburg and Baltimore Railroad, and the Newark, Somerset and Straitsville Railroad, were $14,947,090 42, the expenses $9,416,650 67, and the net profits $5,530,439 75. The aggregate working expenses of the Main Stem with all branches and divisions are 62.99 per cent of the whole gross revenues, being 1.63 per cent less than the preceding year.

Semi-annual dividends of five per cent upon the capital stock of the Main Stem were paid on the 15th of November, 1873, and on the 1st of May, 1874.

A dividend of five per cent was paid on the 31st of October, 1873, on the capital stock of the Washington Branch, and a similar dividend on the 17th of April, 1874.

Port Royal Navigation Co.

The Baltimore *Sun* says that a stock company has been formed in that city, called the Port Royal Navigation Company, with J. C. Graffin, president, and J. P. Smith, secretary, the stock being owned by Baltimore parties and the Port Royal Railroad Company, the object being to establish a steamship line between Baltimore and Port Royal, and then adds:

Augusta, Georgia, is situated 111 miles from Port Royal and the seaboard, and the Port Royal railroad between the points has just been completed. Large warehouses and wharves have been built, and arrangements made whereby cars are to be run alongside the steamships and goods be handed from one to the other without being placed on the wharf. The harbor, as is known, is excellent, there being no bars to interfere, and twenty-four feet draft of water can be found at all times. Of late many large steamships call at Port Royal for bituminious coal, which is brought there from the Tennessee line and put on board vessels at $4 65 a ton, or about the same price as in Baltimore. These facts and the circumstance that the region about Beaufort and Port Royal is noted for producing the famous Sea Island cotton, make it apparent that the terminal point of the new steamship line is destined to be a prominent commercial depot. The Southern trade of Baltimore has been increasing rapidly and with

out intermission since the war, but owing to limited facilities for cheap transportation trade between Baltimore and inland Southern cities has been more moderate than otherwise might have been, and to develop this particular trade is the aim of the new line.

The "Calvert" an iron propeller of 1,000 tons capacity, 190 feet long, 28 feet beam and 20 feet depth of hold, and with very powerful improved machinery, which make her a fast sailer, has already commenced her trips, and two other iron steamships are now in process of completion, which will be added to the line at an early day. The agency of the line has been given to Messrs. Andrews & Co., a firm long identified with Southern steamship transportation.

Georgia Railroad and Banking Company.

The earnings of this road for the years ending March 31, 1873 and 1874, were as follows:

	1873.	1874.
From passengers	$375,339 26	$307,047 23
" freight	1,222,788 63	1,239,336 69
" mails....	25,328 64	25,401 10
	$1,623,456 53	$1,571,785 02
Expenses, viz:		
Conducting transp....	$253,115 54	$265,445 59
Motive power	327,066 60	349,439 56
Maintenance of way...	316,999 43	212,044 76
Maintenance of cars...	79,649 84	60,521 09
	$976,830 91	$887,450 99
Earnings less expenses.	$646,625 62	$684,334 03

Out of which have been paid—

For 5 new engines and cost of delivery....	$69,591 34	
For 1 new pay car..... ..	3,700 00	
For 1 new baggage car...	2,000 00	
For 85 new box cars	68,000 00	
For 18 box cars rebuilt...	7,200 00	
For 18 platform cars rebuilt....	3,600 00	
For 1 new stationary engine....	1,206 60	
For changing pattern of trucks....	2,457 80	
		157,755 74
Net profits....		$526,578 29

In 1873 the extraordinary expenses amounted to $156,426 84, leaving the net profits in that year $490,195 78. Compared with the previous year, the gross earnings of 1874 show a decrease of $51,671 51, with a decrease in expenditures, both ordinary and extraordinary, of $88,054 02, making the increase in net profits $36,382 51. The President in his report says:

The past year has been one of peculiar hardship upon railroads. All creeds, classes and professions seem to be combined against them! Their fundamental rights are utterly ignored, and it is boldly avowed, "that they have no rights which the public is bound to respect!"

There is no interest in the United States of the same magnitude so much depressed as the railroad interest! The roads are rapidly running into bankruptcy, and falling into the hands of receivers.

It is believed that not a single road at the South and very few in the West are paying regular dividends to the stockholders.* Of all interests, it is the most powerless and defenceless. They are at the mercy of every unprincipled and unscrupulous enemy, and yet their dangerous power affords a constant theme for the demagogue! Their fundamental rights are utterly ignored, and they are virtually in a state of outlawry! Upon no subject have the legislators of the country exhibited more glaring inconsistency, than upon the subject of these improvements. Everybody wants railroads, yet they destroy those already built, and discourage the building of any new ones. Those citizens who now hold this species of property have no choice, and must make the best of it, but after recent demonstrations, it is not likely any new railroad investments will be made.

We refer the stockholders to the report of the superintendent. It will be found interesting and instructive, and especially so to the planter and merchant. There will be found the sources of income, its fluctuation, the causes of that fluctuation, and whether in its nature permanent or temporary. It will be seen that for the first six months of the fiscal year, every branch of the business was prosperous, but in the second half of the year, the travel and up freights fell off enormously and rapidly, proving the disastrous effects of the financial panic upon every branch of business.

It will be seen that the expenses in some branches of the service have been high. Some earnest efforts have been made to reduce expenses, but generally with unsatisfactory results. Every right thinking man will duly appreciate the claims of labor, which is the basis of all wealth; but labor should sympathize with capital and yield to the necessities of a common interest. Short time and high pay, high salaries and light service, are characteristics of the present time, and have greatly disturbed the economy of labor, and result in injury to the laborer as well as the employer. The laborer should reasonably sympathize with the employer, and in times of depression submit to a reduction of wages, if satisfied that the profits of business will not afford more.

The report of the superintendent shows a falling off of gross receipts compared with the preceding year, of $51,671 51, but an increase of net profits of $36,382 51. This incongruous relation between gross receipts and net profits is fully explained in the superintendent's report. Had the season been more propitious for laying new track, the relation would have been very different, and this net profit, and perhaps more, would have been expended in new iron. The superintendent justly appreciates the value of a smooth track.

There is one trouble sorely besetting railroad investments since the war, which is not peculiar to the South. The great difficulty of finding men worthy of trust in confidential positions is felt and acknowledged by all. In many instances railroads are organized and managed for the benefit of the officers rather than for the benefit of the stockholders. Officers may be found very capable of watching others, but who can be found to watch them! All moral responsibility, and all power to resist temptation, seems to be banished from the land! Hence perfidy and peculation are the order of the day, and can scarcely be punished as crime, as they are practically recognized as the custom of the country.

Though the exhibit of the last year's business is not entirely satisfactory, especially in some branches of expenditures, yet under all the troubles besetting the company, the stockholders have not much cause of complaint. The net profit claimed is an honest and reliable one, after charging all expenditures on road account to profit and loss. Our finances have suffered by a forced relation with connecting roads, or the road earnings would furnish an ample fund for something more than the usual dividend of eight per cent.

Though our losses have been heavy, and the value of our assets is fluctuating and contingent, it is believed that our stock is still whole, with a handsome surplus. Though some of our investments have depreciated, and others become worthless, others on the other hand have improved in value. Among the latter may be mentioned the Nashville and Chattanooga Railroad stock, which is worth more than double the value placed on it in our balance sheet.

The company have 52 locomotives, 27 passenger, 12 baggage, 3 mail, 3 express, 506 box, 21 cab, 129 platform, 35 stock, 28 coal, 24 shanty, 1 pay and 2 wood cars. Miles run by locomotives, 1,140,055, an increase over the previous year of 36,504. Miles of road in use, 231. Bales of cotton transported, 273,392. Bushels of grain, 1,107,882. Barrels of flour 123,209. Pounds of guano, 39,171,240.

The earnings of the Macon and Augusta Railroad were $121,374 51, the expenses $100,405 69, and the net profits $20,968 82. The Superintendent in his report says:

The new road between Atlanta and Charlotte was opened for business about the 1st of October last, and has affected considerably the interest of your road in through travel between the South and East, and furnishes another line for competition in through freights.

I do not know of any other road likely to be built soon that would increase the present industrious competition with your road.

As referred to in last report, the benefits to be derived by your road from its Port Royal connection will depend mainly upon facilities that may be offered for ocean transportation between Port Royal, the Eastern cities and trans-Atlantic ports. As yet but little has been done in that direction; therefore, for the time being, this connection has added but little to the business of your road. But for good reasons it is believed that some plan may yet be devised by which these facilities for ocean transportation, in connection with that road, may be secured at no distant day, which arrangement will certainly increase the Western business over your road, both in freights and passengers, especially in the transportation of grain and passage of emigrants from the Old World over your road to the Great West. That Port Royal may be made a large coaling station for ocean steamers seems altogether practicable, in view of the large deposits of coal, and the mining interests already developed in Georgia, Tennessee and Alabama, and the facilities for transporting it to Port Royal. This of itself would give an impetus to business at that place in causing coasting and other steamers to call there, besides being an important facility offered for direct lines of steamers to and from that place.

The following is a condensed statement of the condition of the Georgia Railroad and Banking Company on 31st March, 1874:

The road and its outfit....		$4,156,000 00
Real estate		123,220 86
Banking house and lot....		35,000 00

President.—JOHN P. KING.

Directors.—E. E. Jones, James S. Hamilton, Antonie Poullain, M. P. Stovall, James W. Davies, D. E. Butler, L. M. Hill, Wm. M. Reese, Thos. J. Burney, George Hillyer, Josiah Sibley, John Davison, Stevens Thomas, Wm. W. Clark, Geo. T. Jackson.

Superintendent.—E. W. COLE.

Treasurer.—J. MULLIGAN.

Precautions against Forgery.

In order to protect the public in the matter of forged or altered certificates, the Governing Committee of the Stock Exchange at their last meeting directed the Committee on Securities to prepare a circular to send to such companies as still use lithographed certificates, requesting them to substitute therefor, as soon as possible, certificates engraved by some responsible bank note company which is in the habit of retaining the plates. We publish the following rules, which have been adopted by the Committee on Stock List for the information of applicants to have securities put on the Stock Exchange list:

COMMITTEE ON STOCK LIST,
NEW YORK STOCK EXCHANGE.

RULE 1. In all cases of application for placing either bonds or stocks on the list it is required that a sample of each issue shall be shown to the chairman of the committee, so as to ascertain whether proper precautions have been taken against forgery; and no form of stock certificate will be accepted unless it has been carefully engraved by some responsible bank note engraving company.

2. Applications to place bonds on the list must state the amount of the issue, the date of the issue, the time when due, the names of the trustees, the par value of each kind of bond issued and the series of the number in each mortgage.

3. All active stocks must be registered at some institution satisfactory to the Committee; and each application must be accompanied by a letter from the registrar stating the amount of stock registered at the time of application, and also by "the form of agreement with registrars" duly executed, provided such form has not been already filed with the Committee.

4. All applications must be accompanied by a full statement of the condition of the company, a list of its officers, &c., and when possible it should be made by an officer of the company.

5. After any stock has once been placed on the list, any change in the form of certificate or place of registry must receive the consent of "The Committee on Securities at Large" or the stock will be liable to be stricken from the list.

6. The attention of the applicants is also called to the following resolution of the Governing Committee of the Stock Exchange:

"That all applications for the admission of securities to the stock list shall be accompanied by a fee of fifty dollars, to cover the cost of printing and other expenses of the committee, whether the application is accepted or rejected." Said fee to become the property of the Exchange.

JOHN T. DENNY, Chairman.

Erie Railway.

CAPTAIN TYLER'S REPORT.

To A. De Laski, Esq., Chairman, London Banking Association:

Wyvenhoe Hall, Colchester, Oct. 24, 1874.

Dear Sir,—With reference to your letter of 12th May last, containing instructions for my guidance in the United States, and to the amended instructions in your letter of 5th instant, I have now the pleasure to inform you that I landed in New York on 27th May, and placed myself at once in communication with the president and officers of the Erie. From that time until 11th July, when I re embarked for England, I was continuously engaged in inspecting and obtaining information in regard to the Erie, its connections, rolling stock, machine shops, and properties, with a view to forming the required opinion as to their condition and management. As portions of its connections, it became my duty further to investigate the condition of the Atlantic and Great Western under lease to the Erie, and the Cleveland, Columbus, Cincinnati, and Indianapolis under the control of the Atlantic and Great Western, and the Terre Haute, Alton, and St. Louis, half of which is owned by the Cleveland, Columbus, Cincinnati, and Indianapolis, and half by the Pennsylvania. The total length of these lines, as hereafter explained in detail, is 2,288 miles. I returned from St. Louis, via Chicago, to Cleveland, and thence over the Pennsylvania Central from Pittsburg, via Altoona and Philadelphia, to New York. The total distance over which I thus traveled in America by railway, besides considerable distances in riding or driving, was about 5,250 miles, and I met with the greatest kindness and attention, and every disposition to afford information on the part not only of the officers of the Erie, but also of those of all other companies with which I came in contact.

I thus visited the principal centres of traffic more directly connected with these systems of railways.

On returning to England, I awaited the return of the accountants, with the intention of conferring with them, as directed by your letter of 12th May and as I had arranged with them in New York; and it was only on finding that their principals preferred not to confer with me, but to present their report independently, and on receiving your amended instructions on 5th October, that I was able to complete the following report, in which it will be convenient to deal with the above mentioned undertakings and their various departments separately. I commence with a general description of the Erie.

HISTORICAL SKETCH.

After the Erie Canal had been completed in 1824, attention was naturally directed to the want of some better thoroughfare than the common roads of the country afforded, as regards the southern portions of the State, between Lake Erie and New York city. It was impracticable to construct a canal leading directly to that city, owing to the rugged nature of the country to be traversed. In 1825 the Legislature directed a survey to be made for a State road through the southern countries from Lake Erie to the Hudson River; and after several conventions had been held between 1826 and 1830 to discuss the question, first of a State road, and later of a railroad through this district, application was made to the State Legislature in 1832 for a charter for a railroad. As the result of this application, the act incorporating the New York and Erie was passed on 24th April 1832, with a capital of $10,000,000, and with power to construct a single, double, or treble track from New York, or some eligible point in its vicinity, to Lake Erie. Between 1832 and 1838 various surveys were made, subscriptions were raised, and assistance was granted by the Legislature, but the great fire in New York in 1835, and the financial embarassments of 1836 and 1837, prevented payments from being made on account of subscriptions, and rendered a State loan for $3,000,000 unavailable. After a fresh act in 1838 portions of the work were placed under contract, and these were extended, by the aid of local subscriptions, in Rockland and Orange counties in 1838 and 1839. In 1840 the Susquehanna and western division were put under contract, and the Legislature again amended the Loan act.

During various difficulties up to 1845 but little was accomplished. A length of 53 miles only, from Piermont to Middletown, had been brought into actual use; and 7 miles of this distance, between Goshen and Middletown, had been built by an association, to which the company was still indebted for its construction. From this time forward more rapid progress was made. In October 1846 the line was opened to Otisville, 61¼ miles from Piermont; and, in December 1848, it was opened to Binghamton.

In 1847 it was proposed to alter the gauge from 6ft. to 4ft. 8½in., and it was estimated by Mr. T. S. Brown, then chief engineer, that the cost of the alteration for the portion completed (61¼ miles) between Piermont and Otisville would be about $75,000; whilst about $500,000 would be saved by the adoption of the narrower gauge in completing the line to Lake Erie. Other counsels unfortunately prevailed, and a golden opportunity was thus lost.

It was further opened 22 miles to Owego in June 1849; 36¼ miles to Elmira in October 1849; 18 miles to Corning on 1st January 1850; to Hornellsville on 23d September 1850; and to Dunkirk on 14th May 1851. The Newburgh branch, 19 miles long, was also opened in January 1850. In 1852 the Ramapo, Paterson, and Jersey City railroads laid their tracks, under arrangement, to the same gauge, on the road from Sufferns to Paterson, in 1852, and the line between Paterson and Jersey City was so completed in November 1853. Trains were thus enabled to run through without change of cars in 1853, between Jersey City and Dunkirk. The directors of that year, after remarking upon the difficulties which had been encountered during the progress of the work, observed—"Experience has now demonstrated that no more safe or profitable investment can be made in this country than in a well located and well managed railroad." It cannot be doubted that if, from that time to the present, good management had prevailed, the investment would have been as safe and as profitable as those directors anticipated. One of them, Mr. Homer Ramsdell, who was then the president, is still an active director of the Erie.

The New York and Erie thus extended from a western terminus at Dunkirk, on Lake Erie, 40 miles from Buffalo, to three eastern termini on the Hudson River. Of these latter, the first was at Jersey City, opposite to New York; the second was at Piermont, 24 miles from New York; and third was at Newburgh, 60 miles from New York.

There were also tributary roads to Buffalo, Tonawanda, Niagara Falls, and the head of Lake Ontario; and others had been commenced to Pittsburgh, the head of the Ohio navigation, and to Erie, 90 miles west of Buffalo, and in other directions. Shortly after the completion of the line to Dunkirk it was found, from the accumulation of traffic at the eastern end of it, that a second track was there required; and, accordingly, between 1851 and 1854, 56 miles of the eastern division between Sufferns and Delaware, and the portions of the Delaware and Susquehanna divisions, from Deposit to the junction with the Canandaigua, were laid for the second track.

The New York and Erie, thus constructed, passed from the valley of the Hudson, over the dividing ridge at Otisville, to the valley of the Delaware, and followed the latter, passing near the corners of the three States of New York, New Jersey, and Pennsylvania, to Deposit. Crossing the dividing range between Deposit and Susquehanna at the summit it descended to the latter at Lanesborough, and it continued in the valleys of the tributaries of the Susquehanna, the Chemung, the Tioga, and the Canisteo, to Hornells-

ville, whence it crossed to the valley of Genesee, which it followed as far as Belvidere. Crossing next to the valley of the Allegheny, it followed it, and one of its branches, the Little Valley, to the station of that name, whence again it finally crossed to Lake Erie.

Entering the valley of the Delaware at 88 miles from New York, and at an elevation of 436ft. above the sea level, it continued in that valley for 90 miles. At Deposit, 177 miles from New York, the elevation was 997ft. and at the Gulf summit, 184 miles from New York, between Deposit and Lanesborough, it was 1,866ft. above the sea. Striking the Susquehanna, 192 miles from New York, at 907ft., and the Chemung at 806ft., it was at Hornellsville, 333¼ miles from New York, 1,139ft above the sea. Other elevations were, at the Almond summit, between the Canisteo and Genesee valleys, 1,760., ft. and this was the highest point of the line; at Belvidere, 365¼ miles from New York, 1,369ft.; at the Cuba summit, 377¼ miles from New York, and between the Genesee and Allegheny valleys 1,677ft.; at Olean, 394¼ miles from New York, 1,418ft.; at Great Valley, 410 miles from New York, 1,390ft.; at the summit 436 miles from New York, between Little Valley and Lake Erie, 1,596ft.; and at Dunkirk, 459 miles from New York, 580ft. above the sea.

Sixty four per cent. of the whole line was straight, the aggregate amount of curvature was 22,252 degrees in 445 miles of the main track, making an average of 50 degrees per mile. Taking ascents and descents together, they amounted to 8,056ft. in 445 miles, or an average of 18ft. to the mile.

The total length of second track completed and in use in November 1853 was 187¼ miles. The track so doubled was 8¼ miles from Jersey City to Clarkestown, 43¼ miles from Sufferns to Otisville, 85 miles from Susquehanna to the junction near Elmira. There were also in progress, to be completed in January 1854, 14¼ miles of second track between Bergen and Paterson, 12¼ miles between Otisville and Delaware, and 16¼ miles between Deposit and Susquehanna; making altogether 180 miles of second track (completed 20 years ago), besides 80 miles of turn-outs and sidings.

The total cost of the line and its equipment up to September 1853 was $31,222,834, and the actual or estimated cost, with its branch and tributary roads, altogether 1,439 miles in length, was $44,420,786. The company owned 150 locomotive engines, of which eight, built for the narrow gauge line between Paterson and Jersey City, were thrown out of use when that part of the line was altered to the 6ft. gauge. The total earnings for the year ending 30th September 1853 were $4,818,962, and the total expenses for the year $2,407,373, so that the working expenses were 52 4-10ths per cent. of the receipts.

It was found in this year that active competition between many of the railroad companies had in many cases reduced the prices for the conveyance of passengers and the transport of freight below what was fairly remunerative. To remedy this state of affairs a convention was held at Buffalo in June 1853, at which the New York Central, the New York and Erie, the Michigan Central, the Michigan Southern, the Mad River, and the Cleveland and Cincinnati, and the steamboat lines on Lake Erie, were represented. The result was, that equal rates and fares were agreed upon for passengers and goods carried between New York and all places on or west of Lake Erie, with a limit to the rates of speed to be employed through the State of New York. The charges on both passengers and freight were thus increased by about 20 per cent., while the high prices which then prevailed for agricultural products, and the natural increase of trade and communication, prevented these increased charges from injuriously affecting the receipts. From experience up to that time the directors entertained a firm conviction that if the affairs of the company were managed with economy and judgment it would prove to be one the safest and most productive investments in the country. The company had then issued $10,000,000 of capital stock, had a funded debt of $20,173,868, and a floating debt of $2,685,026, against which latter they had on hand $880,000 of bonds sold at par but not delivered, and $3 000,000 bonds of the same class unissued.

For several following years the company appeared likely to realise the prognostications of success which had been made, and it advanced to an 8 per cent. interest upon its stock; but after the expenditure of a considerable amount of money at its Jersey City terminus, and in that neighborhood, and through the medium of the Long Dock company, it became embarassed during the panic of 1857 and 1858; and in 1859 a receiver was appointed, with power to operate the railroad whilst proceedings were going on for foreclosure of the mortgages.

On 1st January 1862 the property which previously belonged to the New York and Erie and its management passed from the hands of the Supreme Court into the possession of the Erie. All liabilities and claims against the company and its property having been paid or adjusted, the receiver appointed by the court, who had "operated the road" for two years and half, was discharged; and he said, in handing over the property to the new company, "with the ability to earn more income than ever before, it is hoped the early return of peace and prosperity to the country will so increase the traffic that the road will hereafter earn full interest on the entire capital and debt of the company."

The capital and debt of the company on 31st December 1862 were given as follows:

Capital Stock:		
Common stock		$11,437,500
Preferred		8,535,700
		$19,973,200
Funded Debt:		
First mortgage	$3,000,000	
Second	4,000,000	
Third	6,000,000	
Fourth	5,100,000	
Fifth	1,791,500	
Buffalo branch	200,000	
Real estate	40,000	
		20,131,500
Total capital, stock and debt		$40,104,700

There was no floating debt, and the property of the company consisted of—

	Miles.
The main line, Jersey City to Dunkirk	459
Piermont branch	18
Newburgh branch	19
Buffalo branch	60
Total	556

On the main line there were 180 miles of double track, and on the main line and branches 122 miles of sidings or switches. The Canandaigua and Elmira, 66 miles long, was operated under a lease, and regarded in the accounts as part of the road of the company. The Warwick Valley, 10 miles long, was operated under contract, the Erie receiving payment in a fixed sum for each mile run; and was worked in connection with the Newburgh branch, the trains running through between Newburgh and Warwick.

The number of miles of road operated by the company was 633. The rolling stock consisted of 226 locomotives, 101 passenger cars, 48 baggage and express cars, 38 emigrant cars, 3,115 freight and other cars, and 78 caboose and milk cars. The company owned one steamboat, used for towing, three ferry boats, and eleven barges.

The total earnings for the year 1862 were stated at $8,400,331, and the expenses of operation, at 58 per cent, were $4,860,748; so that the net earnings amounted to $3,539,585, which left a surplus, after payment of fixed charges, and of $94,736 on account of losses by a fire at Elmira of $1,636,850.

The number of miles run in 1861 by freight trains was 2,795,826; the tons of freight moved were 1,838,374. The earnings from freight were $5,011,661, or $1 79c. per mile run, at a cost of $2,807,834, or $2 09 per ton moved.

The Atlantic and Great Western was then in operation to Ravenna, and was about to be opened to Akron, Ohio, 200 miles from its junction with the Erie at Salamanca, with two branches running into the great oil region, one 84 miles, and the other 26 miles in length, making in all about 260 miles of broad gauge tributary road.

On 1st May 1863 the company took possession of the Buffalo, New York, and Erie, with its rolling stock, depots, and docks, under a lease arranged during the previous year. This line, leaving the main line near Corning, runs through Bath, Avon, Batavia, and Attica to Buffalo, and was, including a branch 18 miles long from Avon to Rochester, 158 miles long. They had previously purchased the line, 60 miles long, between Hornellsville and Attica, and they had now by this latter line, and the line between Attica and Buffalo, a route between New York and the lakes at Buffalo, more than 20 miles shorter than any other. The Hawley branch, 16 miles long, was also opened during this year, and leased from the Pennsylvania Coal company.

In 1864 there was left, after the payment of all charges to "Main account," and two dividends of 3½ per cent on the preferred stock, and two dividends of 4 per cent on the common stock, an undivided surplus of $914,500; and in 1865 this surplus increased to $1,515,350. In 1866 there was a "stoppage of military transportation, consequent on the closing of the rebellion, and to the general stagnation of business resulting therefrom," and there was a surplus of only $40,326, after the payment of 7 per cent dividends on the preference stock. This was partly owing to the suspension for three months of the coal traffic, and to ruinous competition during the first six months of the year; but in the later months the competing companies were acting harmoniously together, with a determination to maintain compensating rates, which the directors "had good reason to hope would be continued," and which would, if continued, "assure profitable returns for the future." The line was said in the directors' report to be "in better condition and better equipped than at any previous period."

In 1867 the capital stock was returned at upwards of $25,000,000, the funded debt at nearly $22 500 000, the floating debt at rather more than $3,500,000, and they increased under the Jay Gould administration to $86,536,910 of capital stock and $26,398,000 of funded debt, with no floating debt, according to the published report. It is not necessary to recapitulate here the history of those times, which is sufficiently notorious; and I must, under my amended instructions, leave the existing financial condition of the company to the accountants.

Geographical Position, Competitors, and Statistics of Produce.

In order properly to understand the position occupied by the Erie, it is, however, necessary also to consider the relative positions of its rivals and its feeders.

The eastern seaboard, containing the principal ports of the United States, is separated from the great traffic producing districts of the west and north west by the Allegheny range of mountains, which, rising from 2,000 to 5,000 feet above the sea, can only be crossed by railways in five places. Each of these five mountain passes is occupied by a trunk line of railway, running generally east and west, and taking advantage of the natural valleys for ascent on the one side and descent on the other side of them. The New York Central, the most northerly of these trunk lines, runs up the valley of the Hudson and its tributary the Mohawk, which cuts through the mountain system at the Highlands of the Hudson and at Little Falls, and runs thence along the valley of the great lakes. The Erie runs up the valleys of the Delaware, the Susquehanna, the Chemung, and the Canisteo, down the valley of the Allegheny to Salamanca and Dunkirk on the one side, while following the drainage of the great lakes to Buffalo on the other

side. The Pennsylvania ascends the valleys of the Susquehanna and Juniata, and descends the valley of the Conemaugh to Pittsburg; it has also, by means of the Philadelphia and Erie, and the Allegheny Valley, a low grade connection through the valleys of the tributaries of the Susquehanna, and those of the Allegheny. The Baltimore and Ohio ascends the valley of the Potomac, and descends the valleys of the tributaries of the Ohio. The Philadelphia and Erie being considered as a loop line of the Pennsylvania, it may be said that the above four trunk lines are the principal railway means of access to the Atlantic of the produce of the great northwest and its constantly increasing traffic delivered on the summits of the Allegheny range from 40,000 miles of railway on the west of it. The Canadian railways through the peninsula between the Lakes Huron, Ontario, and Erie, assist, and will assist more, in feeding the New York Central and the Erie. The Erie Canal, the Grand Trunk of Canada, and, as long as it is free from ice, the magnificent navigation of the St. Lawrence, are also competitors in the north; and the unfinished Chesapeake and Ohio is also a partial competitor in the south. But the tonnage which the four great trunk lines above referred to can command is limited, in practice, only by the value of the property to be moved, and the price at which it can profitably be transported to a market. It has been estimated that 5,000,000 tons, annually produced in the west, are not sent forward as grain or in their original condition to eastern markets, for want of sufficient demand or lower rates; and much of it has to be condensed, either by manufacture or as food for animals, before it can at present be moved eastward. The tonnage towards the Atlantic for the season of 1871-2 has been estimated as follows, by different routes:—The Erie Canal, 2,600,000 tons; the Welland Canal, 1,000,000 tons; the New York Central, 1,250 000 tons; the Erie, 893,000 tons; the Pennsylvania, 879,000 tons; the Baltimore and Ohio, 680,000 tons, making a total, in addition to the local business of these various lines, and what has been conveyed otherwise, of 7,302,000 tons moved through from the west; which might be increased by 5,000,000 tons in the event of a more active demand in eastern markets, or of the means of eastern transportotion being, by more economical working, further cheapened.

An interesting series of tabular statements, embracing periods from 1840 to 1870, in regard to the agricultural products of the United States of America, classified for different districts according to their topographical positions, has been published in the present year by Mr. Samuel B. Ruggles. From these it would appear that the population having increased from 17,069,453 in 1840 to 38,558,371 in 1870, and the total area being exclusive of Alaska, 1,897,055,520, of which 188,912,883 acres have been improved, the bushels of cereals produced increased from 615,535,077 in 1840 to 1,387,279,228 in 1870. The butter and cheese increased from 202,410,440 lbs. in 1840 to 677,017,095 lbs. in 1870. The value of animals slaughtered or sold for slaughter increased from $111,703,142 in 1850 to $398,956 376 in 1870, and the products of all manufactures increased from $1,019,106,616 in 1850 to $4 232.825,493 in 1870. The interior States north of the Ohio contained in 1870 a total population of rather more than 2,000,000 above ten years old, engaged in agriculture, out of a total of nearly 13,000,000. Out of an area of 384,510,080 acres 78,366,864 acres had been improved. The bushels of cereals produced in the ten States, from Ohio to Kansas and Nebraska inclusive, had increased from 166,204,291 in 1840 to 812,151,925 in 1870. The pounds of butter and cheese from dairies had increased from 20,880,408 in 1840 to 228,366,845 in 1870. The cheese from factories figures for the first time in the decennial periods at 28,903,742 lbs. for 1870. The value of animals slaughtered, or sold for slaughter, increased from $24,419,079 in 1850 to $208,386,441 in 1870. And the products of all manufactories increased from $146,848,545 in 1850 to $1,072,983,358 in 1870. In the six New England States, on a total of 43,742,720 acres, of which 11,997 540 acres have been improved, whilst the population has increased from 2,234,822 for 1840 to 3,487,924 for 1870, the bushels of cereals have increased only from 20,107 129 in in 1840 to 20,485,924 in 1870. The pounds of butter and cheese from dairies have only increased from 54,668,464 in 1840 to 60,853,726 in 1870. The value of animals slaughtered or sold for slaughter had increased from $10,401,658 in 1850 to $22,962,001 in 1870.

For the present purpose the population of the above two great districts—namely, the ten States north of the Ohio river, and the six New England States, are the most interesting to consider, together with the relative increase of the particular articles of produce which have been specially referred to. It will be observed from the above figures that, while the production of cereals, including wheat, rye, Indian corn, oats, barley, and buckwheat has remained nearly stationary in the New England States for thirty years, between 1840 and 1870, the production of cereals in the central interior States has, while commencing in 1840 with eight times the amount, been again multiplied five-fold during the same thirty years; that whilst the increase of butter and cheese from dairies has been but small in the New England States, it has, commencing in 1840 in the central interior States with between one-half and one-third the amount, been multiplied eleven-fold in the same thirty years; that whilst the value of animals slaughtered, or sold for slaughter, has rather more than doubled in the New England States in twenty years, the same item, commencing in 1850 at two and a half times the amount in the central interior States, has multiplied eightfold in the same twenty years; whilst the products of all manufactories, commencing at more than $283,000,000 for 1850 in the New England States, and at rather more than half that amount in the central interior States, has increased in both cases to nearly the same amount—upwards of $1,000,000,000. And it will further be observed that 59 per cent of the total cereal produce of the United States is now furnished by the ten interior States north of the Ohio river. Their produce left, in 1870, after fully supplying the local population, a surplus of at least 400,000,000 bushels, or 10,000,000 tons for export, and this surplus may now be estimated as above stated to amount to upwards of 12,000,000 tons. By the light of these figures, it is easy to understand the importance of the question by which the United States is at present so much agitated, as regards the lowering of the through rates, with a view to enabling the produce of the western and northwestern interior States to be sent to market with profit to the producers. They show also the importance of so improving the trunk lines of communication reaching the Atlantic seaboard as to enable them by economical working to transport with profit the vast amount of produce, which, coming from great distances, must be hauled at low mileage rates.

(To be continued.)

Union Ferry Company.

The annual meeting of this company was held on the 17th inst., at the company's offices in the Fulton Ferry Building, and the following Directors elected for the ensuing year: Henry E. Pierrepont, Joseph A. Perry, Abiel A. Low, Henry R. Worthington, Charles E. Bill, James S. T. Stranahan, James A. Degraw, Nathan B. Morse, Cyrus P. Smith, Walter N. Degraw, Horace B. Claflin, James How, Abraham B. Baylis, S. B. Chittenden, and Edward Dodge. The annual report which was submitted shows that the assets of the company, on Nov. 1, were $1,519,120 59, of which $538,000 were in boats, $262,000 in ferry-houses, $165,467 75 were in loans, $349,000 in real estate, and $50,000 in bonds of the City of Brooklyn. The liabilities of the company on the same date were $1,239,181 25, of which the capital stock was $1,000,000; taxes, $28,000; claims in suit, $95,000; and tickets not redeemed, $52,000. The surplus over and above the liabilities of the company is $279,949 34.

Dividends and Interest.

The Northern (N. H.) Railroad company has declared a dividend of $3 50 per share, payable December 1.

The Adams Express Company has declared a dividend of $2 per share, payable on the 7th of December. In addition to the quarterly cash dividend, as above, the company has also declared a twenty per cent scrip dividend. This increases the capital stock from $10,000,000 to $12,000,000.

The coupons of the Pennsylvania Canal Co. and Susquehanna Coal Co., maturing in January next, will be paid on presentation at their office in Philadelphia, from this date, less a rebate at the rate of six per cent.

The five per cent. semi-annual cash dividend of the Pennsylvania Railroad Co., is payable, clear of taxes, at the company's office in Philadelphia on the 30th inst.

The Spring Mountain Coal Company, No. 111 Broadway, has declared a semi-annual dividend of Four per cent., and an extra dividend of One per cent., payable Dec. 10.

For other dividends, and interest payable in November and December, see pages 1479 to 1489, inclusive, this week's issue.

☞ A letter to the Baltimore *Sun* dated Frederick, Md., November 12, 1874, says: "The Frederick and Pennsylvania Line railroad, an enterprise in which this city is interested to the extent of nearly a half million dollars by subscription, will in all probability soon pass by lease into the control of the Pennsylvania Railroad Company. It is understood that the Pennsylvania road has already secured the control of the Hanover and Littlestown and short line roads to York, and it is doubtless the intention, should the proposition to lease the Frederick and Pennsylvania Line be accepted, to extend the road to Washington, D. C., and thus have a direct route of its own from Harrisburg, Philadelphia and New York."

☞ At the annual meeting of the stockholders of the York River Railroad company, held in Richmond, Va., on the 11th inst., all the old officers were re elected. The president reported that the road is fully supplied with the necessary equipments, and a considerable portion of the track has been relaid with the best American iron. The sum of $195,000 has been subscribed by the company to the stock of the Baltimore, Chesapeake and Richmond Steamboat Company, and northern steamboat connections have been secured. The gross earnings of the company were $104,879 12, and the net earnings, $32,532 84.

☞ The Worcester and Shrewsbury Railroad, the first narrow gauge road built in Massachusetts, has carried 115,000 passengers since it was opened, August 1, 1873, and has earned 1,951 over expenses.

☞ Thirteen miles of the Missisquoi and Black Rivers Railroad are now graded. The company hope to get out ties and timber for 25 miles of the road during the winter.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 21, 1874.

Stock Exchange and Money Market.

Money has been fairly active through the week within the range of 2@4 per cent on call, and 5 @7 per cent on the best mercantile credits. At these figures, lenders have been quite prompt in meeting the requirements of the more prominent borrowers. The activity at the Stock and Gold Boards has tended to stimulate the inquiry for accommodation on the part of the leading Street firms. From mercantile sources, the demand has been moderate at the ruling figures. The last weekly statement of the City Banks was more favorable to an easy working of the Money Market. The City banks last week augmented their reserve of legal tender notes $73,400, and enlarged their deposit item $3,240,300, while also increasing their specie average $4,318,400. They also report a reduction of $1,278,600 in the loans and discounts, and of $250,400 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $53,039,697 against $55,067,167, the preceding week; and a coin board of $55,654,220, against $56,246,758, on the previous return. The City bank exchanges, during the week, were $450,809,151, or a daily average of $75,051,525. The customs revenue of the port, during the week, was $1,719,000. The City banks reported their average of gold last week at $16,888,200, and their greenback average at $59,525,100. Their deposits stood at $229,994,200. The loan item was $283,788,100, The circulation was $24,832,500.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $18,914,750.

The aggregate of the outstanding U. S. currency, of all denominations, Nov. 1, was $430,752,687. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is $348,989,341.

The U. S. Treasury balances at the opening of business on Wednesday were as follows: Currency, $16,121,758; special deposit of legal tenders for redemption of certificates of deposit, $54,860,000; coin, including $22 800,900 in coin certificates, $82,500,187.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 40¾ millions.

The Gold movement has been decidedly more animated, and interesting, during the week. The business has been mainly speculative, and the market has shown unusual buoyancy. The extremes of the week have been 110¼@111¼, closing on Wednesday at 110⅞@111, as against 110¼ on Wednesday of the preceding week. The specie outflow last week was only $278,060. The imports of specie at this port since Jan. 1, have been $4,833,618, against $15,718,186 same time last year. The customs demand for Gold last week averaged $286,500 a day. Foreign Exchange has been moderately active, with Bankers' sixty day bills on London closing on Wednesday at $4 85¾@$4 86⅛; sight bills on London at 4 89¾@$4 90⅛ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,365,249.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,092,787.

Sympathizing with the rise in Gold, Government Securities have been in much more confident demand, mainly on investment account, and prices have been quoted higher, closing firmly.

U. S sixes of 1881 closed on Wednesday of this week at 119⅛@119¾; U. S. Five-Twenties of 1862, (ex-Nov. coupon) at 112⅛@113; U. S. Five-Twenties of 1864 (ex-Nov. coupon) at 114 @114⅜; U. S. Five-Twenties of 1865 (ex-Nov. coupon) at 115⅛@115¾; U. S. Five-Twenties of 1865 consolidated, 118@118⅛; U. S. Five-Twenties of 1867, 118¾@118⅞; U. S. Five-Twenties of 1868, 118¼@119; U. S. Ten-forties at 113¾@114⅛; U. S. Fives of 1881, (Funding Loan) 112⅜@112⅛; Six per cent. currency Sixes from 118⅜@118⅞.

At the Stock Exchange, business has been much brisker, at advancing prices. The speculative demand has been more confident, and the operators for higher values have had practical control of the market. A more satisfactory inquiry has been noted for State and Railway bonds, at generally stronger prices. Railway and miscellaneous share property has been more freely dealt

in and quoted higher, though, at the close, somewhat irregular.

General business has been moderately active Domestic produce has been attracting more attention, but prices have been unsettled; Flour, Wheat, Rye, Oats, Cotton, Pork, Lard and Bacon, closing steadier; while Corn, Naval Stores and Petroleum, have shown less firmness. Foreign merchandise has been rather tame, the inquiry for most descriptions having been confined within the limits of urgent wants, at variable prices. The Metal trade has been without much show of activity. Scotch Pig Iron has been in demand in a jobbing way at former rates. American Pig Iron, plenty and weak, on restricted dealings. Of American Iron Rail, 500 tons have been reported sold at $55 per ton, delivered here. Eglinton Pig Iron quoted from yard at $37; Glengarnock, $39@$40; No. 1 American Pig at $26@$28 00; No. 2 do. at $25@$27; Forge, $23@$25; English Rails at $48@$50, gold; American Rails at works, $55@$60; Old Rails, $30. Wrought Scrap, $30@$32. Ocean freights have been decidedly brisker, closing higher. The main demand has been for accommodation for Grain, Petroleum, Cotton, and Provisions.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Connecticut Western Railroad.

At the annual meeting of the stockholders of this company, held at Hartford, Conn., on the 17th inst., the following gentlemen were elected directors: William H. Barnum, Alexander H. Holley, Salisbury; George M. Bartholomew, Charles T. Hillyer, Nathaniel B. Stevens, Timo. M. Allen, William Bolles, Hartford; Byron Loomis, Sheffield; William L. Gilbert and George Dudley, Winsted; Charles Blair, Connellsville; Frederick Watson, Canaan; Joseph Toy, Simsbury.

The company has received a request from the officers of the new Rhinebeck and Connecticut Railroad for a conference next week to arrange connections. The rails on the latter road are now laid through from Rhinebeck to Boston Corners, connecting there with the Harlem Road and the Connecticut Western.

Virginia State Debt.

The conference between the Governor and Treasurer of Virginia and the holders of the bonds of that state was held, as previously announced, at Richmond on the 10th inst. The amount of bonds represented by actual holders or authorized proxies is not definitely ascertained. Mr. Hugh McCulloch, representative of the British bondholders' council, did not claim to have power to do any thing to bind his principals. The Dispatch says:

Governor Kemper read to the conference a long communication. It showed that Governor Walker, in his messages previous to the adoption of the funding bill had misstated the condition and resources of the State and misled bondholders. It also gave his (Governor Kemper's) views of the State's present financial condition, which were not cheering.

The committee appointed to consider Governor Kemper's address on the financial condition of the State reported a resolution, which was adopted, recommending the State "to provide, by appropriate legislation, for permanently setting apart a specific portion of its accruing revenue for the prompt payment of two per cent. interest semi-annually at London, New York, and Baltimore, and the treasury of the State, and the issue of certificates for the unpaid interest, payable at the pleasure of the State at any time within ten years; and if not paid within ten years, then such certificates ought to be fundable in four per cent. bonds; that the State ought to resume payment at full six per cent. interest at the earliest practicable moment."

The Dispatch adds:

It is stated that the agent of responsible English capitalists was in the city with a proposition to fund the entire debt of Virginia in four per cent. bonds, having ten years to run, or in five per cent. bonds, having twenty years to run. It is required that the interest shall be inviolably guaranteed to be paid in London, New York and Richmond.

New Corporations.

Articles of incorporation of the People's Freight Railway company were entered into at Mt. Vernon, Ohio, on the 10th inst. The capital stock is $100,000, to be increased to $15,000,000. The following gentlemen appear as the incorporators: Joseph C. Devin, George Rogers, P. H. Updegraff, Samuel Israel, James Boyd, David Richards, T. R. Head and W. A. Coulter. It is expected to commence the preliminary surveys at once and push them forward rapidly.

The Miami Valley Narrow Gauge Railway company has been incorporated, with a capital stock of $500,000. The line extends from Cincinnati, to Xenia, Ohio. The corporators are Seth S. Haines, Joel Evans, Samuel Irons, Robert H. Bennett, John V. H. Lewis, Ephraim K. Snook and William V. Bone.

Articles of association of the Bedford, Springfield, Owensboro and Bloomfield Railroad, have been filed with the Secretary of State of Indiana. Capital, $1,000,000. The contemplated road is to run from Bedford to Bloomfield, in that State, thirty miles.

☞ The following gentlemen have been elected directors of the Third Avenue Railroad Company: Thurlow Weed, Henry Hart, William Remsen, Maltby G. Lane, Robert G. Remsen, Charles Miller, W. H. Falconer, Robert J. Randolph, Jonathan W. Allen, Samuel Hall, James McKenna, Stephen Putnam, and Wm. J. Davidson. The following inspectors were elected: Richard H. Lane, Michael Emanuel, Wm. W. Falconer.

Vermont Central Railroad.

A meeting of the holders of the first mortgage bonds of the Vermont Central Railroad was held in Boston on the 7th inst., to concert measures for securing the payment of bonds and interest. It was stated that the first mortgage bondholders were in a most disastrous situation. The default in the payment of the bonds and interest had continued since 1864. In 1867 the liabilities which had precedence to the first mortgage bonds were $3,500,000. Between 1867 and 1872 receivers had increased the liabilities which were regarded by them as having prior claim to the first mortgage bonds to the sum o about $7,000,000. The first mortgage bondholders now propose to obtain foreclosure of this mortgage, which can only be done by applying to the Legislature of Vermon for an act of incorporation, and the bondholders having obtained it to act before the foreclosure This plan had earnest opponents in the meeting and the discussion was lengthy. Messrs. Griswold, Dwight, and Brooks were appointed in pursuance of the following resolution which was passed as the sense of the meeting.

Resolved, That a committee of three of the first mortgage bondholders of the Vermont Central Railroad be appointed to represent their interests in the bill for incorporating said bondholders, now pending in the Legislature of Vermont, and to do what they can in aid of the passage of said bill.

The Coal Trade.

The total of anthracite marketed for the week ending on the 7th instant amounted to, 443,178 tons, and for the coal year 16,358,541 tons, against 17,209,502 tons to corresponding time last year, being a decrease of 850,961 tons. The bituminous tonnage for the week is 72,394 tons, and for the year 2,887,534 tons, against 2,876,675 tons to same time last year, giving a total of all kinds for the week of 515,572 tons, and for the year of 19,248,075 tons, against 20,086,177 tons to the same time last year, being a decrease of 838,102 tons The Philadelphia *Ledger*, from which the above is taken, adds:

The tonnage for the first week of the present month is off a little from that of the previous week, and the probability is that it will weekly lessen to the end of the coal year, which for several of the large coal carrying companies will be the 30th of the present month. The supply of coal at the principal coal centres is quite full, so full, in fact, that the companies in the combination have agreed to reduce production for the month of November 25 per cent, notwithstanding the trade during part of the last month was checked by a short supply of water at the mines. The present prices of coal for the wholesale trade will undergo no further change this year. The retail trade will of course be governed by the market, and should the winter prove a severe one, as many seem to anticipate, higher prices may be exacted, but there is no probability of coal for domestic uses being lower before next spring. All the indications now favor the conclusion that the trade of 1875 will be run on much the same principles of management as it has been run during the present year of 1874.

☞ The citizens of Keene (N. H.) have voted, 884 to 280, to raise by loan a sum equal to three per cent of the last valuation of the town, amounting to about $130,000, as a gratuity to the Keene and Manchester Railroad. If the City Council accept the above vote and appropriate the money, and it is believed they will, the building of the road is secured.

Oil Creek and Allegheny River Railroad.

A meeting of the holders of the consolidated bonds of this company was held in Philadelphia on the 12th inst. The committee appointed at a previous meeting presented a report, stating that they are satisfied that there are no present or prospective receipts that can be applied to the overdue coupons on the bonds. Under these circumstances they recommend to the bondholders to take action according to the terms of the mortgage, and request the trustees to foreclose the same and sell the mortgage premises; and they submit a form of request for the signature of the bondholders.

The report also submits a form of agreement in respect to the purchase of the property and the organization of a new corporation. The report is signed by Messrs. C. D'Invilliers, Chairman, John W. Moffley, J. R. Ritter, Wm. M. Caster and Thos. H. Dudley. The report was unanimously adopted.

Mr. Thomas H. Dudley then moved that a special committee be appointed to supervise the foreclosure and purchase of the property in the interest of the bondholders. Agreed to. The following gentlemen were appointed the committee:

Messrs. C. D'Invilliers, John W. Moffley, J. R. Ritter, Wm. M. Caster, Thos. H. Dudley, E. V. Maitland and Joseph C. Herr.

Railroad Earnings.

The earnings of the International and Great Northern Railroad for the month of October 1874, were $147,797, against $81,762 14 in October, 1873, an increase of $66,034 86.

The earnings of the Denver and Rio Grande Railway for the week ending October 31, 1874, were $11,983 58, against $9,800 23 same week in 1873, an increase of $62,183 35, or 22.2 per cent.

The earnings of the Toledo, Wabash and Western Railway for the first week in November, 1874, were $102,479 96, against $95,212 54 in the corresponding week of 1873, an increase of $7,267 42.

For other earnings, as far as reported, see page 1478 this week's issue.

Liabilities of Contractors.

RAILROAD COMPANIES NOT RESPONSIBLE FOR INJURIES CAUSED BY BLASTING DONE BY THEIR SUBCONTRACTORS.

In the case of McCafferty against the Spuyten Duyvil and Port Morris Railroad Company, to recover damages for injuries sustained by the plaintiff through the carelessness with which blasting had been done by a subcontractor of the company, an important decision has been rendered by the Court of Appeals. On the trial at circuit the company was held not liable, and the complaint dismissed, but on appeal to the General Term the decision of the court at Circuit was reversed. From this latter decision an appeal was taken to the Court of Appeals, and there argued at length by Mr. Elliott F. Shepard on the part of the appellant, and Messrs. William Barney and C. C. & S. F. Prentiss on behalf of the respondent. The decision on this appeal, as rendered by Hon. Robert Earl, one of the Commissioners of Appeal, on behalf of the court, is in full as follows:

The defendant had the right to build its road in the place where it was located, and hence was not engaged in an unlawful enterprise. It let the contract to build the entire road to one Decker,

and it seems that he subcontracted the whole or a portion of the work, and the blasting complained of was done by men employed by the subcontractor. Over these men the defendant had no control. It neither hired nor paid them, and could not control, direct, nor discharge them. Hence the rule of *respondeat superior* applies; and the principal for whom the men were working, and by whom they were employed, and not the defendant, is liable for the damage done to the plaintiff. There has been difficulty in the application of this rule, growing out of the fact that it is not always easy to determine whose servant the person committing the wrong is. There is no such difficulty in this case. Every man is answerable for acts done by the negligence of those whom the law denominates his servants, because such servants represent the master himself, and their acts stand upon the same footing as his own. In Hobbit *vs.* London, &c., 4 Exch., 255, Rolfe, B., says: "The liability of any one other than the party actually guilty of any wrongful act proceeds on the maxim *qui facit per alium facit per se*. The party employing has the selection of the party employed, and it is reasonable that he who has made choice of an unskillful or careless person to execute his orders should be responsible for any injury resulting from the want of skill or want of care of the person employed; but neither the principle of the rule nor the rule itself can apply to a case where the party sought to be charged does not stand in the character of employer to the party by whose negligent act the injury has been occasioned."

This is not a case where defendant contracted for work to be done which would necessarily produce the injuries complained of. They were caused by the negligent and unskillful manner in which the blasts were conducted. The injuries were not occasioned in consequence of the omission of any duty which was incumbent on the defendant. It had let the contract, so far as appears, to a competent person, and had provided in the contract that he should be responsible for any damage occasioned by blasting. The defendant did not authorize or permit a nuisance upon its premises. If it had it would have been liable for any damage occasioned by the nuisance. Hence if the defendant can be held liable in this case it must be upon the naked ground that it is responsible for the careless acts of the subcontractor's servants over whom it had no control. There is no authority in this State for imposing such a liability under such a state of facts. In Pack *vs.* The Mayor, &c., of New York, 8 New York, 222, the defendant had let a contract to one Foster to level and regulate Bloomingdale road, in the City of New York, and Foster had subcontracted with one Riley to do all the blasting of rocks upon the job, and Riley, while engaged in blasting, threw rocks into the plaintiff's house, doing damage for which the action was brought. It was held that defendants were not liable, that Riley was not their servant, and hence that they were not, under the rule of *respondeat superior*, responsible for his acts. This case was approved and followed in Kelley *vs.* The Mayor, &c, of New York, 11 N. Y., 432. In the latter case the defendants had let the contract of grading a street in the City of New York to one Quinn; and his servants, in blasting rocks in the street, caused a stone to be thrown against plaintiff's house, and for the injury thus caused the plaintiff sued. It was held that the defendant was not responsible for the negligence of Quinn's servant. It is impossible to distinguish these cases from the one now before us. They have never, so far as I can discover, been questioned. In Storrs *vs.* the City of Utica, 17 N. Y., 104, while Judge Comstock criticized the case of Blake *vs.* Ferris, 5 N. Y. 748, he expressly approved these two cases. In the case of Storrs *vs.* the City of Utica, the defendant was held liable because it owed a duty to the public to keep its streets in a safe condition for travel, and not because it was responsible for any negligent act of the contractor. In Water Company *vs.* Ware, 16 Wallace, 566, the defendant had taken a contract to lay water pipes along the streets of the City of St. Paul and then subcontracted the work, and the subcontractor, by his carelessness, caused the injury sued for. The defendant was held liable because he had agreed in his contract with the city to be responsible for all such damages. Judge Clifford lays down the following rules as applicable to such cases: "When the obstruction or defect caused or created in the street is purely collateral to the work contracted to be done, and is entirely the result of the wrongful acts of the contractor or his workmen, the rule is that the employer is not liable; but when the obstruction or defect which occasioned the injury results directly from the acts which the contractor agreed and was authorized to do, the person who employs the contractor and authorizes him to do these acts is equally liable to the injured party." In this case the injury complained of did not result directly from anything which the contractor was bound by his contract to do, but from the careless and wrongful acts of the men engaged in the blasting. If the blasting had been properly done the plaintiff would have suffered no damage.

In Butler *vs.* Hunter, 7 Hurl. and N. 826, the plaintiff and defendant were owners of adjoining ancient houses, and an architect employed by the defendant to superintend the repairs of his house, having considered it necessary to pull down and rebuild the front wall, agreed with a contractor to do the work for an estimated price, and the workmen of the contractor, in pulling down the wall, removed a bad sewer which was inserted in the party wall between defendant's and plaintiff's house without taking any precaution by shoring or otherwise, in consequence of which the front wall of the plaintiff's house fell; and it was held that there was no evidence for the jury of any liability on the part of the defendant. Pollock, C. B. said "No doubt when the act is in itself a nuisance the party who employed another to do it is responsible for all the consequences for then the maxim *qui facit per alium facit per se* applies. But where the mischief arises not from the act itself, but from the improper mode in which it is done, the person who ordered it is not responsible unless the relation of master and servant exists." In Rodie *vs.* the London, &c., 4 Exch. 244, a company empowered by act of Parliament to construct a railway, contracted under such act, with certain persons to make a portion of the line, and by the contract reserved to themselves the power of dismissing any of the contractor's men for incompetence. The workmen, in constructing a bridge over a public highway, negligently caused the death of a person passing beneath, along the highway, by allowing a stone to fall upon him; and it was held that the company was not liable, and that the terms of the contract did not make any difference. Rolfe, B., said: "The wrongful act here could not in any possible sense be treated as a nuisance. It was a simple act of negligence, and in such a case there is no principle for making any distinction by reason of negligence having arisen in reference to real and not to personal property." During the argument of the case Platt, B., put the following question to counsel: "Suppose the occupier of a house were to direct a bricklayer to make certain repairs to it, and one of his workmen through his clumsiness was to let a brick fall upon a passer-by, is the owner liable?" The decision of the case answers this case in the negative. In Allen *vs.* Willard, 57 Penn., 374, Agnew J. said: "The principle extracted from the cases is said to be that a person, natural or artificial, is not liable for the acts or negligence of another, unless the relation of master and servant or principal and agent exist between them, and that when an injury is done by a person exercising an independent employment, the party employing him is not responsible to the person injured. This doctrine, it must be noticed, has regard to cases where the purpose of the contract is entirely lawful, and where the owner of the property upon which the contract is to be executed can lawfully commit its performance to others." The case of Hayes *vs.* The Cohoes Company, 2 Com., 159, is not an authority, and has never been regarded as an authority upon the questions involved in this case. It was there assumed that the persons who caused the injuries complained of were the agents and servants of the defendants, and the only question considered in the Court of Appeals was whether the defendants could be made liable without the proof of negligence. A further reference to authorities cannot be useful. They are not uniform and free from confusion. It has not always been easy to determine whether the relation was that of master and servant, or that of contractor and contractee, and some difficulties have been occasioned by attempts to establish a distinction between the owner of real and of personal property, and to hold the former to a stricter liability than the latter by making them responsible for the negligent use and management of their real estate, and negligent conduct upon it by contractors and their agents. But this distinction has been quite thoroughly repudiated, as is shown by the case above cited, and also by Shearman and Redfield on Negligence, 95, and cases cited in note.

I am therefore of opinion that the disposition of this case at the Circuit was the proper one, and that the order of the General Term must be reversed and judgment at the Circuit dismissing the complaint affirmed, with costs.

☞ The earnings of the Indianapolis, Cincinnati and Lafayette Railroad in September, 1874, were $175,833, the expenses $87,188, and the net earnings $88,645. In September, 1873, the earnings were $206,368, the expenses $119,128, and the net earnings $87,240—showing a decrease in earnings of $30,485, with a decrease in expenses of $31,940, making an increase in net earnings of

American Railroad Journal.

New York, Saturday, November 28, 1874.

The Proposed New Railroad Route from Boston to the West.

The project of a new and direct railroad route from Boston to the West is attracting the attention of business men of that city. The proposed line involves the construction of only eighteen miles of new road, together with the bridging of the Hudson River at Poughkeepsie, and then there is a direct route afforded from Boston to all points in Pennsylvania, the great South, and the still greater West and Southwest. From Boston the route is over the New York and New England Railroad to Willimantic; thence to Hartford over the Hartford, Providence and Fishkill Railroad, and from Hartford to Poughkeepsie via the Connecticut Western and Poughkeepsie and Eastern Railroads. Here a bridge is to be built over the Hudson—the charter for which already exists—and then the construction of eighteen miles of road over a level country to a place known as Pine Bush, and the new line by the Pennsylvania route is realized. The cost of the new road to be constructed will be about $500,000 and the time occupied will be about six months. Work, it is understood, will be commenced at once, and if the road is finished before the bridge the trains will be taken across the Hudson at Poughkeepsie by means of large boats, the same as those on which the Boston and New York Shore line trains are carried across the Thames River at New London. The new route will be through the very heart of the manufacturing districts of Massachusetts, Rhode Island, Connecticut and Eastern New York, and they will be put in direct and short communication with the coal fields of Pennsylvania and all the other points reached by the roads managed by the Pennsylvania combination. It is proposed to run through express trains between Boston, Philadelphia, Pittsburg, Cincinnati and Washington, thus saving to Eastern passengers 100 miles in distance and the delay and expense of transfer now necessary at New York and Jersey City.

International Railway Congress.

The Swiss Government recently presented notes at London, Berlin, Paris, St. Petersburg, Vienna, and Rome, proposing to convoke an international congress of all railway administrations in Europe. The following four points are, as it is stated, proposed for deliberation:

1. The limits of the responsibility of the company which originally receives goods for a distant destination and that of the companies which transport the goods afterward.

2. What is to be considered a competent tribunal in case of disputes between the diverse interests?

3. The establishment of a uniform procedure to ascertain the damages caused to goods during the time that they are in the keeping of the railway companies.

4. The acceptance, as a general rule, that the company which finally delivers the goods shall be responsible to the receiver, receiving of course, its rights as against the companies which preceded it in the carrying.

The Union and Central Pacific Railroad Land Grants Confirmed.

In 1869 a "commission of five eminent citizens" were appointed to examine into the condition of the Union and Central Pacific railroads, who reported that about two million dollars would be necessary to supply deficiencies of both roads. Secretary Cox at that time directed the Commissioner of the General Land Office to withhold from them one half of the land grant as security for the supply of deficiencies of the road. The reports of the Commissioners who recently examined the roads say the Union Pacific has since that period expended two million two hundred and fifteen thousand dollars, and the Central Pacific expended five million five hundred thousand dollars in excess of the sum first named. The deficiencies having been supplied and the roads considered as complete, the reports were submitted by the Secretary of the Interior to the President, who, on recommendation of the Secretary, has directed a revocation of the order of Secretary Cox withholding patents for half the lands, which will therefore be released to those companies.

Baltimore and Ohio Railroad.
FORTY-EIGHTH ANNUAL REPORT.

The annual report for the fiscal year ended September 30, 1874, shows the revenues of the main stem, including the Winchester and Potomac, Winchester and Strasburg, the Strasburg and Harrisonburg, the Washington County and the Metropolitan roads have been.... $11,693,955 55

Of the Washington Branch	873,823 81
Of the Parkersburg Branch	802,066 53
Of the Central Ohio Division	1,004,356 13
Of the Lake Erie Division	787,168 18
Of the Chicago Division	64,053 08
Of the Wheeling, Pittsburg and Baltimore (formerly the Hempfield Railroad)	49,888 96
Of the Newark, Somerset & Straitsville Railroad	172,278 68
Total	$14,947,090 42

Showing a decrease compared with 1873 of $746,108 04; showing an increase compared with 1872 of $1,320,418 11; showing an increase compared with 1871 of $2,389,561; showing an increase compared with 1870 of $4,106,719 94.

I.—OF THE MAIN STEM.

The expenses of working and keeping the roads and machinery in repair amounted to $6,675,895 26, being 57.08 per cent upon the earnings, showing a decrease of 2.64 per cent compared with the previous year. The following analytic statement is given in order to furnish particulars of the expenses in comparison with the two preceding years:

MAIN STEM.

Statement of the earnings and working expenses for the fiscal years 1872, 1873 and 1874, including the Winchester and Potomac, Winchester and Strasburg, the Strasburg and Harrisonburg, the Washington County and the Metropolitan Branch roads:

	1872.	1873.	1874.
Earnings	$10,651,471 62	$12,252,843 78	$11,693,955 55
Expenses:			
General expenses	$89,617 73	$104,130 33	$122,742 22
Losses by accidents, &c	63,151 21	63,445 63	55,374 33
Expenses transportation	1,948,247 86	2 380,864 24	2,291.900 77
Repairs railway	1,679,739 10	1,974,403 14	1,640,225 58
Repairs of water stations	51,127 95	65,533 86	34,974 99
Repairs & construction of depots	103,342 22	138,738 36	140,759 75
Repairs bridges	175,203 71	259,953 89	245,822 24
Repairs tel. lines	15,429 22	29,772 67	28,913 13
Repairs stationary machinery	198,429 68	212,281 78	155,720 12
Watching cuts	47,951 32	50,412 80	57,654 37
Watching tunnels	4,111 80	4,528 00	6,434 25
Watching bridges	12,392 50	14,485 90	23,257 57
Pumping water	27,175 96	31,360 78	32,951 58
Repairs locomotives	662,427 26	659,091 63	598,384 30
Repairs pas. cars	117 598 56	141 641 50	167,391 26
Repairs burden cars	433,315 33	598,688 96	542,199 58
Cleaning engine & cars	108,504 41	131,984 47	131,674 30
Contingent expense machinery dep't	8,063 85	8,168 37	8,282 45
Fuel	321,536 30	391,139 01	423,119 15
Preparing fuel and filling tenders	41,720 96	57,422 47	58,015 36
	$6,122,399 93	$7,318,047 79	$6,675,896 26
Earnings more than expenses	$4,582,071 69	$4,934,795 99	$5,018,060 29
Working expenses.	57.46 per ct.	59.72 per ct.	57.08 per ct.

It is shown that the earnings, in comparison with the fiscal year 1873, have decreased $558 888 28, and the working expenses $642,152 53, making a comparative increase in the net profits of $88,264 30. Compared with the fiscal year 1872, the increase of earnings being $1,039,483 93, and of working expenses $553,495 38, the increase of net profits amounts to $485,988 60.

During the fiscal year the sinking fund for the redemption of the city loan increased to $1,647 753 20, showing a gain of $108,900.

Under the action of the sinking fund for the redemption of the sterling loan of 1895, £71,600 of bonds have been purchased in London; thus, at $4 84 per pound sterling, reducing the debt $346,544, and showing a gain during the fiscal year of £19,600, equivalent at $4 84 per pound sterling to $94,864.

In accordance with the principles on which the sinking fund for the redemption of the sterling loan, which matures in 1902, is established, the sum invested amounts to £63,200, which, at $4 84 per pound sterling, reduces this debt $305,888, £24,000 per annum are appropriated for this sinking fund, which, with the interest accruing from its accumulations, will, it is expected, redeem and cancel these bonds prior to their maturity.

In order to press its varied and important works rapidly to completion, the company determined to effect a further loan in Europe. In January last £2,000,000 six per cent bonds, which will mature in 1910, were negotiated on very satisfactory terms by Messrs. J. S. Morgan & Co., in London.

The financial strength and conservative policy of the company, so constantly and firmly maintained, again attracted the attention of European capitalists to such an extent that the subscriptions for the loan enormously exceeded the amount to which the company had decided to limit it.

In the midst of the general depression, it will be satisfactory to the shareholders in the Baltimore and Ohio Company to see the bonds on their line so appreciated that they rank at the highest grade of American railway securities in Europe.

An accumulative sinking fund of £18,000 per annum will be applied half-yearly in the months of November and May, to purchasing the bonds of the loan due in 1910 at the market price, if not above par. Otherwise the amount will be invested in securities for account of the sinking fund, which can only be applied in the redemption of the e bonds. It is expected that this appropriation from the revenue annually, with the interest accruing thereon, will liquidate the entire loan prior to its maturity.

The surplus fund of the company, 30th September, 1874, is $32,144,160 15. The entire mortgage indebtedness (including the loan made in January last, of £2,000,000 in currency and sterling,) is $29,061,564 80. It is thus shown that the surplus fund, representing capital derived from net earnings invested in its branch and connecting roads and in the great improvements that have been continuously constructed on the main stem, which is not represented by either stock or bonds exceeds the entire mortgage indebtedness of the company $3,082,595 35.

Semi-annual dividends of five per cent upon the capital stock were paid on the 15th of November, 1873, and on the 1st of May, 1874, respectively.

The liabilities of the company, compared with the statement of September 30th, 1873, show the following reductions, viz:

By payment in advance on account of loan which will mature in 1875	$17,000 00
By payment in advance on account of loan which will mature in 1885	500 00
	$17,500 00

The liabilities also show the following increase, viz:

Preferred stock second series, 6 per cent	$95,500 00
Sterling loan, redeemable in 1910, £2,000,000, at $4 84, gold	9,680,000 00
	$9,775,500 00

The profit and loss account shows an increase for the past year of $3,111,028 97.

It will be seen by this account that the surplus fund, which represents invested capital derived from net earnings which is not represented by stock or bonds, now amounts to $32,144,160 15.

It is shown by the report of the transportation department that there has been a large expansion of tonnage of through merchandise East and West, viz: from 640,265 tons in the preceding year to 752,256 tons. For 1872 this traffic was 557,609 tons, and for 1871, 435,207 tons. 1,000,778 barrels of flour, and 9,668,361 bushels of grain were brought to Baltimore during the fiscal year, showing an increase of 60,151 barrels of flour and 2,157,704 bushels of grain.

The traffic in live stock exhibits an increase of 1,612 tons over 1873, and of 16,641 t ns over 1872.

The coal trade shows an aggregate of 2,209,762 tons, which includes 431,184 tons for the company's supply. The quantity transported for the public is 1,778,628 tons, showing a decrease compared with 1873 of 241,000 tons, and an increase compared with 1872 of 117,869 tons.

The effects of the financial panic, which commenced in October, 1873, continued to be severely felt throughout the year. The depression in manufacturing industries and the business of steamships materially decreased the demand for coal. The reduction in the quantity of coal transported caused exclusively the decrease in the gross earnings. Notwithstanding the general restriction of business throughout the country, tonnage in all branches of trade increased, with the exception of coal; and, although the strong competition for the limited business to be obtained caused freight to be transported at unusually low rates, the increased traffic secured by the company enabled it, with the exception stated, to maintain its revenues.

During the year 660 iron hopper and gondola cars, of eleven tons capacity each, have been added to the equipment.

II.—OF THE WASHINGTON BRANCH.

The financial condition of the Washington Branch is shown by the statements of the treasurer, D, E and F. It will be seen by statement E that the earnings were $378,823 61, showing a decrease of $67,459 23, compared with the previous year, and a decrease of $107,321 73, compared with 1872.

The expenditures charged amount to $126,034 36, being for improvements and for repairs of railway, depots, water stations and bridges, and for pumping water.

During the year 640 tons of steel were substituted for iron rails, and 28,055 cross-ties were used.

As stated in former reports, the system was adopted by which the earnings are equitably divided upon a basis requiring all the expenses connected with transportation, the repair and use of machinery, and of the shops and stations of the company in Baltimore to be paid by the main stem, the expenses of the road department alone being charged to this road.

The partial expenditures charged, deducted from the revenue stated, make the sum of $247,288 95, showing a decrease of net earnings compared with the preceding year of $36,724 97.

A dividend of five per cent was paid on the 31st of October, 1873, for the half year terminated September 30, 1873, and on the 17th of April, 1874, a similar dividend for the term ended March 31, 1874.

III.—OF THE PARKERSBURG BRANCH RAILROAD COMPANY.

Statement G of the treasurer shows that the earnings of this road for the fiscal year were $802,066 53, and the working expenses $942,252 59. The earnings were $145,662 76 less than in the previous year, while the expenses increased $110,591, showing a comparative net result of $256,253 76 less than in 1873.

The low rates for transportation of the large through business done upon this road, combined with the necessity for heavy expenditures for the improvement of the line, (among which was the use of 2,496 tons of steel rails,) have resulted in a large loss on the business of the year.

GENERAL REMARKS.

The aggregate earnings, working expenses and net results of the Main Stem and Branches were:

	Earnings.	Expenses.	Net Earn'gs.
*Main Stem	$11,693,955 55	$6,675,895 26	$5,018,060 29
Washington Br.	373,323 31	126,034 36	247,288 95
Parkersburg Br.	802,066 53	942,252 08	.....
Central Ohio Div.	1,004,356 13	843,049 77	161,306 36
Lake Erie Division	787,168 18	674,066 63	163,104 50
Chicago Division	64,053 08	36,857 09	27,195 99
Wheeling, Pittsb'rg & Baltimore R.R.	49,888 96	48,547 61	1,341 35
Newark, Somerset & Straitsville R.R.	172,278 68	119,946 37	52,332 31
	$14,947,090 42	$9,416,650 67	$5,670,626 29
Deficit on the Parkersburg Branch Railroad	.....	.....	140,186 45
			$5,530,439 75

* Including the Winchester and Potomac, Winchester and Strasburg, Strasburg and Harrisonburg, Washington County and the Metropolitan roads.

The aggregate working expenses of the main stem with all branches and divisions are 62.99 per cent. of the whole gross revenues, being 1.63 per cent, less than the preceding year.

During the year 363,221 new cross-ties, 1,798 tons of iron, and 7,946 tons of steel rails were used for repairs and the construction of additional tracks on the main stem.

During the year 36 engines, 11 palace and passenger cars and 1,026 cars for general tonnage were purchased and built at the company's works. The cost of this new and additional equipment, $1,067,671 40, has been charged to rolling power.

It is shown by the particulars furnished in the report of the master of machinery that the equipment upon the main stem and branches consists of 549 locomotives, 318 passenger and baggage cars and 11,869 house, stock and other cars.

It will be seen that 7,946 tons of steel rails have been used during the past year upon the main stem; 514 miles of track are now laid with this durable and safe material. Contracts have been made for seven thousand tons to be laid during the next year.

The greatly increased cost of the large quantity of steel thus used in substitution for iron rails, has been charged to the repair account.

The economy and advantage of the substitution of steel for iron rails so generally upon the line are shown by the important reduction as stated by the road department in the cost of the "repairs of railway," of $434,184 56.

The expectation of increased traffic, especially

in connection with the opening of the line to Chicago, made it judicious to enlarge the facilities in all the working departments. During the year seven miles of additional track have been laid in the yards and stations of the company, and work upon the second, third and fourth tracks has been steadily prosecuted. Twenty-four miles of second, third and fourth tracks have been laid during the year, costing $686,020 73.

The working capacity of the new elevator at Locust Point is a million five hundred thousand bushels. This fine structure is believed to be better adapted for its purposes than any elevator heretofore erected in this country. The main building is 324 feet 10 inches long, by 96 feet 10 inches; and is 168 feet 10 inches high. The stack is 175 feet high and 29 feet square at the base. There are 16 receiving and 8 shipping elevators and 211 storage bins. It is so located that it has ample dock room, with deep water on its front and on each side. It has cost $717,953 76.

THE MARIETTA AND CINCINNATI RAILROAD COMPANY.

The Construction of the Baltimore Short Line.

In order to complete the Baltimore Short Line during the present season the work was pressed with vigor, and large expenditures were required to construct it as a first-class road, with iron bridges, substantial masonry, and stone and gravel ballast.

It became necessary to secure the prompt construction of this valuable work for the Baltimore and Ohio Company to advance the cost, viz: $1,500,000.

The distance between Baltimore and Cincinnati and Washington and Cincinnati will in consequence of this action, on November 15th next, be reduced more than ten miles by the use of this improvement, and thus also the only objectionable portion of the Marietta and Cincinnati road, viz: between Belpre and Warren's, will be avoided. Additional cars, more extensive depot grounds and freight houses at Cincinnati have been acquired by the Marietta and Cincinnati Company, and large expenditures made in permanently improving their line by arching tunnels, perfecting the ballasting and reducing grades.

The importance of these improvements to the Baltimore and Ohio Company, in connection with its through traffic to the West and Southwest, made it proper to continue to extend during the year, to a greater degree than heretofore, financial aid to the Marietta and Cincinnati Company. It is hoped that the economy in operating the line which will doubtless be effected by the additional facilities which have been secured will enable that company to largely increase its net earnings, and from the sale of securities at improved prices repay these large advances.

WASHINGTON CITY, VIRGINIA MIDLAND AND GREAT SOUTHERN, AND THE PITTSBURG, WASHINGTON AND BALTIMORE RAILROAD COMPANIES.

It has been necessary to continue to aid the Washington City, Virginia Midland and Great Southern and the Pittsburg, Washington and Baltimore railroads. The great importance of these lines to the trade of Baltimore and to the perfection of its system of railways has induced this continued liberality. It is hoped that the ultimate benefits to be derived from these works will justify the assistance extended.

THE BALTIMORE, PITTSBURG AND CHICAGO RAILROAD.

The work upon the extension to Chicago has been prosecuted with extraordinary vigor and rapidity and it is expected that the entire road will be opened for traffic in November next.

The object of the construction of this road has been to furnish for Chicago and the Northwest the most economical and an independent line, without division of interest, and under one control to Baltimore, as a port to compete with New York. It is believed that Baltimore will prove their most advantageous Eastern entrepot for commercial interchanges with many cities upon the Atlantic coast, with the West Indies and South America, and with the ports of Europe. No cost has therefore been spared to make this road strictly first-class and affective. It has been substantially constructed upon the most direct line, and with the lowest grades so as to insure the largest practical economies in working. The road, from the point of divergence on the Lake Erie division (98 miles north of Newark, Ohio,) to the southern point of Lake Michigan, varies but 2 6 10 miles from an air line. From Chicago Junction to Baltimore Junction, within two miles of the city limits of Chicago, is 260 miles.

On this line the total length of tangents is 246 miles, and but 14 miles of curvature—the latter being not more than one degree or a minimum radius of 5,730 feet.

On the entire line the length of grades ascending west is 83 miles; ascending east 97 miles; 80 miles being level.

Of the ascents 44 miles are five and less feet per mile; 34 miles are between five and ten feet per mile; 32 miles, ten to fifteen; 42 miles, fifteen to twenty; 17 miles, twenty to twenty-five, and but 11 miles twenty-six feet per mile.

The total ascent westward is 1,034 feet; eastward, 1,273 feet. All its bridges have been built of iron, and placed upon massive and durable masonry, and arranged for double track. The rails used have been steel and iron, weighing 64 pounds to the yard—the iron being chiefly manufactured by the Baltimore and Ohio Company at its rolling mill at Cumberland, and of its standard superior quality. Three thousand ties have been used to the mile, and the bed of the road has been thoroughly ballasted with gravel of excellent quality, selected at different points upon the line.

The road has been built without placing any mortgage upon it, all payments having been made in cash for labor and materials. In consequence of the depression in business and the cessation of the construction of railways generally, the materials needed and the labor required were obtained upon such satisfactory terms that the work has been constructed at an expenditure conspicuously less than the capital represented by any of the lines with which it will compete. The remarkable physical advantages of this line, compared with competing routes, are palpable.

The line traverses the region which lies between the Lake Shore and the Michigan Southern railroads on the north, and the Pittsburg, Fort Wayne and Chicago railroad on the south. It passes through the towns of Republic, Tiffin, Bascom, Fostoria, Bairdstown, New Baltimore, Deshler, Holgate, Defiance, Hicksville, Auburn, Avilla, Albion, Cromwell's, Syracuse, Milford, Bremen, Walkerton, and Union Mills. It intersects the system North and South lines leading to ports upon Lakes Erie and Michigan.

At Tiffin it connects with the Cincinnati, Sandusky and Cleveland, and the Mansfield, Coldwater and Lake Michigan railroad; at Fostoria, with the Lake Erie and Louisville road; at Deshler, with the Cincinnati, Hamilton and Dayton road; at Defiance, with the Ohio State canal, and the Toledo, Wabash and Western railway, which penetrates Southern Illinois, and extends into Missouri and Kansas, operating in all over 1,200 miles of road.

In connection with the Toledo, Wabash and Western railroad at Defiance, the distance from Toledo to Chicago is thirteen miles shorter, and in connection with the Cincinnati, Sandusky and Cleveland railroad at Tiffin, the distance from Sandusky to Chicago is fourteen miles less than from those cities respectively by the Lake Shore and Michigan Southern railway, or any other line now in operation.

At Defiance the line is fifty miles from the Lake Shore and Michigan Southern railway at Toledo, and forty-four miles from the Pittsburg, Fort Wayne and Chicago railroad at Fort Wayne.

At Auburn, Indiana, the road connects with the Detroit, Eel River and Illinois and the Fort Wayne, Jackson and Saginaw railways, and at Avilla with the Grand Rapids and Indiana railroad, the two latter extending into the great pineries of Michigan. It, at Milford, connects with the Cincinnati, Wabash and Michigan railroad, at Walkerton with the Indianapolis, Peru and Chicago railroad, extending to Michigan City. The road also crosses the Peninsular railroad, Louisville, New Albany and Chicago railroad, the Michigan Central railway, and the Lake Shore and Michigan Southern railway.

At Chicago the company has secured, by an agreement with the Illinois Central Railroad Company, ample, convenient and central grounds for its freight and passenger business, and satisfactory access to the great stock and lumber yards, elevators and packing establishments, as well as extensive dock facilities.

The expenditures upon the Baltimore, Pittsburg and Chicago railroad up to the close of the fiscal year amounted to $6,857,893 48.

There continues to be much anxiety for the construction of the line between Pittsburg and Chicago junction by which that city and the intermediate region would command a great competing line to Chicago and the Northwest. It is probable that at no distant day this valuable link will be constructed.

THE CHESAPEAKE AND DELAWARE SHIP CANAL.

Much public interest has recently been manifested in regard to the construction of a first-class ship canal through the narrow peninsula which divides the Chesapeake and Delaware bays. The construction of such a canal will reduce the distance between Baltimore and New York, and the ports of New England and all European ports nearly two hundred miles for steamships and all large vessels. As Baltimore has become the entrepot of vast business from the South and from the great West, the economies of transportation which can be effected by this important reduction of distance will enure so largely to the interests of the consumers and producers of immense regions that the enterprise is palpably of national importance.

In addition to the numerous connections of the Baltimore and Ohio road in the South, the Southwest, and the West, the early opening of the independent and most advantageous line through the States of Ohio, Indiana, and Illinois to Chicago will cause the Northwest also to be greatly interested in this improvement.

Besides the great advantages to the commerce of such extensive portions of the country, the proposed canal would prove of inestimable naval and military value in case of foreign war.

The ability to interchange and concentrate vessels of war between the Delaware and Chesapeake bays and the Potomac river, without exposure to the dangers of the seas, and of the navigation of the coast and to the attacks of foreign fleets upon the Atlantic, could not fail to add, at a relatively limited cost, vastly to the strength and resources of the nation.

At the meeting of the National Commercial Convention, held in Baltimore in September, 1871, after an interesting discussion of this subject, that body unanimously adopted the following resolution:

"*Resolved*, That Congress be memorialized to direct a survey to be made between the Chesapeake and Delaware bays for the proposed improvement, and if found to be practicable, desirable, and valuable to the great interests of the country, that the said ship canal shall be constructed."

In view of the comparatively small cost of this work, and the varied and immense advantages which will flow from it, it is hoped that the representatives of the numerous States which will be so advantageously affected by its construction will press the subject earnestly upon the attention of Congress, and that those efforts will be continued until this important improvement shall be accomplished.

The successful management of the business of the company requires the expression by the board of their appreciation of the faithful and efficient services of the officers and employees in all the departments of the service.

By order of the board,

JOHN W. GARRETT, President.

Erie Railway.

CAPTAIN TYLER'S REPORT.

(Continued from page 1477.)

Looking immediately to the condition of the competing lines running, as above described, through the only available passes of the Allegheny range, the New York Central has already a double track laid with steel rails along its main line, besides working certain loop lines which serve to provide it in parts with a third track. That company is further laying down two additional tracks of steel, which are expected to be completed for 228 miles between Albany and Rochester during the present year. it will then be able to devote two tracks to passenger, and two other tracks to freight traffic; to reduce the running time over 440 miles between Buffalo and New York from fourteen to twelve or less hours; and to reduce the cost of transporting freight by about 10 per cent. The Pennsylvania has a double track throughout, is laid with steel rails, and is in excellent order. The Pennsylvania is laying down a third track at some points and a fourth track at others; and it has been for years extending its shops, yards, stations, and terminal facilities. In connection with the Philadelphia and Erie, it has now a line between Pittsburg and the east, on which the maximum gradient running eastward is said to be 16 feet per mile on straight lines and 12 feet per mile on curves, with the exception of a short approach to one summit which is overcome with the assistance of pushing-engines. The Baltimore and Ohio is now provided with a double track for 280 miles between Baltimore and Grafton, and is laid for the most part with steel rails. The branches from Grafton to Wheeling and Parkersburg are also being doubled, and great expense has been, or is being, incurred in providing western connections for this route.

The distances to the seaboard by the four trunk lines from Chicago are as follows:—By the New York Central route, *via* Albany to New York, 979 miles; by the Erie and the Canadian Peninsula, 956 miles; by the Pennsylvania, *via* Pittsburg to Philadelphia, 823 miles, and to New York, 913 miles; by the Baltimore and Ohio, *via* the Central Ohio to Baltimore, 823 miles.

The Erie occupies a position second only in many respects to the New York Central; but much has to be done to enable it, in competition with these other trunk lines, with water communication in summer, and with the other rivals already referred to, to realize the profits which, with average rates, by improved arrangements and under good management, it might undoubtedly command. Those profits will depend partly upon the further acquisition and economical working of the through traffic above specially referred to, and partly upon what may be called the local resources available for development in the more immediate neighborhood of its own system, or of the lines in connection with it.

TRAFFIC RESOURCES AND FACILITIES.

As regards passenger traffic, the Erie is under a disadvantage when compared with the New York Central, which connects with so many large and important places; but the passenger traffic of the Erie is, nevertheless, capable of great improvement for long as well as for short distances. There is a steady increase of population along the line, which amounted to 23 per cent. in the counties through which it passes, and in the cities which it principally serves, in the ten years from 1860 to 1870. There are also numerous places of interest with which it communicates, such as the Genesee Valley, the Watkins and Havanna Glens, Avon Springs, Silver Lake and Niagara Falls, which may be made sources of increased profit; and the greater part of the scenery along the line is of an attractive and picturesque character. In total passenger traffic it would appear that the Erie does not carry more than half as many passengers as the New York Central, while the Pennsylvania Central occupies an intermediate position between the two, and the Baltimore and Ohio does not carry so many as the Erie. The figures for 1872 are thus stated:—The New York Central carried 7,138,779; the Pennsylvania 5,250,393; and the Erie 3,598,988. There can be no doubt that, when a double track has been completed throughout the Erie main line, when the line has been laid with steel rails, when the gauge has been changed, and when the connections, including that at Newburgh, to the New England States have been improved, the passenger traffic on the Erie will increase and become proportionate to the natural advantages of the route. It is certain that as long as the line remains in an inferior condition to its competitors in regard to delays, to construction or maintenance, to changes of cars or other inconveniences of break of gauge, or to slower speed for through running, the Erie must remain at a disadvantage, especially having in view the superior condition of its two great competitors, passing one on either side of it through the Allegheny range. But there is probably no line on which the passenger traffic would show a more satisfactory or rapid increase if the various improvements above referred to were carried out; and these improvements would lead to economical working, as well as to increased passenger receipts.

As regards freight traffic of a local character, the most important item is coal, and for its transportation the Erie is exceptionally well situated. It forms, with other lines, an excellent route from the great coal fields of Pennsylvania eastward to New York and the Hudson River, and towards the New England States, and westward and northward to the great lakes. It is only 114 miles by the Erie to the Hudson River at Newburgh from the Wyoming anthracite coal fields, as against 175 and 149 miles respectively by other routes to the seaboard at New York; and from the same coal field to Buffalo the distance is 268 miles, as against 289 and 312 miles respectively by other routes. Much might be done, apparently, by providing return cargoes of coal from Buffalo or Dunkirk in exchange for grain, ores, or lumber carried eastward, and thus loading cars on the railways, or propellers on the lakes, which must otherwise return empty towards the west.

Similar observations may be made in regard to coal from the bituminus fields, the Berkeley and Towanda mines being only 35 miles from the Erie at Waverly, the Blossburg fields being 40 miles from Corning, and there being important seams of gas coal, which realizes high prices, and which may be carried in considerable quantities and with great profit along the Erie line. But, in order that full advantage may be taken of these sources of future profit, it is necessary that the gauge of the Erie should be changed, that the connections with New England and with Lake Ontario should be formed or improved, and that further extensions should be made into the coal districts.

Next in importance to coal, the traffic in petroleum and its products may here be mentioned, though they are elsewhere more particularly referred to. The total production now approaches 7,000,000 barrels, of which some 4,000,000 barrels, of forty gallons each, are exported from the United States, and about 88 per cent. of the whole quantity is taken from Pennsylvania. The Erie owes its great advantages in obtaining a large proportion of this traffic to its connection with the Atlantic and Great Western system; and it has an excellent depot for the reception and shipment of the crude oil, which travels in tank cars, and of the refined oil in barrels, at the Weehawken docks, on the Hudson River opposite to New York, elsewhere referred to.

The milk traffic on the Erie increased from rather more than 6,000,000 gallons in 1862 to 11,721,000 gallons in 1872, and is still on the increase; and the traffic in butter, eggs and cheese is very considerable. The exports of cheese from New York increased from 39,624,000 lbs. in 1839 to 65,421,000 lbs. in 1872, which shows the growth of the foreign demand, and explains the comparatively recent rapid establishment of cheese factories, to which the milk is brought from dairies in different parts of the country.

Of the through traffic eastward, that of grain in bulk is the most important. It is not very long since it was demonstrated that railways could compete on this Continent with lines of water communication for the carriage of grain in large quantities for export, but the exports of grain in 1872 were—from New York, 39,608,249 bushels; from Baltimore, 4,777,334 bushels; from Philadelphia, 3,885,183 bushels; and from Boston, 1,825,629 bushels: while the receipts at New York were nearly double, at Baltimore were nearly treble, at Philadelphia were five times, and at Boston were nearly five times the exports. Of the total receipts at New York in wheat, corn, oats and barley, 13,500,000 bushels, or nearly one-sixth of the whole amount, was brought by the Erie, though only half that amount was carried to New York by the Erie in 1870. To enable this traffic to reach its proper development, a further supply of grain cars, access to the elevators at Buffalo, an elevator at New Jersey, and further terminal facilities at Buffalo and New Jersey are much required. And in order to make the grain traffic as profitable as it ought to become, arrangements require to be made, which have already been referred to under the head of "coal traffic," for loading the return cars and steamboats as much as possible with coal, instead of sending them back comparatively empty. If the gauge were altered, the Erie might compete successfully, in the season of navigation, with the Pennsylvania for the grain trade between Buffalo and Philadelphia; and a connection *via* Newburgh for the through transport of cereals to the New England States would add very largely, if the gauge were uniform, to the traffic of the Erie. The above remarks on grain traffic apply also to the traffic in flour, which might be correspondingly increased by similar means as regards termina facilities and a connection with New England. The traffic in live stock on the Erie was almost neglected whilst I was in America; the cars were more profitably employed in transporting oil, and the cattle rates had been reduced by competition to less than cost price, or $30 a car between Chicago and New York. But in ordinary times this traffic is important, and it may hereafter become valuable to the Erie, who have already ample yards on the Hudson River, opposite to New York, especially when the connections with the International bridge at Buffalo and with the New England States *via* Newburgh have been properly made and utilized. Chicago, with its vast cattle yards, is the principal centre of concentration for live stock,

but Cincinnati and St. Louis have lately increased in importance in that respect. The exports from Chicago for 1872 amounted to 510,025 cattle, 145,016 sheep, and 1,835,594 hogs; those from St. Louis for the same year amounted to 164,870 cattle, 29,540 sheep, and 188,700 hogs; and those for Cincinnati to 76,866 cattle, 68,541 sheep, and 159,590 hogs. There is no reason, apparently, why the Erie, in connection with the Atlantic and Great Western and the Canadian lines, should not in future fairly divide with its rivals the profits which may be obtained from this regular and constantly increasing traffic, and why the various companies interested should not, if they will only agree to avoid competition in rates, all derive great advantage from it.

Without going futher into details as to other articles of traffic, it is sufficient here to add that nearly the same remarks will apply to all of them, and that the same improvements are required with a view to punctual and economical conveyance, to the improvement of connections, and to the greater convenience and more economical working as regards terminal facilities.

EXISTING CONDITION OF LINE.

The Erie is altogether, as already stated, including its main line and branches, and independently of its Atlantic and Great Western connections, 959 miles long. Of this mileage, the 422 miles between Jersey City and Buffalo may now be considered the main line, as carrying the heaviest traffic. It is doubled for the whole distance of 87¼ miles between Jersey City and Port Jervis, for 61¼ out of 104¼ miles between Port Jervis and Susquehanna, for 118¼ out of 139¼ miles between Susquehanna and Hornellsville, and for 39 miles out of 91 miles between Hornellsville and Buffalo. There are thus 305¾ miles of double track and 116¼ miles of single track on the main line; and the branches are all laid with a single track except for about two-thirds of a mile on the Newark branch, where the line is double. But there are still three or four single track bridges on the double track portions of the road. There are altogether 315.29 miles of sidings. A mixed gauge track has been laid for 43.80 miles (or 21 9-10 miles of double track between Waverley and West Junction), on the main line between Susquehanna and Hornellsville, for 36.50 miles on the Jefferson branch, and for 34 miles in lines and sidings in the Buffalo yard and on the Niagara Falls branch, making altogether an equivalent of 114.30 miles of single track and mixed gauge.

The total equivalent of single track may therefore be stated, including second track, sidings and 50 per cent. extra for mixed gauge, to be 1,638 miles, of which 178 miles are laid with steel rails, 612 miles are laid with steel top or silicon rails, and the remaining 848 miles are laid with iron rails. The steel rails, of which 43 miles out of 87¼ miles are between Jersey City and Port Jervis, 68 miles out of 104¼ miles are between Port Jervis and Susquehanna, 11¼ miles out of 139¼ miles are between Susquehanna and Hornellsville, 50¾ miles out of 91 miles are between Hornellsville and Buffalo, 1 mile out of 128 miles is between Hornellsville and Dunkirk, and 2 miles out of 26 miles are on the northern railroad of New Jersey—weigh from 60 to 67 lbs. per yard. The steel top and silicon rails weigh 67 lbs. to the lineal yard, and the iron rails weigh from 56 to 70 lbs. per lineal yard.

(To be continued.)

☞ The last rail on the North Wisconsin Railroad, of the forty miles required by the land grant act to be put down this year, was laid last week.

California Narrow Gauge Railroads.

The Sacramento *Record* says that a meeting of the citizens of Suisun and the adjacent country was held in Suisun on the 9th inst., to devise ways and means for co-operating with the residents of Berryessa valley in the construction of a narrow gauge railroad between Suisun City, in Solano county, and Knoxville, Napa county. It was stated at the meeting that the Hon. Nathan Coombs had promised that he would himself build one half of a railroad from Suisun to the head of Rag canyon, if the people of Suisun would build the other half. A committee was finally appointed to canvass Suisun and vicinity, and the country along the proposed routes, and ascertain what amount of aid, in subscriptions of stock and otherwise, could be secured for the work, also to confer with the people of Berryessa upon the subject, and report at a future meeting. The committee is composed of the following persons: Samuel Breck, J. B. Carrington, W. S. Wells, Lewis Pierce, L. B. Abernathie, E. P. Hilborn and W. H. Turner.

The surveys for the Hollister and San Juan Narrow Gauge Railroad, to connect with the Monterey and Salinas Valley Railroad, were begun at Hollister on the 11th inst.

The Livermore and Martinez Narrow Gauge Railroad Company was organized at Danville, Contra Costa County, Cal., on the 14th inst. The company expect to begin the survey at once.

Several parties have been figuring on the contract to build the Nevada County Narrow Gauge Railroad, and there is everything now favorable to its commencement.

Hon. Thos. Findley, the banker of Grass Valley, has proposed to take the contract for constructing and stocking the Nevada County Narrow Gauge Railroad, at the surveyor's estimate.

Cheshire Railroad.

The receipts, expenses, net income, etc., of the Cheshire Railroad Company for the year ending September 30, 1873 and 1874, compare as follows:

	1873.	1874.
Receipts	$845,807	$750,608
Expenses	661,512	642,181
Net income	$184,295	$108,427
Interest paid	41,751	40,783
Surplus to apply to dividends	$142,544	$67,644

A decrease in receipts of $95,199; a decrease in expenses of $19,331; percentage of expenses to receipts, 1873, 78.20; percentage of expenses to receipts, 1874, 85.55.

The ordinary dividends are 5 per cent for the year, amounting to $105,000, and the net surplus of 1873, after paying the dividends, will just supply the deficiency of 1874.

The Cheshire has added one locomotive to its rolling stock during the year and built two new bridges, the costs of which appear among expenses, its construction account having been closed many years. The cost of its large machine shop at Keene—probably not less than $250,000 to $300,000—was also charged to the same account during its construction, nearly three years since.

☞ Mr. A. Ludere Light, C. E., late District Engineer for the Miramichi District of the Intercolonial Railway, has been appointed Engineer to the Government of Quebec in connection with the North Shore and Northern Colonization Railways.

Telegraph News.

Telegraphic communication between Prescott Arizona, and Verde was completed on the 9th inst., and congratulatory messages passed over the wires. Work on the line, which will also connect with Camp Apache, will be commenced immediately and pushed through to completion as soon as possible.

At the annual meeting of the Brooklyn American District Telegraph Company, held at the Company's offices on Montague street, the following officers were elected for the ensuing year: President, Hon. John B. Norris; Vice-President, E. O. Read; Secretary and Treasurer, T. J. Powell; Superintendent, F. P. Sherwood; Executive Committee, S. W. Battershall, R. L. Edwards, and H. L. Hotchkiss.

The Commercial Advertiser says that a new telegraph company has been organized under the title of the American Automatic Telegraphic Company, which is under the direct auspices of the Pennsylvania, Erie, and Baltimore and Ohio Railway Companies.

Ground was broken, on the 18th inst., at Fort Garry, Montana, for the Canada Pacific Telegraph Line, in the presence of the Municipal and Provincial officials. The contractors expect to complete the line to the lower Fort this season, and open an office at that point.

Gaithersville Branch Railroad.

A meeting was recently held at Mechanicsville, Montgomery county, Md., of persons favorable to the construction of a proposed branch of the Baltimore and Ohio Railroad through Montgomery county, between Hanover switch, or Laurel, and Gaithersburg. It was stated that the proposed road would be not only of great advantage to the people of that county, but will shorten the Western route some twenty five miles. Resolutions were adopted urging the land owners along the proposed line to meet the railroad company with liberality and a disposition to aid the prosecution of the work. One reason for this road is that the farmers desire to pay attention to dairy products, which would need its facilities for quick time to market. Messrs. E. F. Stabler, A. B. Davis and Dr. F. Thomas were appointed a committee to meet the Baltimore and Ohio Railroad authorities on the subject.

☞ The construction of a railroad from Kensico (a point on the New York and Harlem Railroad 25 miles from New York) to Rye Lake has been commenced. Its length will be about five miles. Work upon it will be pushed with the utmost vigor, so as to afford an easy and rapid transportation of ice from the lake to New York during the present Winter season. It is believed that the ice business in Winter and the conveyance of pleasure seekers to and from the lake in Summer, will render the cost of construction a good investment.

☞ The Trustees of the Alabama and Chattanooga Railroad bondholders have repaired all the damage done to the road, by the floods of last Spring, and are now running trains from Chattanooga to Meridian a distance of 295 miles.

☞ The stock and effects of the Canada Railway Equipment Co., and also of the Canada Rolling Stock Co., have been purchased by the Grand Trunk Railway for $1,800,000.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal

Saturday, November 28, 1874.

Stock Exchange and Money Market.

Money has been, as a rule, quite active during the week. The local necessities of the speculative operators at the Stock and Gold Boards have been more urgent, and the demand from mercantile sources has been rather more animated. Call loans have been quoted at from 2½@4½; and very choice to prime commercial credits at 5½@8 per cent per annum. The outflow of currency to the interior for produce moving purposes have been more extensive, and has had the effect of diminishing the bank reserves; most notably in the deposit and legal tender lines. The coin interest disbursements of the Treasury office have served to augment the specie average of the City banks, notwithstanding the enlarged specie export aggregate. The City banks last week reduced their reserve of legal tender notes $2,020,700, and their deposit item $2,641,500, while, increasing their specie average $492,700. They also report a reduction of $468,600 in the loans and discounts, and an increase of $135,500 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $52,185,569 against $53,039,697, the preceding week; and a coin board of $54,664,610, against $55,654,220, on the previous return. The City bank exchanges, during the week, were $532,154 099, or a daily average of $88,692,349. The customs revenue of the port, during the week, was $1,670,000. The City banks reported their average of gold last week at $17,380,900, and their greenback average at $57,504,400. Their deposits stood at $227,352,700. The loan item was $283 319,500. The circulation was $24,968,000.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $18,047,025.

The aggregate of the outstanding U. S. currency, of all denominations, Nov. 1, was $430,752,637. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is $347,831,603.

The U. S. Treasury balances at the opening of business on Monday were as follows: Currency, $15,402,821; special deposit of legal tenders for redemption of certificates of deposit, $55,570,000; coin, including $22 838,000 in coin certificates, $82,867,835.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 42¾ millions.

Gold has been much brisker and decidedly higher. The speculative and export demand has been more animated, stimulated, in good part, by the financial advices from Europe. The customs inquiry has been comparatively limited, having been less than $300,000 a day. The extremes of the week have been 110⅝@111⅞, closing on Wednesday at 111⅛@111¾, as against 110⅞ on Wednesday of the preceding week. The specie outflow last week was $1,658,565. The imports of specie at this port since Jan. 1, have been $4,865,240, against $17,026,770 same time last year. The customs demand for Gold last week averaged $278,333 a day. Foreign Exchange has been fairly active, but variable, with Bankers' sixty day bills on London closing on Wednesday at $4 85¼@$4 86; sight bills on London at 4 89¼@$4 90 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $3,991,057.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,880,496.

Government Securities have been more urgently sought after by investment buyers, and the dealings in most issues have been quite extensive, though impeded by the difficulty of executing orders for large lots of the favorite gold-bearing bonds, owing to the limited offerings. Prices have advanced, closing firmly and buoyantly. U. S sixes of 1881 closed on Wednesday of this week at 120@120¼; U. S. Five-Twenties of 1862, at 112¾@113; U. S. Five-Twenties of 1864 at 114¼@114¾; U. S. Five-Twenties of 1865 115¾@115⅞; U. S. Five-Twenties of 1865 consolidated, 118½@118¾; U. S. Five-Twenties of 1867, 119¼@119½; U. S. Five-Twenties of 1868, 119¼@119½; U. S. Ten-forties at 113¾@114½; U. S. Fives of 1881, (Funding Loan) 112¾@113; Six per cent. currency Sixes from 119@119¼.

There has been active business noted at the

Stock Exchange, most of the week. The speculative movement has been generally of a very confident temper. Values, in most instances, have been decidedly buoyant. The demand for State and Railway bonds has been more animated, at generally higher prices. Railway and miscellaneous share property has been actively sought after, as a rule, opening more firmly, but closing somewhat irregularly. Some energetic efforts have been made to break down values, in the instances of a few prominent stocks, but without any very encouraging success to the manipulators for lower figures.

General business has been comparatively brisk in the more prominent kinds of domestic produce, mainly in Flour, Grain, Cotton, and hog products, with prices closing more firmly. Hops, Petroleum and Naval Stores have been held with more confidence, on an improved demand. Wool, Tobacco, and Seed have been in moderate request within the previous range. Hides, Leather, and Skins have been selling more freely at about late quotations. Foreign merchandise has been moderately inquired for, as a whole, on a steadier basis as to prices, though Coffee closed lower. The Hardware and Dry Goods trades have been devoid of animation. The Metal trade has been more satisfactory in Ingot Copper, and Pig Tin, at stronger prices; but quite moderate in Iron and Lead, on the basis of previous rates. Eglinton Pig Iron quoted from yard at $37; Glengarnock, $39@$40; No. 1 American Pig at $26@$28 00; No. 2 do. at $25@$27; Forge, $23 50@$27; English Rails at $48@$50, gold; American Rails at works, $55@$60; Old Rails, $30. Wrought Scrap, $30@$32. Ocean freights have been more active and higher. The main demand has been for accommodation for Grain, Petroleum, Cotton, and Provisions. Grain room at the close attracted less attention.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Canadian Government advertises for tenders for the construction of the Georgian Bay branch of the Pacific Railway, and it is stated that in January the tenders will be required for the construction of the Lachine canal enlargement, and also for the Baiverie canal.

The Pacific Railroad Land Grants.

From the records of the General Land Office at Washington, it appears that the number of acres of land actually patented to the Pacific railroad companies under congressional land grants is as follows: Union Pacific Railroad, 709,954 acres; Central Pacific Railroad, 672,111 acres; Kansas Pacific Railroad, 413,000 acres. The number of acres selected, but withheld from patent by the order of Secretary Cox, Nov. 3, 1869, to await the completion of the roads, in accordance with the report of the "commission of five eminent citizens," was 288,222 acres by the Union Pacific, and 61,435 by the Central Pacific Company. These two roads having been now accepted as properly completed, are entitled to demand and receive patents (as heretofore stated) for the remainder of their land grants, which the general land office estimates will amount to 12,000,000 acres for the Union Pacific, and 9,100,000 acres for the Central Pacific company. The estimated quantity which the Kansas Pacific Railroad Company may receive under its grant is 6,000,000 acres.

The law of July 2, 1864, however, forbids the issuance of patents for lands to any Pacific Railroad Company until the cost of surveying, selecting and conveying the lands applied for shall have been first paid into the United States Treasury, and as there is no law requiring the companies to apply for patents unless they wish to, and no machinery has been provided for enforcing the provision of the act of 1864, that lands not sold by the railroads within three years after the completion of their roads shall be liable to be sold under the pre-emption laws for their benefit at $1 25 per acre, the Pacific Railroad Companies may indefinitely delay the issuance of patents for these lands, and thus keep them exempt from taxation, although still reserved from general settlement and susceptible of sale by said corporations.

Little Rock and Ft. Smith Railroad.

A meeting of the holders of the first mortgage and land grant bonds of this company was held in Boston on the 21st inst., for the purpose of taking action to protect their interests, as the whole property of the company is to be sold December 10, under decree of foreclosure.

Mr. Frank Weld called the meeting to order, and Mr. A. E. Hildreth was elected the chairman and Edward L. Adams, secretary. Mr. C. W. Huntington, who has been to Arkansas investigating the affairs of the road, read a report.

Briefly an outline of the facts is that in order to save the land grants twenty miles of the road remain to be built between this time and May 1 next. The decree of foreclosure has been granted, and the sale will take place in December. Application has been made to Judge Dillon of Arkansas, of the United States Circuit Court, for power to be vested in the trustees to issue scrip which shall underlie both mortgages, with which to complete the rest of the road.

Judge Dillon did not refuse the application, but on the contrary intimated emphatically that he would grant power if necessary. The question is, whether the bondholders will advance money sufficient to wipe out the indebtedness of the mortgage, form a new company, complete the remaining twenty miles of road between now and May 1, and thus save their investment, or take their chances of getting a pro rata share of the proceeds of the sale. Should they choose to take pro rata the proceeds of the sale, it is not at all probable that an immediate distribution of the proceeds will be made, because in order to make up his account for return to the court, the master will be obliged to take proofs concerning the validity of the bonds, which will create a delay in the final distribution of many months. There are a great many claims made against the company, but the judgments are less than $50,000, so that after the mortgage sale whatever may be paid to creditors, not judgment creditors, will be entirely a matter of charity. There are some of these who are entitled to payment, which, should a new company be formed, would be made in bonds. There are $3,500,000 of bonds issued on the road and $5,000,000 on the land, and these will be sold separately under different decrees. The subject was then discussed at length of organizing a new company, appointing a committee to buy the road, &c., and much time consumed before any definite result was arrived at.

Finally Messrs. Hildreth, Huntington and Gookin were appointed a committee to nominate a committee to go and bid for the road, and by a subsequent motion the matter of fixing the limit for outside parties to come in was also referred to the same committee. No further or definite plan was adopted.

Nashua and Rochester Railroad.

It is expected that the formal opening of this road will take place at Worcester on the first of December—the last rail connecting the Nashua and Rochester Railroad with the Worcester and Nashua, near the junction with the Lowell and Nashua and Concord Railroads, having been laid on the 14th instant with appropriate ceremonies.

The Nashua and Rochester Railroad is 48 miles in length. At Rochester it connects with the Portland and Rochester Railroad, 52 miles in length—making the total distance from Nashua to Portland, 100 miles. The intermediate distances of the Nashua and Rochester Railroad are: from Nashua to West Windham, 7 miles; to Windham, 10 miles; to Hampstead, 15 miles; Sandown, 19 miles; Tremont, 24 miles; Epping, 28 miles; Lee, 33 miles; Barrington, 42 miles; Gonic, 46 miles; and to Rochester, 48 miles. The connections are: At Nashua, with the Boston, Lowell and Nashua, the Nashua and Wilton, the Concord and the Nashua, Acton and Boston roads; at Windham, with the Manchester and Lawrence; at Epping, with the Concord and Portsmouth, at Rochester, with the Dover and Winnipiseogee branch of the Boston and Maine, and the Portsmouth, Great Falls and Conway branch of the Eastern road. At Woodford's and Morrill's Corners, with the Maine Central road; at Worcester, with the Boston and Albany, the Norwich and Worcester, and the Providence and Worcester roads.

The capital stock of the Nashua and Rochester Road authorized by the New Hampshire Legislature is $1,000,000, but for the time being is fixed by its directors at $800,000. The Worcester and Nashua Road have subscribed $200,000, the city of Nashua $200,000 and the Portland and Rochester Road $100,000, and the subscriptions by the towns along the line and individuals are liberal and complete. The entire cost of the road will not exceed $1,500,000. To furnish funds to pay for the completion of the construction of the road first mortgage bonds, authorized by the New Hampshire Legislature, and guaranteed, principal and interest, by the Worcester and Nashua Railroad, are issued. The Nashua and Rochester road is leased by the Worcester and Nashua road for 50 years, which road is to pay 6 per cent per annum rent on the whole cost of the road and taxes on the capital stock, said payments to be made semi-annually. Interest on the bonds and dividends on the capital stock are to be paid directly to the Board of Stockholders by the Treasurer of the Worcester and Nashua Railroad Company. The Worcester and Nashua road have also entered into a contract for 20 years, unless otherwise terminated by mutual agreement, with the Portland and Rochester road, which has been ratified by the City Council of Portland July 31, 1872, virtually making the road from Portland to Worcester one line, the three roads, Portland and Rochester, Nashua and Rochester, and Worcester and Nashua, pro rating all freight and passengers.

Interest and Dividends.

The coupons of the first mortgage bonds of the Wilmington, Columbia and Augusta Railroad Co., due December 1st, 1874, will be paid at the office of the Safe Deposit Company, Baltimore, on and after that date.

The Cape May and Millville Railroad Company announces a semi-annual dividend of 3 per cent, payable at the office of the company, at Camden, N. J., December 1.

On and after January 4, 1875, the State of Illinois will redeem at the American Exchange Bank, New York, Nos. 1 to 250 inclusive of the $1,000 revenue deficit bonds issued to remove the lien of the city of Chicago on the Illinois and Michigan Canal.

Railroad Earnings.

The earnings of the Atlantic and Pacific Railroad for the week ending Nov. 14 were $104,300 against $87,307 for the corresponding week of 1873; increase $16,993.

The earnings of the Philadelphia and Erie Railroad in October, 1874, were $350,579 34, the expenses $231,294 25, and the net proceeds $119,285 09. The net proceeds for the ten months ending October 31, 1874, were $796,672 70, against $314,785 28 for the corresponding period of the previous year, an increase of $481,887 42.

☞ Col. L. P. Grant has been appointed Receiver of the Atlanta and Richmond Air Line Railroad; Gen. Geo. B. Wright has been appointed Receiver of the Indianapolis, Bloomington and Western Railroad; and Joseph Kenny and James E. Reeves have been appointed Receivers of the Fort Wayne, Munce and Indiana Railroad.

☞ The New Orleans, Mobile and Texas Railroad sections west of the Mississippi River were sold on the 18th inst. by the United States Marshal for $450,000 to Frank M. Ames, son of the late Oakes Ames. A new company will probably be organized to complete the road to the Texas terminus.

☞ The case of the State of Missouri against the Pacific Railroad of Missouri in the U. S. Supreme Court, has been decided in favor of the Railroad Company, thus confirming the validity of the transfer of the road to the company by the State.

Virginia State Debt.

Mr. John J. Mackinnon, representing the American Bond funding and Banking Association (limited) of London, was in Richmond during the past week or ten days. He came to consult with Gov. Kemper, Treasurer Hunter, and some of the leading financiers of the city in regerd to the debt of Virginia. His association is accredited for fair dealing and capacity to execute whatever they undertake by Duncan, Sherman & Co., of New York. Among its members and stockholders are many of the largest capitalists of Great Britain—such men as the Rothschilds, Barings, and Gilliatts.

They propose to fund the entire debt of the Southern States, and have already opened negotiations with several Governors. The matter will be brought before the Legislatures of those States at the sessions to be held this Winter. In reference to the debt of Virginia, which amounts to about $30,000,000, exclusive of past-due and unpaid interest, and the one third allotted to West Virginia, as her fair share of the *ante bellum* indebtedness, Mr. Mackinnon offered to fund it in bonds running ten years, and bearing four per cent interest in gold, or in bonds running twenty years, bearing five per cent interest in gold, the principal and interest to be paid only in London. The association prescribes as one of the conditions of the contract it proposes to make with the State, that the money to pay the principal and interest of the new funded debt shall be derived from a fixed portion of the revenue to be inviolably set apart for that purpose. To accomplish that end they furnish copies of such acts as it will be necessary for the General Assembly to pass to insure the desired success.

The scheme, it is said, was drawn up by eminent counsel in England and America. Its authors believe it is amply sufficient to secure the payment of interest and principal as they fall due. It provides that the Auditor shall every year levy such direct tax on the property of the State as will be sufficient to pay the interest and raise a sinking fund. The money raised by this taxation is to be kept separate from all other funds of the State, and is to be sacredly appropriated to the designated object. In case the Auditor refuses or neglects to raise this tax, according to the plan, any bondholder is to have the right to apply to the courts for a mandamus to compel him to do so; and the courts are to be armed with the power to make the Auditor execute his duties under the contract.

The new bonds are to be delivered by the State Treasurer to the association as fast as the association or their agents are ready to exchange therefor the outstanding bonds in sums not less than $100,000. The association are represented to own or control at least $15,000,000 of the present bonds of the State. They believe they will have no difficulty in selling the new bonds at a higher price than "consols" now command in the markets of the country, and thus will be able to retire the present six per cent debt of Virginia, and replace it with the proposed debt, bearing four per cent interest for ten years, or five per cent interest for twenty years. The whole funding process is practically to be carried on through this British association. The association, it is expected, will be reimbursed for its risk, trouble, and expense by the enhanced value of the new bonds over and above the present outstanding bonds. The new bonds, they calculate, will have such a value as will justify those who own "consols" in exchanging them therefor. In that way the tax-receivable coupons, now a constant source of irritation and trouble to the State, would nearly all be withdrawn from circulation.

Mr. Mackinnon left Richmond for the South yesterday. It was generally thought in financial circles, where the matter has been discussed for a week, that some understanding had been arrived at between the Governor and him. It was, however, believed that the Governor would not consent to recommend to the General Assembly to embark in the scheme unless it could arrange to have the bonds run for thirty years and yet bear no greater interest than four per cent.—*Richmond Dispatch, Nov.* 17.

The Virginia State Debt.

A correspondent of the Baltimore *Sun*, writing from Richmond, Va., under date Nov. 16th, says that the Governor, in his message to the General Assembly, which will meet on the first Monday in December, "will have to report the proceedings of the recent conference of the State commissioners with the bondholders, from which no great amount of good other than the exchange of compliments was expected or resulted. But he will have a highly important proposition to submit from the great English corporation known as the American Bond Funding and Banking Association. That concern is composed of such men as the Barings, Rothschilds, and Gilliatts, and is accredited to the Virginia authorities by Duncan, Sherman & Co., of New York. It proposes to relieve Virginia at one stroke from all her present embarrassment by funding the acknowledged debt of the State in four per cent. gold-bearing bonds, running ten years, or five per cent. gold-bearing bonds running twenty years. The present confessed debt of Virginia is $30,000,000, principal and interest; $2,000,000 past due and unpaid interest. Most of the bonds bear interest at six per cent., an obligation which the State finds herself unable to meet. She could probably pay four per cent., if an arrangement could be made for retiring the consols now in circulation having tax-receivable coupons attached. It is understood that the Governor is willing to recommend the adoption of the Englishmen's scheme, provided they will let the bonds run thirty years at the rate of four per cent. interest. It is a condition of the offer that the State shall enter into a contract with the Englishmen, setting apart such portion of the revenue as will be necessary to meet the accruing interest, which, with the principal, is to be paid in London."

Chesapeake and Ohio Canal.

At the regular monthly meeting of the canal board, held at Annapolis, Md., on the 17th inst., President Gorman submitted the following report:

The coal tonnage for the month of October was 103,514 tons, which is a decrease, as compared with the corresponding period of 1873, of 12,968 tons. The accrued revenue during the month from all sources was $63,105 76. The ordinary expenses, pay of officers, &c., was $16,561 19; balance over expenses, $46,538 57. Balance in the various banks to the credit of the treasury was Nov. 1, $100,850 10. The decrease in the tonnage and revenue of the company for the past month is, as the board is aware, alone attributable to the general depression of all branches of industry, which will still further decrease our revenue for the remainder of this season, but as the canal is now in better repair than for years past, considerable reduction can be made in the expenditures during the suspension of navigation.

The board adjourned to meet on the 9th of December.

☞ The sale of the Paterson and Passiac and Paterson and Little Falls Railroads, which was to have taken place on the 20th inst., for non-payment of taxes for 1872, 1873, and 1874, was postponed until Friday, January 8, on the application of counsel for the roads. These are the only two horse railroads in Paterson, and neither has paid expenses since they commenced running. The former is $4,000 in arrears and the latter $2,500.

The Coal Trade.

The total of authracite marketed for the week ending on the 14th instant amounted to, 465,933 tons, and for the coal year 16,824,757 tons, against 17,708,818 tons to corresponding time last year, being a decrease of 884,061 tons. The bituminous tonnage for the week is 61,831 tons, and for the year 2,953,885 tons, against 2,959,809 tons to same time last year, giving a total of all kinds for the week of 527,764 tons, and for the year of 19,778,642 tons, against 20,668,627 tons to the same time last year, being a decrease of 890,003 tons. The Philadelphia *Ledger*, from which the above is taken, adds:

There is rather more activity in coal for domestic uses, but no change in the markets abroad. Those great consumers of coal, the manufacturers of iron, are short of orders for iron, and consequently are using much less than the average amount of coal. Some of these manufacturers are complaining that the high prices of coal make high prices of iron, and that there would be more demand for iron and a greater amount of coal consumed if the coal combination did not hold the price of the latter so high. How this may be we cannot answer, but it is pretty well settled that there can be no relaxation in the prices of coal this year. Anthracite coal is now higher than at any previous period of the year, and yet for some departments the trade is on the increase.

☞ The Hempstead and Rockaway Railroad, which is operating as a branch of the Southern Railroad, from Valley Stream to Hempstead, has been sold at auction, with all its rolling stock and appurtenances, to the Brooklyn Trust Company, for the benefit of the bondholders, for $50,000. The ownership of the road has been in dispute, but as this purchase gives the bondholders a clear title, it is probable that they will soon make a favorable sale of the property to the Southern Railroad Company, which has already purchased all right and title to the Hempstead and New York Railroad for $50 over and above all liabilities. The latter road has its western terminus at Bay Ridge, and considerable work in grading, &c., has already been done upon it.

☞ At a meeting of the directors of the Delaware Railroad Company, at Dover, Del., on the 5th instant, S. M. Felton, president of the company, presented a draft of an agreement between that company and the Philadelphia, Wilmington and Baltimore Railroad Company, providing for the guarantee by the latter company of $650,000 of bonds proposed to be issued by the Delaware Railroad Company to pay off the loans falling due July 1, 1875. Resolutions were adopted approving the agreement, and the president authorized a director to carry out the objects thereof.

☞ The charter of the Southside Railroad Company has been recorded in the executive chamber at Annapolis, Md., in accordance with law. Baltimore and Ellicott City are to be the termini of the road. The amount of stock is $60,000, and the incorporators are Wm. Wilkens, James A. Gary, George J. Appold, Frank Frick, H. H. Grave, H. Simon and Talbot J. Taylor.

☞ A new hot blast is being added to the furnace in Dauphin county, Pa. The probability is that the furnace will be kept in operation all winter, a contract having been made with the Pennsylvania Steel Company to furnish the Baldwin works with 2,000 tons of pig iron.

New York, Saturday, December 5, 1874.

Nashua and Rochester Railroad.

As previously announced, the formal opening of this road took place at Worcester, Mass., on the 1st inst. Forming, as it does, the connecting link in the through route from Worcester to Portland, Me., a brief sketch of its history from its inception to the present time may not be uninteresting.

When the Worcester and Nashua Railroad was incorporated, in December, 1848, a charter was also granted by the State of New Hampshire to Messrs. William Cummings, Jr., George T. Sawyer, Abiel Rugg, True T. Locke, Thomas J. Melvin, Nathan Batchelder, Samuel Marshall, John Folsom, Thomas W. Gillis and Thomas Chase, with authority to construct a railroad from Nashua through the towns of Hudson, Londonderry, Chester and Sandown to Raymond, making connection there by way of the Concord and Portsmouth Railroad with Epping. The capital stock authorized was $500,000, and the time for the construction of the road limited to December 31, 1857. But after the receipt of the charter, no effort was made until 1853, when the legislature of that year granted the company the right to extend the road to the dividing line between Maine and New Hampshire, allowing such change of location in running the road from Nashua to Epping as the railroad commissioners might determine. But to these new privileges a proviso was attached, compelling the construction of a line from Great Falls, N. H., to Lebanon, Me., connecting there with the York and Cumberland road, or the prerogatives became void and valueless. In July, 1867, the legislature allowed the Nashua and Epping Railroad to form a junction with the Worcester and Nashua Railroad at Nashua, and unite with the Portland and Rochester Railroad. In June, 1868, the charter was again changed and a consolidation formed of the Nashua and Epping and the Portland and Rochester Railroad in New Hampshire, under the name of the Nashua and Rochester Railroad Company.

In 1870, a bill was passed by the legislature allowing railroad corporations to hold stock in the Nashua and Rochester Railroad to the extent of $200,000. This allowed the Worcester and Nashua Railroad to furnish the real lever by which the enterprise was finally lifted into existence. Again powers were sought for from the legislature, and in 1871, at the June session, the new corporation was authorized to choose a board of fifteen directors; the powers of all other existing boards revoked; the time limitation for the completion of the work fixed on December 1, 1878, and the capital stock placed at, for the time being, $1,500,000, with power definitely to determine it at some future date. The aid of the State was only once again invoked, in July of last year, when authority was given the directors to issue bonds to the amount of $700,000, the bonds being exchangeable at par for stock at any time. The payment of these was guaranteed by the Worcester and Nashua Railroad Company.

The first actual work, other than surveying, was commenced in September, 1872, and the last rail was laid on the 14th of November, 1874, thus forming a continuous route from Worcester to Portland 145 miles in length. The Road is said to be a model of complete construction. It is leased to, and operated by, the Worcester and Nashua Railroad Company.

There are twelve bridges on the line, the aggregate length of which is 1,329 feet, and the total cost, over $150,000. Among other matters of construction there were built forty-one culverts; there are two feet of gravel ballast under the sleepers whether in rock or earth cuttings; the fish-tail joint is used for the entire length of road, and the sleepers used are swamp cedar, laid 2,860 to the mile. The joint of the rail is made between the sleepers, giving greater elasticity and less jolting than when built in the old way. The grades are easy, the maximum being 52.8—or one foot in 100. The highest point on the line is just beyond Windham Junction. The maximum curvature is four degrees in 1,432 feet radius.

Messrs. Hitchings and Lynch, of Portland, graded the road and built the culverts for $545,500; the bridge masonry was built by Messrs. J. H. Leavitt & Co., of Portland, for $106,000: the rails were laid by Waite Hurlburt, of Underhill, Vt.; the stations were built by J. C. French, of Worcester; the bridges by J. H. Virgil, of Damariscotta, Me., and C. O. Davis, of Portland, was the efficient engineer. The substantial way in which the road has been constructed, the extreme evenness of grading and ballasting, and the perfectness of its every appointment was fully testified to by those who attended the opening on the 14th of November.

The officers of the new company are as follows: President, F. H. Kinnicut, of Worcester; treasurer, T. W. Hammond, of Worcester; superintendent, C. S. Turner, of Worcester; assistant treasurer, J. D. Otterson, of Worcester; clerk, A. F. Stevens, of Nashua; directors, F.

H. Kinnicut, F. H. Dewey, E. B. Stoddard, Charles W. Smith, C. S. Turner, C. H. Waters, Charles E. Whitin, A. W. Sayer, A. H. Dunlap, F. A. McKean, N. V. Whitehouse, Edwin Wallace, J. C. Eastman, J. C. Burley and John Lynch.

Bay Verte Canal.

We are informed that it is the intention of the Dominion Government to receive, about the first of January next, tenders for the construction of the Bay Verte Canal. The work is to be commenced near the outlet of the River Au Lac, and to follow in a southeasterly direction to a point between Tongue's Island and Fort Cumberland; thence in a nearly direct course along the valley of the Missiguash to a place between Hacmatack Lake and Miner's Point; thence curving round still further to the South East to the Main Line of the Tidnish River, near Chapell's Farm, where it takes a North Easterly direction to near the mouth of the river, and then crosses Tidnish Head in an Easterly course to deep water in Bay Verte. The works will, so it is announced, be divided into sections suited to circumstances and the locality. The outline of the work indicated will, it is thought, enable contractors to examine the dry portions of the line before winter sets in, and those parts through bogs after the ground is sufficiently frozen. With a view to facilitate this examination, it is said taht a lithographic map of the locality will be furnished on application by the Department of Public Works at Ottawa. It is also stated that when plans, specifications and other documents are prepared, due notice will be given.

The Coal Trade.

The total of anthracite marketed for the week ending on the 21st Nov., amounted to 440,368 tons, and for the coal year 17,248,132 tons, against 18,097,371 tons to corresponding time last year, being a decrease of 849,239 tons. The bituminous tonnage for the week is 64,860 tons, and for the year 2,980,543 tons, against 3,033,292 tons to same time last year, giving a total of all kinds for the week of 505,228 tons, and for the year of 26,219,675 tons, against 21,130,663 tons to the same time last year, being a decrease of 910,988 tons. The Philadelphia *Ledger*, of 30th ult., from which the above is taken, adds:

At Port Richmond for the week ending the 28th inst., the receipts of coal were 54,000 tons, the shipments 51,000 tons, leaving 155,000 tons on hand. The coal and coke tonnage of the Pennsylvania Railroad last week was 97,546 tons, and for the year 2,952,240. Of anthracite and bituminous there were 3,020,540 tons, and of coke 432,694 tons. This includes the tonnage of coal both east and west. The coal year of the Reading Railroad Company, and of all that company's leased roads connected with the coal trade, ends to day, as does also the fiscal year of the Lehigh Valley Railroad Company and all its leased roads. A sharp weekly reduction in coal production will characterize the trade henceforth to the end of the calendar year, and, indeed, to the opening of the trade next spring. At over twenty of the mines worked by the Reading Coal and Iron Company work has already ceased, and other mines in that and other regions are steadily going out. The Port Richmond wharves are so blocked with coal that the Reading Railroad Company have felt constrained to give notice to operators for whom they carry that they cannot take any more coal from them at present. The business to Richmond is pretty much over, and henceforth, for the remainder of the year and winter, trade will be confined to that of the line. The chief interest of the coal trade now centres in the question of the continuance of the united action of the leading carrying companies on a basis similar to that in operation for 1874. There are some intimations that one or more of the companies now in the combination will not work in full harmony with the majority. The fact that the Pennsylvania Coal Company, one of the leading carrying companies, has announced a reduction of rates for December, is pointed to as evidence of want of full accord. When it is remembered, however, that each and all of the companies have this year found their interest so materially subserved by working in harmony, it is but reasonable to expect that they will continue the policy.

Peninsular Ship Canal.

The Baltimore and Ohio Railroad Company, which has recently completed its line of railroad to Chicago, and is competing with the other great trunk roads for Western traffic, is seeking a safer and shorter outlet from Baltimore to the sea, and contemplates building a ship canal to connect the Chesapeake and Delaware bays. The map and profiles of the route selected have been filed in the office of the Secretary of State of Delaware, and it is said that the railroad company intends to issue stock immediately and commence the work. The canal will connect the waters of the Sassafras river, which empties into Chesapeake bay a little north of Baltimore, and of the Blackbird creek, which empties into the Delaware bay near Bombay Hook. The distance from the point where the Sassafras river is navigable to the mouth of Blackbird creek is seventeen miles, which will be the entire length of the canal without locks. The canal is to be one hundred feet wide on the surface and twenty five feet deep at low water, capable of floating the largest class of sea-going vessels as well as the internal commerce of the States. It is claimed that the saving in distance by this route from Baltimore to the sea will be 225 miles.

East Tennessee, Virginia and Georgia R.R.

The earnings of this road for the years ending June 30, 1873 and 1874, were as follows:

	1873.	1874.
From passengers	$439,062 84	$328,812 24
" freight	856,772 44	706,408 22
" express	14,090 00	7,508 32
" U. S. mail	57,457 50	57,457 50
" miscellaneous	10,975 68	10,997 74
	$1,378,358 46	$1,111,184 02
Expenses, viz:		
Motive power	$161 423 15	$128,169 74
Maintenance of cars	106,194 05	77,410 22
Fuel consumed	80,096 25	70,318 61
Transportation	159,324 40	122,066 94
Repairs of roadway	351,215 08	244,289 96
General expenses	70,895 49	55,203 02
	$929,148 42	$697,408 49
Leaving net earnings	$449,210 04	$413,775 53
Accounted for as follows, viz:		
Interest paid and provided for		$280,007 99
Dividend on the stock of the company of 8 per cent, April 1, 1874		58,875 75
Cost of passenger depot at Knoxville.		10,884 84
Paid on account of right of way		893 80
Dividend of 3 per cent, payable on the 1st of October		58,875 75
Amount to credit of profit and loss account		4,237 90
Total, as above		$413,775 53

During the year two semi-annual dividends of 3 per cent each, on the capital stock of company have been declared, one payable on the 1st of April last, and the other on the 1st of October. The President in his report says:

The physical condition of the equipment and road bed has been fully maintained and the depreciation from wear and tear replaced, as will appear by reference to the following expenditures made in these departments, viz:

22 miles iron re-rolled, fish bars and plates, cost	$94,160 64
13¼ miles broken stone ballast	22,972 50
63,961 cross ties placed in track	20,675 00
60 freight cars rebuilt	22,829 95
10 new freight cars	8,750 00
6 passenger cars refitted	6,225 00
Total	$175,613 09

It will thus be seen that the company has been able to pay out of its income from earnings, the interest on its indebtedness, two semi-annual dividends of 3 per cent each, equal to 6 per cent per annum on the capital stock, and make renewals to replace the wear and tear, and give increased value to the property to the extent of about thirty thousand dollars, by the erection of the passenger depot at Knoxville, and in permanent ballast on the road bed. A comparison of this year's business with that of last year, shows

A decrease in earnings of	$267,196 67
A decrease in expenses of	231,739 93
A decrease in net income of	$35,456 74

The per centum of decrease in earnings is about the same on through and local passenger and freight traffic, and the decrease in expenses is distributed proportionately, or nearly so, through all the departments, and is due to the exercise of strict economy, and to the reduction in salaries and wages from the highest to the lowest of the officers and employees of the company, and also to a proportionate decrease in the renewals of iron and cross ties, and in the number of cars rebuilt, as compared with the previous year.

Tables Nos. 1 and 2 show the financial condition of the company, from which it will appear that there has been no material change in this department during the year, and that your total outstanding bonded debt

Amounts to	$4,204,900 00
And capital stock, stock scrip, &c., to	1,968,274 00
Total stock and bonded obligations.	$6,173,174 00

Against this, you own 272 miles of railroad, fully equipped, and also the items in bills receivable, received for the Western North Carolina Railroad, the Rogersville and Jefferson Railroad, and the cost of the Cincinnati, Cumberland Gap and Charleston Railroad (or Morristown road,) amounting to $456,659 80. Hence it will be seen that, including these items, your road stands at $22,695 49 per mile, and at $21,016 59 per mile after deducting the foregoing items.

The company is still practically without any floating debt, as its available cash assets exceed the small sum which it owes on bills payable and open accounts.

The decreased earnings for the past year is mainly, if not entirly, due to the effects of the financial panic of last Fall on the business of the country, and it is apprehended that this dullness and prostration will tend to keep down the earnings for the year upon which we have entered, although we may reasonably hope that your net earnings will equal that of the past year, and if we shall have a return of prosperity in the meantime, that it will exceed it.

There has been no material change in the condition of, or in our relations with, connecting roads. The Alabama and Chattanooga Railroad and the Selma, Rome and Dalton Road, remain in litigation and give your road very little business. The Morristown and North Carolina con-

nection, we regret to say, remain in about the same condition as they did a year ago, except that your Board of Directors, through their President, made a contract with the North Carolina Railroad Company, under which it agreed to pay your company the amount embarked in the North Carolina connection, and executed its promissory notes with interest for the same; and the N. C. R. R. Co. further agreed to complete the connection to the State line at Paint Rock, and your company agreed to build the five or six miles from the end of the Morristown road to the connection at Paint Rock; and the two companies bound each to the other for an equitable interchange in business traffic. For a better understanding of the nature of this contract, reference is made to a copy of the same herewith submitted. The North Carolina Railroad Company, although financially very strong, and able to carry out its contract, has thus far been prevented from doing so by injunctions and litigations, notwithstanding the fact that the amendment to its charter, by which it is authorized in express terms to buy and build the road, and the contract with your company have both been ratified and adopted in convention of the stockholders by three-fourths of the entire stock of that company.

Whether the opposing minority, and the contesting holders of what is called the construction bonds issued by the State of North Carolina to the N. C. R. R. Co., and to secure the payment of which the stock subscribed for by the State in the N. C. R. R. was pledged, can prevent the N. C. R. R. Co. from carrying out its contract with your company, remains to be seen. It is hard to over estimate the advantages which the construction of that road would be to the business of your line, and no effort to secure this should in the future be wanting.

It is hoped that, notwithstanding the difficulties which have been thrown in the way of this enterprise, that its importance is such as to overcome all at no distant day.

A sale has been made of the Rogersville and Jefferson Railroad during the year for $25,000, to Maj. W. P. Elliott, and a lien retained on the road to secure the payment of the purchase money.

Notwithstanding the diminished earnings for the past year, and probably for the year on which we have entered, there is nothing that we can see in the future to cause discouragement as to the value of your property, so far as the promise of its future business is concerned; but on the contrary, we believe with the return of prosperity, and with the growth of the country, there will be a healthy increase in the traffic of the road, sufficient to enable it to make the necessary renewals and increase the dividends. But while we can speak thus hopefully respecting the legitimate business prospects of your road, we regret to be compelled to say that the disordered state of the public mind throughout the country towards railroads, and the tendency of all classes and professions to disregard the plainest and most common principles of justice when applied to railroads, are causes of most serious concern to the owners of this class of property. Reference is made to the remarks of your able and efficient Vice-President on this subject.

It seems now, that instead of regarding railroads in the light of public beneficiaries, and treating them as such, at least a large part of the community are greatly prejudiced against them, and are constantly doing something or other to impede their progress. It has been the constant endeavor of the officers of your company to operate the road in a spirit of the utmost liberality and usefulness towards the public; and we trust that this fact, when better understood, will tend to abate such injurious and unjust litigation as has disturbed and impeded your legitimate and laudable business pursuits for the past year or two.

By reference to the report of the Vice-President, it will be seen that the public along the line of your road is accommodated with equally as cheap, if not cheaper, local transportation than that afforded to any other section of the country, and both passenger and freight trains have been run with regularity and with remarkable freedom from accident.

The following is a comparative statement of the gross earnings, operating expenses and net earnings for the years ending June 30—

	1870.	1871.	1872.	1873.	1874.
Through passengers	$266,998 28	$215,778 10	$228,593 66	$226 898 29	$153,924 55
Local passengers	159,611 25	176,859 65	151,087 00	146,246 20	120,711 25
Conductors' collections	62,599 02	48,306 21	55,485 77	60,488 25	48,986 44
Mileage tickets	4,598 60	5,490 00	5,745 00	5,480 00	5,190 00
Through freight	308,066 40	869,194 15	841,362 09	401,346 80	324 916 65
Local freight	384,446 59	390,706 81	331,485 49	455,425 64	381,491 57
Express	26,494 61	26,700 00	23,823 75	14,090 00	7,508 82
United States Mail	33,595 51	39,265 00	46,839 37	57,457 50	57,457 50
Miscellaneous	28,688 64	19,944 20	17,119 75	10,975 68	10,997 74
	$1,278,868 80	$1,287,323 62	$1,201,491 77	$1,378,358 46	$1,111,184 02
Expenses:					
Motive power	$187,959 45	$208,800 49	$190,688 22	$161,428 15	$128 169 74
Maintenance of cars	104,324 86	119,196 81	91,953 86	106,194 05	77,410 22
Transportation	149,396 81	130 492 85	139,578 30	159,824 40	122,066 94
Repairs of roadway	299,914 08	414,891 49	293,016 20	351,215 08	244,289 96
Fuel consumed	49,964 21	51,041 80	72,229 20	80,096 25	70,318 61
General expenses	71,505 87	81,024 23	47,339 60	70,895 49	55,203 02
	$868,064 27	$1,004,945 67	$834,800 38	$929,148 04	$697,408 49
Net earnings	$415,799 53	$282,377 95	$366,691 39	$449,210 42	$413,775 53

The percentage of expenses to earnings in 1874 is 62.75, against 67.40 in 1873, 69 in 1872 78 in 1871, and 67.5 in 1870. Included in the expenses of 1874 is the cost of building new cars, and 559 tons re-rolled iron laid down in June, 1873, at a cost of $20,968 50. During the year the passenger depot at Knoxville has been completed, at a cost of $10,884 84; and the Westinghouse Air-Brake placed upon 14 engines and 26 cars, at a cost of $10,194 40. Twenty locomotives have been changed from wood to coal burners, at a cost of $190 each. New iron laid, 16¼ miles, all of which has been paid for, making upward of 22 miles of new iron paid for during the year just closed, including the 559 tons laid in June, 1873. Additions have been made to side tracks to the extent of 4,060 feet. The Superintendent suggests that from 20 to 25 miles of new iron be laid down during the present fiscal year.

The company have, during the past year, refitted 6 passenger coaches, built 10 new stock cars, and rebuilt 7 flat, 43 box and 10 stock cars, at an aggregate cost of $35,675

The equipment now consists of 40 locomotives, 13 first class, 10 second class and 10 half-seated passenger coaches; 3 U. S. postal, 4 mail and baggage, 1 pay, 1 wrecking, 848 box, 23 stock, 175 flat and coal, 80 dump and 13 crank and lever cars.

The number of miles run by locomotives on passenger trains was 298,120; on freight trains, 375,864; on material trains, etc., 66,198—total, 740,182.

Earnings of passenger trains per mile run, including mail and express pay $1.32. Earnings of freight trains per mile run, including amount received from miscellaneous sources, $1.91. Pounds of freight carried in 1874, 384,646,186, against 443,194,654 pounds in 1873, 344,789,387 in 1872, and 371,669,089 in 1871.

CONDENSED BALANCE SHEET, June 30, 1874.

Vice President.—CHARLES M. MCGHEE.

Directors.—R. T. Wilson, Joseph Jaques, S. D. Reynolds, Adrian Iselin, Jos. H. Earnest, R. H. Richards, S. B. Boyd, Dr. Wm. R. Sevier, Thos. G. Barrett, Wm. C. Kyle, R. C. Jackson, C. M. McGhee, Jos. R. Anderson, John Talbott, M. K. Jesup.

Secretary & Treasurer.—JAMES G. MITCHELL.

Auditor.—O. H. P. ROGAN.

☞ The St. John (N. B.) *News* says that the track on the western end of the International Railway between St. John and Penobsquis has been relaid with the new and improved fish plate rail, except for a distance of four miles between Passekeag and Hampton, from which the old rails are being taken up and replaced by new ones. The line from Penobsquis to Shediac is the only portion on which the new rail remains to be put down.

Erie Railway.

CAPTAIN TYLER'S REPORT.

(Continued from page 1509.)

Of these rails, which may, omitting the sidings and adding 50 per cent. for third rail as mixed gauge, be taken at 1,265 miles on the main lines and branches, 93.18 miles are of iron more than ten years old; 24.85 miles are of iron more than nine years old; 10.24 miles are of iron more than eight years old; 17.76 miles are of iron more than seven years old; 20.58 miles of iron and 14.45 miles of steel are more than six years old; 53.21 miles of iron and 68.15 miles of steel are more than five years old; 111.87 miles of iron, 10.15 miles of steel top or silicon rail, and 3.50 miles of steel are more than four years old; 77.38 miles of iron, and 15.90 miles of steel-top or silicon rail are more than three years old; 62.91 miles of iron, and 142.70 miles of steel-top or silicon rail are more than two years old; 8.75 miles of iron and 204.91 miles of steel top or silicon, and 19.50 miles of steel, are more than one year old, whilst 11.30 miles of iron and 216.65 miles of steel-top or silicon iron, and 72.41 miles of steel are less than one year old.

Taking the same 1,265 miles of track, I find that 1,073 miles of rails are fished with iron plates, or secured in some other improved manner at the joints, whilst 192 miles are still laid with chairs only at the joints, including, as regards the main line, 17½ miles on the eastern division, 9.6 miles on the Delaware division, 2.9 miles on the Susquehanna division, 12.5 miles on the western division, and 39 miles on the Rochester division. The remainder of the rails so laid in chairs, for about 110 miles of track, are on the branches only. The sleepers principally used on the Erie are of white oak, chestnut, or hemlock, with an intermixture also of red oak, ash and birch. To show the proportion in which these various woods are employed, it may be stated that there are altogether in the main line and branches, and in sidings, 1,353,051 sleepers of oak and 1,292,580 sleepers of other hard woods; whilst there are 1,909,542 sleepers of hemlock and 54,711 sleepers of other soft woods. There are thus 4,609,834 sleepers altogether in the track, or about 2,800 to the mile for 1,638 miles of main track and sidings, of which about one-sixth require renewal, and there are 527,946 on hand to replace them. Of the oak and other hard wood sleepers, about one-ninth may be said to require renewal, and there are upwards of 342,000 on hand, and not yet laid in the track. Of the hemlock and other soft wood sleepers, about one-fourth may be said to be worn out, and there are 185,889 on hand, and not yet laid in the track. The average cost of these sleepers is as follows:—For white oak, on the Eastern and Delaware divisions and branches, 65 to 75 cents each, and on the Susquehanna, Western, Buffalo, and Rochester divisions and branches, 65 cents each; for red oak, on the Susquehanna and Western divisions, 45 cents each; for chestnut, on the Eastern and Delaware divisions, from 50 to 75 cents each, and on the other divisions 45 cents each; for ash, on the Eastern and Delaware divisions, 50 cents each, and on the Buffalo and Rochester divisions, 45 cents each; for birch, on the Eastern and Delaware divisions, 40 cents each; and for hemlock, on the Susquehanna and Western divisions and branches, 30 cents each, and on the other divisions and branches, 32 cents each. It will thus be seen that hemlock sleepers do not cost half as much as white oak sleepers; but their durability is not, looking to the quality ordinarily obtained on this line, much, if at all more than one-third of that of white-oak sleepers. Having regard to the labor and cost of constant renewal, it is evidently desirable, especially when steel rails are laid down, that sleepers of the more durable qualities should, as far as possible, be employed.

The permanent way, looking at it as a whole, was in some parts in excellent running order, in other parts in fair running order, and in other parts, again, including some of the branches, and portions not yet fish-jointed, in a less efficient condition. While there appeared to be no doubt or difficulty in running the trains along the track, of any weight or at any speed necessary, on the various portions of the line, the principal observation to which a survey of it, as a whole, unmistakably led was that very much might be done in economy of maintenance by the employment of more durable materials. The traffic on the main line, and certain other portions, being very heavy, no other than steel rails ought in future to be laid upon it; and it is very desirable, indeed, that steel rails should be laid over all those portions of the system on which there is heavy traffic (say for about 800 miles) as soon as this can be done. The present is an admirable opportunity for making arrangements with a view to that desirable object, the price of steel rails being less in proportion than that of iron rails; and steel rails were, indeed, to be obtained, while I was in America, at something like the cost price of manufacture. It is very expensive to maintain under a heavy traffic a portion of track composed of materials not thoroughly suited to such a traffic; and there is no means of economy more desirable, more certain, or more satisfactory in all respects than that which may be obtained by employing under heavy traffic steel rails, fished joints, durable sleepers, and an ample supply of ballast, on a well-drained track. The economy to be obtained on a line like the Erie, where the price of labor is high, may fairly be estimated by many hundred thousands of dollars, or as it might almost be stated by hundreds of thousands of pounds annually; and the importance of taking the earliest possible steps towards securing such a result can hardly, from any point of view, be too strongly insisted upon.

The line is, in fact, worked under great disadvantages as regards economy of management and maintenance, because the growth of improvements in this and in other respects has not kept pace with the growth of its traffic; and its traffic again has not increased as it might have done from the want of further judicious expenditure in improving its connections, and in providing further means and facilities for attracting and conducting business. As regards the road-bed and the works more immediately connected with it, money may be advantageously expended in providing extra catch water ditches in the cuttings, and in continuing to improve the slopes of the cuttings. Fewer watchmen will then be required, accidents will be avoided from trains running into earth, or boulders falling from the slopes after being loosened (mainly in the spring of the year), and the cost of repairing the rolling stock, and of compensation for injury to passengers and for damage to goods, may, to a great extent, be avoided.

On the question of doubling the track, it may be observed that this again has not been done as rapidly as the business of the company has required. As has been already stated, there were in 1853, when the total earnings for the year were about $4,800,000, 180 miles of second track; whilst there were in April 1873, when the earnings were upwards of $20,000,000, 241½ miles of double track out of 959 miles of main line and branches. The want of a greater length of double track leads to delays, expense, and risk in working. The engines and the men are kept out for longer hours whilst waiting in sidings, and are tempted to run at high speed along the main line, at considerable extra cost and damage to the permanent way and rolling stock, so as to get out of the way of each other. I frequently observed whilst passing over the line, five or six trains, standing one behind the other, or otherwise waiting to proceed along a portion of single line as soon as it should be cleared by the arrival of a train in the opposite direction. In consequence of difficulties of this character, the president and directors, in May 1873, authorized the doubling of the track over the following distances—namely, on the Delaware division, for five miles between Middaughs and Shohola, and 53 miles between Lackawaxen and Hancock; on the Susquehanna division, for 10½ miles between Erwins and Rathbonville, and 9 miles between Somebodies and Canisteo; on the Buffalo division, for 8 miles between Hornellsville and Burns, and 31 miles between Attica and East Buffalo; making altogether 116½ miles. This included a rock cutting along the Delaware River, not previously undertaken on account of its formidable character, and the heaviest work between Jersey City and Buffalo. The line had been doubled on either side of it, and it was worked at great inconvenience as a single line. The cost of thus doubling 116½ miles, to be laid with iron rails, was estimated by Mr. R. M. Brown, the superintendent of the road, in 1872, at $3,859,365. The work was let to contractors, who were made responsible for accidents, and were liable to fines for detentions to the trains, excepting the 5 miles between Middaughs and Shohola, where there was an almost continuous rock cutting, 40 to 110 feet deep, along the face of a cliff 100 feet above the river. This work was performed by the company's own men, and the remaining work of doubling went forward rapidly until September last, when the operations were retarded from financial considerations. By the middle of December 64½ miles of second track were nevertheless finished and brought into use, including the section of 5 miles between Middaughs and Shohola; and the amount stated to have been expended is $1,998,679, including a considerable amount of work done upon the remaining 52 miles, out of the 116½ miles ordered to be carried out in May 1873. There were, however, up to July 1874, as already shown, 116 miles of single track between Jersey City and Buffalo—namely, 42 miles between Pine Grove and Stockport, 5 miles between Rathbonville and Cameron Mills, 18 miles between Cameron and Canisteo, and 56 miles between Burns and Attica Summit; the alternative sections being doubled for 806 miles—namely, from Jersey City to Pine Grove, 115 miles; from Stockport to Rathbonville, 147½ miles; from Cameron Mills to Cameron, 2½ miles; from Canisteo to Burns, 12 miles; and from Attica Summit to Buffalo, 29 miles.

Out of the 116 miles yet remaining of single track between Jersey City and Buffalo about fifty miles are now ready, and four miles nearly so; so that the whole fifty-four miles is expected to be at work within two months. In carrying out this work the track has been changed, so as to bring the second line sometimes on one side and sometimes on the other side; and advantage has been taken, as far as possible, of the lower sides of the cuttings and of extra width on the embankments; and it is expected that the work will be completed for about 70 per cent. of the estimated cost. But more is urgently required. The completion of a double line for the remaining 62 miles between Jersey City and Buffalo should, with a view to safety and economy in working, and for the accommodation of a constantly increasing traffic, be pressed forward as rapidly as possible, and some extra sidings, in the shape of loop lines, should also be provided, especially on the Eastern division.

MASONRY AND BRIDGES.

Some of the masonry in the viaducts and culverts, as originally constructed, has proved from time to time to be defective, either by the yielding of the foundations or by the action of the frost on stones or work not well calculated to withstand it. These have been or are being repaired as required; and a few large culverts, which I inspected, were under repair in consequence of such defects, at the time of my visit. Of all the bridges and viaducts under the line with spans exceeding 20ft. (besides those of masonry), 183 are constructed of timber and only forty-eight of iron; and thirty-three of these latter have been erected during the past year. A list of these bridges is given in the Appendix No. 1. Wooden bridges, though much cheaper to construct in the first instance, have, nevertheless, serious disadvantages. Not only do they require constant renewal—say, in whole or in part, every nine or ten years, when uncovered, and every fourteen or fifteen years when roofed in, but also there is constant risk of their being destroyed by fire. To avoid this risk as much as possible watchmen are constantly

kept, day and night, at the more important wooden bridges and viaducts, but fires, nevertheless, occur from time to time, and some of the more important works cannot, when they are thus destroyed, be restored without very considerable delay to the traffic. Such delay on the main line, where the traffic is very heavy, and on some of the branches, is so costly that it would be wise to renew in iron the wooden viaducts and bridges as they became worn out; and during the next three or four years an expenditure of $1,500,000 might as shown in detail in Appendix No. 1, properly and economically be devoted to this object.

The most important wooden viaduct on the Erie is known as the Portage bridge, across the Genesee Valley. This is the finest wooden structure of the sort anywhere to be seen; it is 860 ft. long and 234ft. high, is admirably built, and carefully maintained. The worst specimen of timber viaducts were on the Jefferson branch, as to both the foundations and the materials employed. These will require careful watching, and constant work in maintenance, until they are improved and renewed, and thus got into a satisfactory condition. Of the large bridges on the main line, that at Binghamton requires the earliest attention. The bridge work generally appeared otherwise to be in as good condition as could be expected on lines which had been constructed for such periods as the various portions of this railway, and on which so much timber work had been employed. The renewals in iron had been well performed, and the high character of Mr. Channte (the present chief engineer of the company), especially for this class of work, is, I need hardly add, a guarantee for the satisfactory mode in which such renewals will in future be carried out.

Station Buildings.

The station buildings along the line are, for the most part, of wood, and though generally answering the purposes for which they are required, as regards the existing passenger and freight traffic, they are, too many of them, of inferior character. Improved stations have in some places been constructed, more or less at the expense of the inhabitants of the districts, who have been willing, for the sake of improving the value of their properties, to contribute towards the better appearance and more convenient arrangements of the station buildings. Good brick stations have also been erected by the company at certain centres of traffic, and notably at Elmira, where a building 257ft. long and 34ft. wide was constructed, with offices on the second floor, in 1870. It will not be desirable to expend upon this object more money than is absolutely necessary, at all events until the railway has been placed in a thoroughly efficient condition, as regards matters by which more immediate pecuniary results can be obtained, as leading either to an increase of profitble business, or to safety and economy in conducting it. The passenger accommodation is, however, very defective, and substantial structures are required, especially at the following stations, namely—at Jersey City, where the station was partially destroyed by fire, at a cost of $200,000; at Newburgh, Junction, to replace a burnt station, $10,000; at Port Jervis and Binghamton, where the stations of wood are nearly worn out, $50,000 and $25,000 respectively; at Owego, where the station was burnt in 1878, $25,000; at Hornellsville, Attica, and Buffalo, where the stations are nearly worn out; and especially at Buffalo, where the passenger accommodation is of the most miserable description, at a cost of $50,000, $20,000 and $100,000 respectively. Looking to the increase of traffic which may be expected, and, generally, to the conditions of the freight and passenger accommodation, it may fairly be estimated that, including the above (and without taking into the account certain elevators, engine-houses, machine shops, and coal-trestles, which will be elsewhere referred to), the sum of $700,000 may advantageously be spent on these objects during the next three years.

Terminal Arrangements.

As has been explained in a previous part of this report, the Erie have three terminal stations on the Hudson River. The northernmost at Newburgh, 60 miles from New York, is a principal point for the delivery, especially of coal, and may hereafter become exceedingly important for that and other traffic to the New England States. The second is at Piermont, the original terminus of the line, 26 miles to the north of New York. It is now used principally for the delivery of iron ore from the Sterling Mountain, 36 miles distant, for stone-flagging, and for bricks, &c.; but the extensive accommodation which the company here possess may again be made more useful hereafter. The situation affords great facilities for coal-trestles, which might be run down from the upper level at any required height upon the water-frontage. The third, and now the main terminus, is at Jersey City opposite to the city of New York. The station grounds and yards at Jersey City and along the coast to the north of it are extensive and valuable. They comprise (1) the Jersey City station, with a water frontage of 1,050 lineal feet and 84 acres, of which 80 acres have been rendered available for the business of the company; (2) Harsimus Cove, with a water frontage of 530 lineal feet, with 33 acres, of which 2½ acres have been improved and 25 acres are available. Connected with the above by a branch line are the oil yard and docks of Weehawken, with a water frontage of 2,000 lineal feet, and a property of 71 acres, of which 35 have been improved, but all are available. These oil yards, provided with iron tanks and piping, and with steam machinery, are fitted for doing a large and profitable business. There is no oil terminus belonging to any other company which possesses so many advantages. When I first visited the spot, I observed twenty ships of various sizes waiting for their loads, one of them to carry 11,000 barrels, at 6s. a barrel, across the Atlantic. Strict precautions were here adopted against fire, but the night before I left New York one of the iron oil-tanks was struck by lightning, and I had the mortification of seeing the whole establishment in a blaze on the following morning, and of watching the dense black smoke arising from it as I steamed out of the harbor in the afternoon. Mr. J. C. Clarke, then the energetic general manager of the Erie, had already telegraphed in different directions for the necessary men and materials for the reconstruction of the establishment, which was no doubt, without loss of time again put in working order. I understood that the oil therein stored was at the risk of the freighters, and that, having regard to the insurances effected, the loss to the company was not expected to exceed $40,000.

On the north of Weehawken, and at some little distance from it, a branch runs to the cattle-yards, which belong to a separate company, and in regard to the possession of which there may yet be disputes, if not legal proceedings. At all events, the Erie appears to possess a large share in them. They comprise a water frontage of 1 580ft., with a property of 84 acres, of which 16 acres have been improved and are available, while the remainder may be made valuable hereafter for building and other purposes. Wooden buildings were being erected, at the expense of freighters and others interested in the traffic, to these yards; and a profitable business may, in future, be expected. But the cattle rates were, when I was on the spot, not remunerative, in consequence of competition. and the Erie were wisely, as I have previously stated, employing their cattle trucks as much as possible for the more profitable conveyance of oil, and to a very limited extent for cattle traffic.

On the New York side of the water the Erie have three establishments—first, their principal depot at the foot of Chambers street, where also is the building formerly used for their offices, secondly, a passenger depot at the foot of Twenty-third street, to which a large ferry boat runs every half-hour from Jersey City; and thirdly, a freight depot opposite to Brooklyn, on the East River. The docks on the New York side are rented from the city.

There is thus ample space in connection with the termini on the Hudson River for the accommodation of an increasing traffic. Some improvements have recently been effected, or were in progress, with a view to increased accommodation or more economical working. With the same objects it is proposed further to rearrange the tracks and remodel the Jersey City yard, so as to increase its capacity for business, as well as to improve Harsimus Cove, and to construct there a basin lined with warehouses; and it will, no doubt, be necessary to increase from time to time, the accommodation for oil at the Weehawken oil yards.

At Buffalo, the company has altogether, 250 acres of land, of which 14 acres are devoted more especially to passenger traffic and 32 acres to goods traffic in or near the city, and of which 204 acres have recently been purchased to form a yard at East Buffalo. It is intended to remove to the latter yard the engine-houses, shops, and sidings, for shunting and marshalling traffic, which are now on sites more valuable for other purposes; and other improvements are in contemplation, and are much required The yard for east bound business at East Buffalo contains twenty tracks, altogether about 15 miles long; and the west-bound yard is on the other side of the main tracks; and there are large transfer-sheds for changing goods between narrow and broad gauge cars. There is also a Dodd's machine for changing the bodies of the cars from narrow to broad gauge trucks, or *vice versa*. The station and yard arrangements at Buffalo City have grown up gradually, since the principal business of the company was transferred from Dunkirk; and further arrangements are pending, and are very necessary, for the accommodation of the traffic, and for economy in working, especially coal-trestles for the delivery of coal, which is now sent to the trestles of other corporations by an inconvenient and circuitous track, and an extension of the sidings to the elevators. There are numerous elevators for the handling and storage of grain in Buffalo, and it would probably, for many reasons, be more to the advantage of the Erie that their tracks should be connected by sidings with some of those elevators than that they should construct an elevator of their own.

At Rochester there is a brick station and a suitable freight shed; there is also a brick seven stalled engine house, with a workshop annexed; but trestle work, which might be erected at a trifling expense, is much wanted for the economical unloading of coal.

At Dunkirk, the establishments are far in excess of the present requirements of the company. This was, as has already been explained, the original terminus of the line on Lake Erie. An elevator lies idle, and the freight sheds are comparatively unused, though the wharves were covered, when I visited the spot, with great quantities of timber. The commodious machine shops and engine house of brick, are leased to the Brook's Company on terms of an onerous character, elsewhere referred to. The further utilisation of the company's property at this point is a problem worthy of the most careful consideration, and its solution would, especially if loads could be found for vessels westward along the lakes as well as eastward, be of great benefit to the company. They may at some future period be able, possibly, to provide return cargoes of coal from this port, in exchange for grain and ores from the West.

(To be continued.)

☞ It appears from recent advices from Atlanta, Ga., that there have been two receivers appointed by the United States District Court in Georgia for the Atlanta and Richmond Air-Line railroad, viz: A. S. Buford, for the portion of the road lying in the States of North and South Carolina, and L. R. Grant, for that portion lying in the State of Georgia. The order of the court makes the employees preferred creditors, and payment to them will be certain, not only for future earnings, but also for all arrears, provided no suspension of business is permitted to occur.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

American Railroad Journal.

Saturday, December 5, 1874.

Stock Exchange and Money Market.

Money has been without decided change as to rates, but has been in more urgent request for speculative and commercial purposes at the ruling figures. The demand from mercantile sources has been largely for currency for the interior, to be used in the moving of Provisions, Cotton, and Breadstuffs toward the seaboard. This drain has told on the currency reserves of the City Banks, and the Sub Treasury. The free outflow of specie, chiefly to the Continent, has operated against the coin averages of the City Banks. Call loans have been quoted at 3@4, and best mercantile credits at 5½@7 per cent per annum. The Bank of England rate has been advanced to 6 per cent per annum. The U. S. Treasury disbursements, in November, were $12,001,906, exclusive of payments on account of the principal or interest of the public debt. The cash reserve of the Treasury Department on Tuesday was $146,863,073 of coin and currency. The City banks last week reduced their reserve oflegal tender notes $4,202,500, and their deposit item $4,585,480, while also diminishing their specie average $51,600. They likewise report a reduction of $1,063,700 in the loans and discounts, and of $83,900 in their circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $49,566,170 against $52,185,569, the preceding week; and a coin hoard of $54,528,254 against $54,664,610, on the previous return. The City bank exchanges, during the week, were $389,193,020, or a daily average of $77,838,204. The customs revenue of the port, during the week, was $1,434,000. The City banks reported their average of gold last week at $17,329,800, and their greenback average at $53,301,900. Their deposits stood at $222,767,300. The loan item was $282,285,600. The circulation was $24,883,600.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $14,939,375.

The aggregate receipts of the U. S. Sub Treasury at this port in November were $62,810 024, including $6,673,821 from customs; payments $76,016,087, including $5,035,160 of coin interest. The customs revenue of the port shows an increase of $715,534 over that of November last year, which was $5,958,287.

The aggregate of the outstanding U. S. currency, of all denominations, Dec. 1, was $429,987,811 The outstanding amount of legal tender notes is 382 millions. The National bank circulation is $350,193,593.

The U. S. Treasury balances at the opening of business on Wednesday were as follows: Currency, $16,700,000; special deposit of legal tenders for redemption of certificates of deposit, $47,120,000; coin, including $23,000,000 in coin certificates, $83,000,000.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 45 millions.

Under the free shipments of Specie, and the advance of the Bank of England Discount rate to 6 per cent, the Gold speculation has been much more animated and buoyant, though the customs call has been comparatively moderate. Government announces sales of $2,500,000 of Gold for December, embracing half a million on each Thursday of the month. The extremes of the week have been 111⅜@112⅜, closing on Wednesday at 112, as against 111¾ on Wednesday of the preceding week. The specie outflow last week was $2,188,491 mainly to the Continent. The imports of specie at this port since Jan. 1, have been $4,972,962, against $17,328,927 same time last year. The customs demand for Gold last week averaged $286,800 a day. Foreign Exchange has been moderately active, and unsettled in price, with Bankers' sixty day bills on London closing on Wednesday at $4 84½@$4 85⅛; sight bills on London at 4 89½@$4 90⅛ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,068,901. The exports for the corresponding week of last year were $5,403,959, and for 1872 $5,799,772. The total exports since January 1 this year are $265,217,046 against $277,279,045 last year and $217,659,065 in 1868.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,198,752.

Government Securities have met with a very ready sale, throughout the week, at generally advancing prices. The purchases on investment account, partly for shipment to Europe, have been quite liberal. The last public debt statement shows a further liquidation, in November, of $123,427; making the aggregate reduction, since June 30, 1874, $4,190,907.

U. S sixes of 1881 closed on Wednesday of this week at 120¼@120½; U. S. Five-Twenties of 1862, at 112¾@113; U. S. Five-Twenties of 1864 at 114¾@115; U. S. Five-Twenties of 1865 116⅝@116⅞; U. S. Five-Twenties of 1865 consolidated, 118⅞@119⅛; U. S. Five Twenties of 1867, 120@120¼; U. S. Five-Twenties of 1868, 119¾@120; U. S. Ten-forties at 114⅛@114⅜; U. S. Fives of 1881, (Funding Loan) 112⅞@113⅛; Six per cent. currency Sixes from 116¼@116½.

The funded interest bearing debt of the United States is now $1,719,799,900 of coin-bearing bonds, and $14,678,000 of currency bearing issues, exclusive of the currency sixes, issued in aid of the Pacific R. R. enterprises.

Dealings at the Stock Exchange have been on a much enlarged scale, and the general market has been quite buoyant; the speculative temper having been very pronounced in favor of higher values. The demand for State and Railway bonds has been more confident with prices quoted stronger. Railway and miscellaneous share property has been very freely dealt in, as a rule, and has been quoted higher, and on the advance; favored in good part, by the continued ease in Money, notwithstanding the liberal outflow of currency to the interior.

A fairly active business has been reported in the commercial line. The 'long-shoremen's strike, however, has been a serious hindrance to the export trade. Breadstuffs have been in good demand at firmer rates, though closing buoyantly. Cotton and Provisions have been freely dealt in, but at variable prices. Tobacco has been quite brisk and quoted firm; with Kentucky Leaf most sought after, chiefly for export. Petroleum, Wool, Naval Stores, Hides, Hardware, and Building Materials have been rather moderately inquired for, and quoted irregular. Dry Goods have been slow of sale. Groceries have been attracting less attention; Coffee, Sugars, and Molasses, quoted easier in price. The Metal trade has been on a very moderate scale, apart from Ingot Copper, which has been in brisk request and quoted firmer. Iron Rails have been in light demand in the local market. The New Dominion Government is reported as having recently contracted for 40 000 tons of English Steel Rails, on the basis of $54 gold per ton, deliveries next Spring. Eglinton Pig Iron quoted from yard at $37; Glengarnock, $39@$40; No. 1 American Pig at $26@$28 00; No. 2 do. at $25@$27; Forge, $23 50@$27; English Rails at $48@$50, gold; American Rails at works, $55@$60; Old Rails, $30. Wrought Scrap, $30@$32. Ocean freights have been moderately active with rates generally advanced. The freighting of vessels has been seriously impeded by the strike of the 'long shoremen.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Finances of Ohio.

From the report of the Treasurer it appears that the total receipts into the State Treasury, including balances from previous report, were $5,885,041 96, and the actual disbursements $5,072,644 77, leaving a balance in the Treasury November 15, 1874, of $812,397 19, to the credit of the following funds, viz:

General Revenue fund	$198,875 98
Sinking fund	450,569 82
Asylum fund	40,224 08
Common School fund	127,727 19
Total	$812,397 19

The report of the Commissioners of the Sinking Fund states that during the six months ending November 30, 1874, the receipts have amounted to $795,041 63. During the same time the disbursements have been: for principal of funded, debt, $93,792 75; interest on funded debt, $249,672 38; interest on irreducible debt, $27,000; expenses, $1,006 68; total, $371,471 81, leaving a balance in the Treasury, November 15, 1874, of $423,569 82. The total public funded debt of Ohio, outstanding on the 15th of November, was $7,988,205 30. Of this amount $1,665 is payable at Columbus.

Albert County Railway.

The Moncton (N. B.) *Times* says that the grading on the line of this road, commencing at Salisbury, is graded from the station to the Petitcodiac river, and from the river south 8 miles, except about one quarter of a mile which will be finished by Christmas. The bridge across the river and connecting these two portions is a very heavy structure, but is well forward—the north abutment and three piers being finished. At the southern end, grading is finished on 2¼ miles, commencing half a mile from the coal track, also on 1¼ miles north of Sodom Creek and about two miles from Mr. Daniels' towards the river. This makes a total of 13 miles (nearly half in length of the whole line) graded and ready for the rails. The middle section is now ready for work, but with the exception of clearing, getting timber for bridges, sleepers and stone, it is not expected that much can be done this winter. The work has been carried forward with remarkable energy.

☞ It is understood that the trains on the Washington and Ohio railroad will commence running to Round Hill, Va., on the 7th inst.

Boston and Lowell Railroad.

The opening trip over the new road between Lawrence and Boston took place on the 30th ult. This new route embraces the connection of their main line with the Salem and Lowell road by constructing a section of track three and one-tenth miles long on the old road bed of the Boston and Maine Railroad between Wilmington station on the Boston and Lowell Railroad and Wilmington Junction. The new road, which lies in the township of Wilmington, was built since the 1st of September by the Boston and Lowell, under the supervision of the corporation engineer, Mr. M. W. Oliver. The line as completed is made up of the following sections of road: Main track of Boston and Lowell 15¼ miles; new branch on old road bed in Wilmington, 3 1-10 miles; Salem and Lowell road from Wilmington Junction to Tewksbury Junction, 2 1-5 miles, and Lowell and Lawrence road, making the distance by the new line from Lawrence to Boston 27¼ miles. At Tewksbury Junction a connection is now made between four roads, viz., Lawrence and Boston, Lowell and Andover, Salem and Lowell, and Lowell and Lawrence. The new road crosses four common roads at grade and passes under the new road from Lowell to Andover, thereby avoiding all "Know Nothing" stops. The road is well ballasted and rides as smoothly as the old parts of the line.

Railroad Earnings.

The earnings of the Ohio and Mississippi Railroad for the four months ending October 31, 1874, were $1,341,742 93, and the expenses $895,565 45, leaving net earnings $446,177 48; from which deduct extraordinary expenses, amounting to $10,782 66, leaving an available surplus of $435,394 82.

The earnings of the Atlantic and Pacific Railroad Company for the week ending November 21, 1874, were $98,400; earnings for the corresponding week in 1873, $97,627; decrease, $4,227.

The earnings of the St. Louis, Iron Mountain and Southern Railway Company for the third in November, 1874, were $87,500; 1873, $47,817 77; increase, 1874, $39,682 23.

The earnings of the Marietta and Cincinnati Railroad for the third week of November were $44,056—an increase of $7,281 on same week of 1873. Total for fiscal year commencing January 1s, 1874, $1,847,021—a decrease of $87,910 on same time of 1873.

The gross earnings of the Rome, Watertown and Ogdensburg Railroad for October, 1874, were $123,674, the expenses $73,168, and the net earnings $50,506, an increase over the previous year of $15,581.

Lowell and Andover Railroad.

The opening of the new line of communication between Lowell and Boston, via the Boston and Maine and Lowell and Andover Railroads, took place on the 1st inst. The Lowell and Andover Railroad company was organized February 15, 1873, and a thorough and complete survey of the line was made by Mr. Edward Appleton, of Boston, in March and April of that year. The estimated cost of the road was $750,000. The building of the road was insured by a contract with the Boston and Maine Railroad Company in June 1873. The lease of the road by the Boston and Maine is for ninety-nine years from the 1st of December inst., at 7 per cent. interest on its cost, not exceeding $750,000, payable semi annually; the Boston and Maine Company to keep it in repair and pay the taxes. The cost of the road, including land damages, is about $750,000. Mr. George D. Rice, a brother of the contractor, has had general charge of the building of the road, and Mr. Fred R. Page of Lowell has been the assistant engineer. The present Board of Directors are Frederick Ayer, Josiah Gates, E. M. Sargeant, Jacob Rogers, Horace J. Adams, Stark Tolman, G. V. Fox, George Ripley and Jacob Nichols.

☞ The various contractors engaged in building the valley railroad between Staunton and Lexington, Virginia, are prosecuting the work with vigor.

Statement of the Public Debt of the United States December 1, 1874.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$5,416 67
6 per cent. 1881 bonds, 1861	18,415,000 00	460,375 00

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$647,128 00
Kansas Pacific bonds, 1862-64	6,303,000 00	157,575 00
Union Pacific bonds, 1862-64	27,236,512 00	680,912 80
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	40,000 00
Western Pacific bonds, 1862-4	1,970,560 00	49,264 00
Sioux City and Pacific bonds, 1862-64	1,628,320 00	40,708 00
Totals	$64,623,512 00	$1,615,587 80

Interest paid by United States, $24,325,396 98; interest repaid by transportation of mails, &c., $5,510,044 07; balance of interest paid by United States, $18,815,352 91.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, November 30, 1874.

B. H. BRISTOW,
Secretary of the Treasury.

Prince Edward Island Railway.

The lines of railway now rapidly approaching completion in Prince Edward Island are 290 miles in extent. The island is only 140 miles long in its greatest length by 34 in maximum width, the total area being only 2134 square miles. The last census showed the population to be 94,021, or 44 to the square mile. This gives 472 inhabitants for every mile of railway. There is no through traffic whatever in prospect, and the railway must depend altogether upon local trade for revenue, the maximum estimated amount of which for some time to come is only $150,000 per annum. No margin whatever is allowed or expected for profit. It is hoped that the interest on the amount expended for construction will be realized in the development of the resources of the province, which, notwithstanding its long, severe winter, which isolates it almost entirely from the outer world for from three to six months a year, is frequently called the "Eden of British America."

☞ It is announced that the Anaheim branch of the railroad in Los Angeles county, Cal., will be completed by the middle of December. All the grading is now finished.

Allegheny Valley Railroad.

A meeting of the creditors of this company, called by the U. S. District Court, was held in Pittsburg, Penn., on the 27th ult., the object being to effect a settlement of existing difficulties with the unsecured creditors by tendering to them, and the acceptance by them, in full payment of their claims, amounting to $5,491,819 74, Twenty years' Income bonds, bearing seven per cent interest, guaranteed by the Pennsylvania Railroad Company, the Northern Central Railway Company, and the Philadelphia and Erie Railroad Company, with ten per cent placed in the Safe Deposit Bank, Pittsburg. A statement of the assets and liabilities of the company was read, of which the following is an abstract:

ASSETS.

Main Line, 132 miles of track from Pittsburgh to Oil City	$10,251,470 41
Plum Creek branch	80,000 00
Low Grade Division (Bennett's branch)	9,500,000 00
Sligo branch	262,776 93
Equipment, including seventy three locomotives and twenty first class passenger cars	1,907,700 00
Real estate and machinery	756,524 56
Stock in Oil Creek and Allegheny River Railroad	348,500 00
Stock in Brady's Bend bridge	40,000 00
Cash on hand	47,068 12
Balance due from agents	26,609 44
Total assets	$23,220,649 46

LIABILITIES.

First mortgage bonds	$57,000 00
Second mortgage bonds	8,000 00
General mortgage bonds	3,916,000 00
First mortgage bonds, Bennett's branch	10,000,000 00
Second mortgage bonds, Bennett's branch	3,500,000 00
Other bonds and debts secured by mortgages	281,443 97
Taxes due to State	57,260 64
Unsecured debt, as per list of creditors and amounts due in detail, presented herewith	5,491,819 74
Total of debts	$23,311,524 35

It will be seen that the total assets of the company amount to $23,220,649 46, of which $22,758,471 90 represent roads, equipment, real estate and machinery. The total liabilities are placed at $23,311,524 35, of which $17,819,704 61 are secured and preferred, leaving an unsecured debt, as stated above, of $5,491,819 74.

The proposition of the company was accepted by all the creditors present, representing about two-thirds of the whole number, and about the same amount of liabilities. It is necessary that it be ratified by three-fourths of the whole number of creditors. It is expected the remainder will sign the agreement, and that matters will be satisfactorily arranged in a short time. Such being the case the bonds will be issued forthwith.

☞ Work will be resumed on Monday next in the new rail mill of the Rensselaer Iron Works at Troy under the old scale of employers' prices, which the workingmen refused to accept at the time of the late strike. There are more applicants for work than can be furnished with employment.

☞ The New York and Canada Railroad was opened for travel between Whitehall and Port Henry on the 30th of November. The road will be entirely completed within one year.

Meeting of Pig Iron Manufacturers.

A meeting of pig iron manufacturers was held at the office of the American Iron and Steel Association in Philadelphia on the 24th ult., and was attended by large producers of iron in Pennsylvania and Maryland. Among those present were: B. S. Levan of the Lehigh Valley Iron Co., Coplay, Pa.; Dr. L. Rook, Union Furnace, Lewisburg, Pa.; W. H. Ainey, Lehigh Iron Co., Allentown, Penna.; William Stickney, Stickney Iron Co., Baltimore, Md.; Horace Brook, Birdsboro, Iron and Nail Co., Birdsboro', Pa.; T. A. Morris, Pottstown Iron Co., Pottstown, Pa.; and of Morris, Wheeler & Co., Philadelphia; Dennis Bauman, Carbon Iron Co., Parryville, Pa.; B. B. Thomas, Conestoga Furnace, Lancaster, Penn., and Matilda Furnace, Mount Union, Pa.; Samuel Fulton, Plymouth Furnace, Conshohocken, Pa.; Wm. E. S. Baker, Duncannon Iron Co., Duncannon, Pa., and Bloomsburg, Pa.; J. B. Moorehead, Union Furnace, Conshohocken, Pa.; James Hooven, Norristown Iron Works, Norristown, Pa.; Percival Roberts, Glamorgan Furnaces, Pa.; G. W. Whittaker, Saucon Iron Co., Hellertown, Pa.; C. S. Kauffman, Kauffman Furnace, Columbia, Pa.; Isaac McHose, Temple Iron Co. and Millerstown Iron Co., Reading; G. Dawson Coleman, Lebanon Furnace, Lebanon, Pa.; Samuel J. Reeves, Phœnix Iron Co., Phœnixville, Pa.

Hon. G. Dawson Coleman presided at the meeting, and Mr. George W. Cope acted as Secretary.

Mr. Ainey explained the objected of the meeting, and predicted ruin to the trade if the present production was kept up. He suggested the formation of an "Ironmongers' Exchange," with branches in the producing centres to fix the price of pig iron. The Allentown Iron Company, he said, had run on full time all the year, while in the other furnaces in the Lehigh Valley the production has only been on half their capacity. There is only about one-third the usual demand now, excess from the pipe mills. Dr. Rook said they had sold but half their product. It had become a question whether they should curtail the production and fix the price for iron, or go on injuring one another. Mr. Eckert and Mr. Kauffman, both spoke in favor of a combination. Mr. Reeves said that the Phœnix Iron Co. has one of their two furnaces blown out, and it would be better to blow out both, but they kept one running for the good of Phœnixville. He thought the bar iron men were as badly off as the pig iron men. The prices of coal and transportation he thought would have to be reduced. Mr. Whittaker blamed the coal combination, which controls prices in Philadelphia, for much of the trouble. Mr. Kauffman thought that it would be better to pay the men $4 or $5 a week, and let the furnaces stand idle, than to go on at the present rate. Mr. Bennett said that in the western portion of Pennsylvania, and in Ohio, the iron men own their own coal, and are not under the control of coal combinations, but the condition of the trade there is as bad as in the East. So many furnaces have been built that they interfere with the sale of the surplus Eastern pig iron. Half the furnaces have been blown out, and yet foundry iron has been sold almost as low as pig iron. He said that if the producers of pig iron would in the next sixty days blow out for four months, foundry iron would sell at $32 in the Lehigh Valley. Mr. Coleman said that the only way to do is to blow out and make the coal men come down, which they would soon do if the furnaces stopped.

On motion of Mr. Ainey the following resolutions were adopted:

Resolved, That it must be self evident to all furnace owners that the large reduction in the demand for the consumption of pig iron imperatively demands a corresponding reduction in the amount produced, and that a continuance of the present over production cannot fail to result in accomplishing the ruin of the trade.

Resolved, That it is the opinion of this meeting that an earnest effort ought to be made to accomplish a reduction of the make of pig iron, and that with this in view a committee of seven be appointed to devise some plan to that end.

Resolved, That the chairman pro tem. of the Pig Iron branch of the American Iron and Steel Association be requested to call a meeting of all the pig iron manufacturers of the country at the rooms of the Association on the tenth day of December, 1874, at 11 o'clock A. M.

Resolved, That a committee in each of the several districts, classified as in the list of iron works, be appointed to wait upon the furnace owners therein, and urge their attendance at the general meeting, and ascertain the views of those not able to attend.

The Chair named as the committee of seven Messrs. Wm. H. Ainey, Allentown; C. S. Kauffman, Columbia; G. W. Whittaker, Hellertown; J. B. Moorhead, Philadelphia; G. Dawson Coleman, Lebanon; H. S. Eckert, Reading, Pa., and Horace Brooks, Baltimore, Md. Adjourned.

☞ Dougherty & Co., bankers, of Harrisburg, Pa., have commenced a suit, in the Circuit Court of Baltimore county, as holders of the preferred second mortgage bonds of the Western Maryland Railroad, for the foreclosure of the mortgage and the appointment of a receiver.

Canadian Pacific Railway

GEORGIAN BAY BRANCH.

SEALED PROPOSALS for the construction of the Georgian Branch of the Canadian Pacific Railway will be received by the Department of Public Works at Ottawa, until the hour of noon on MONDAY, the 21st day of December next.

Intending Contractors must give satisfactory evidence that they possess a capital of at least four thousand dollars per mile, of which twenty five per cent must be deposited with the Receiver-General, or placed to his credit in one of the chartered Banks of the Dominion, in money or in Government securities, before their tender can be accepted.

The length of this Branch will be about 85 miles.

Specifications and general conditions, with a plan or map showing the route, and such information as the Government possess concerning the country through which the line passes, may be obtained at this Department on and after Monday, Nov. 16.

Forms of tender will also be supplied on application after the above date, and no tender will be received except on such forms.

Tenders to be endorsed, "Georgian Bay Branch."

The Government will not be bound to accept the lowest or any tender.

F. BRAUN,
Secretary.

Department of Public Works,
Ottawa, Nov. 6, 1874.

Pacific Railroads.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

The subscriptions to the stock of the Union Pacific Railroad Company amount to $36,783,000, of which $36,762,300 has been paid. The receipts for the year ending 30th June, 1874, from the transportation of passengers were $3,749,998 12; of freight, $5,672,724 01; and from miscellaneous sources, $824,038 03; total, $10,246,760 16. (These figures include "amounts earned for, and withheld by, the United States, for transportation of its passengers, freight, and mails.") The expense of operating the road for the year has been $5,089,789 17, leaving net earnings $5,156,970 99. The entire cost of the road and fixtures to 30th June, 1874, was $112,427,277 46. The total bonded indebtedness of the company is shown to be $75,261,512, of which $27,236,512 is due to the United States. The "floating debt" (not including the company's note for $2,000,000, issued to the "Hoxie contract") is $2,284,878 62, and "sterling loans" £20,000.

The amount of stock of the Central Pacific Railroad Company subscribed is $62,608,800, of which $54,275,500 has been paid. The receipts for the year ending 30th June, 1874, from transportation of passengers were $4,389,718 52; and of freight, $7,638,773 93; total, $12,028,492 45. The operating expenses of the road for the year were $4,816,082 40, leaving net earnings to the amount of $7,212,410 05. At the close of said year the indebtedness of the company amounted to $85,673,181 75, of which $27,855,680 was to the United States. This company embraces, by consolidation, (besides the original Central Pacific Company,) the Western Pacific, the California and Oregon, the San Francisco, Oakland and Alameda, and the San Joaquin Valley Companies.

On the 30th of October, 1869, a board of eminent citizens, appointed pursuant to a joint resolution of Congress, reported that the sum of $2,162,750 would be necessary to supply deficiencies in the Central Pacific and Union Pacific roads. Mr. Secretary Cox accepted their report and made it the basis of the adjustment of the land grants to said companies. He directed half the lands inuring to them under acts of Congress to be withheld until these deficiencies should be supplied. Commissioners appointed during the current year have re-examined the roads and reported the deficiencies supplied. Pursuant to your direction, Mr. Secretary Cox's order has been revoked, and the lands due the companies will all be patented to them.

Stock of the Central Branch Union Pacific Railroad Company was subscribed to the amount of $1,000,000, of which $980,600 was paid. The receipts for transportation of passengers for the year ending 30th June, 1874, were $44,080 86; and for freight, $84,407 71; total, $128,488 07. The actual amount expended on said road for the year is $147,918 43. The cost of the road and fixtures has been $3,763,700. The company's indebtedness (in addition to the first mortgage bonds, $1,600,000, and the Government loan, $1,600,000) is $308,966 96.

The amount of stock of the Kansas Pacific Railway Company subscribed is $9,992,500, and the amount paid in is $9,689,950. Total amount of stock allowed by law, $10,000,000. The receipts for the transportation of passengers for the year ending 30th June, 1874, are $1,363,090 99; for freight during the same period, $1,982,060 69; miscellaneous earnings, $64,184 50; total, $3,409,336 18. The cost of construction and equipment of six hundred and thirty nine miles of main line and thirty three miles of branch line (six hundred and seventy two miles) has been $34,359,540 66. The total funded debt of the company is $27,801,600, of which $6,303,000 is due the United States. Other liabilities and indebtedness, $3,126,235 99; total, $30,427,835 99.

Stock of the Sioux City and Pacific Railroad Company to the amount of $4,478,500 has been subscribed of which $1,791,400 has been paid in. The receipts for the year ending 30th June, 1874, from the transportation of passengers, were $84,922 85; of freight, $209,722 02; from express, $3,008 98; and from miscellaneous sources, $22,165 27; total, $319,819 12. The expenses during that period were $263,703 52, leaving net earnings $56,115 60. The indebtedness of the company is $3,387,210 99, of which $1,628,320 is due to the United States. This road commences at Sioux City, Iowa, and extends to Fremont, Nebr., where it intersects the Union Pacific Railroad, a distance of 101.77 miles.

At the close of the year ending 30th June, 1874, the amount of subscribed stock of the Southern Pacific Railroad Company of California was $15,429,200, of which $14,071,100 was paid. The cost of surveys, up to the end of said year, has been $125,043 40. The amount received for transportation of passengers was $512,637 53; of freight, $536,050 58; total, $1,048,688 11. The expenses of the road and its fixtures for the year were $478,647 48, leaving net earnings $570,040,63. The indebtedness of the company is $11,000,000. You accepted the fifth section of this road on the 9th of May last; and, on the 26th instant, an additional section of twenty miles, making the total number of miles accepted 160.26.

Stock of the Atlantic and Pacific Railroad Company, to the amount of $19,760,300, has been subscribed and paid in. The road is completed from Pacific Mo., to Vinita, Ind. T., a distance of three hundred and twenty seven and a quarter miles. The expense of additional equipment within the last fiscal year has been $726,666 63. The lease

of the Saint Louis, Lawrence and Denver Railroad by this company on the 29th June, 1872, for a period of nine hundred and ninety nine years, has, by mutual agreement, been canceled. The cost of the surveys to 30th June, 1874, was $323,927 36. The amount received from passengers on the Atlantic and Pacific division was $272,011 26; on the Pacific Railroad of Missouri and leased lines division, it was $1,005,062 29; total, $1,277,073 55. The amount received from freight on the Atlantic and Pacific division was $949,768 15; on the Pacific Railroad of Missouri and leased lines division, $2,665,498 17; total, $3,615,261 32; entire receipts, $4,892,334 87. The cost of the Atlantic and Pacific Railroad and fixtures to 30th June, 1874, was $37,250,732 36. The running expenses of the road from 30th June, 1873, to 30th June, 1874, were $642,091 80, and the same expenses of the Pacific Railroad of Missouri and leased lines during said period were $2,201,308 31; total expenses, $2,843,400 11. The indebtedness of the company is as follows: Bonded debt of the South Pacific Railroad Company, secured by mortgage of lands assumed by this company, $7,190,000; Atlantic and Pacific company's bonds, dated July 1, 1868, (twenty years), $2,840,000; same company's Central division first mortgage railroad and land grant bonds, dated November 1, 1871, $1,195,500; same company's Central division land grant bonds, dated November 1, 1871, $795,000; same company's second mortgage railroad and land grant bonds, dated November 1, 1871, $1,189,500; same company's equipment bonds, dated June 27, 1873, $753,000; same company's 6 per cent. bonds, dated December 1, 1873, $1,149,800; (and scrip outstanding, $513,946 81;) 6 per cent. income bonds, dated December 1, 1873, $375,300; land debentures, dated January 1, 1874, $12,000; total bonded indebtedness, $15,500,100; floating indebtedness, $2,478,029 82; entire indebtedness, $17,978,129 82. Assets of cash debts due company, and securities other than of this company, amounting to $1,861,431 29, on hand.

Stock of the Northern Pacific Railroad Company (as shown by last report) to the amount of $100,000,000 has been subscribed, and certificates for 202,326 shares, of $100 each, have been issued. The main line of the road has been built and is now in daily operation from Du Luth, on Lake Superior, westward to Bismarck, on the Missouri River, a distance of four hundred and fifty miles, and from Kalama, on the north side of the Columbia River, in the Territory of Washington, northward to Tacoma, on Commencement Bay, Puget Sound, a distance of one hundred and five miles. The cost of the surveys of the lines of the road, including necessary purchase of right of way, has been $1,108,893 75. The extent of lines surveyed is 9,388 miles, and, in addition, 2,350 miles of river reconnaissance. When the final locations shall have been made, the number of miles surveyed will be about 12,000 and the cost of the surveys will aggregate about $1,500,000—equal to $125 per mile. The company owns, by purchase, an equal half of the Lake Superior and Mississippi Railroad, from Du Luth to the junction with the Northern Pacific Railroad, a distance of twenty four miles. In 1873 the road was definitely located west of Bismarck from the mouth of Heart River, a tributary of the Missouri, to the mouth of Glendive Creek, a tributary of the Yellowstone, a distance of two hundred and five miles. This portion of the line has been made ready for construction, and bids have been received, after public notice, for clearing, grubbing, grading, and bridging the entire distance. The company's report states that it is safe to estimate that the next two hundred and five miles of road west of Bismarck can be constructed at a maximum cost of $20,000 per mile, if paid for monthly and in cash. The precise point at which the road will cross the Missouri River, has not yet been fixed, but it is considered safe to assume that a bridge can be erected, without great cost, within two miles of and above Fort Abraham Lincoln, at which point the river is about 3,500 feet wide. West of the mouth of Glendive Creek, and east of the junction of the Deer Lodge and Blackfoot Rivers, all in Montana Territory, the line has not been definitely fixed. The location will, however, probably be made along and up the right (south) bank of the Yellowstone as far as a point opposite the mouth of Porcupine Creek, a distance of two hundred miles from the mouth of Glendive Creek. From the mouth of the Porcupine, on the Yellowstone, to the junction of the Deer Lodge and Little Blackfoot Rivers, a distance of about three hundred and fifty miles, the location of the line has not been decided on. The hostility of the Indians constitutes an obstruction to engineering work. The amount received from the transportation of passengers on the road (in both the Pacific and Minnesota divisions) for the last fiscal year was $250,878 73; from freight transportation for same period on said divisions, $737,252 67; total, $988,131 40. The expense of the road and fixtures has been: for surveys, $1,108,278 52; construction, including docks and wharves, $14,446,356 54; auxiliary and connecting rail and water lines, $2,728,980 09; equipment, $2,434,346 25; general expense, including officers' salaries, traveling expenses, taxes, rent, attorneys' fees, &c., $635,454 71; total, $21,353,416 11. The indebtedness of the company is as follows: first mortgage bonds, (dollar,) $28,847,600; first mortgage bonds, (sterling,) $1,250,000; bills payable, $702,293 36; accounts payable, $75,442 20; bonds and scrip issued to fund interest, $683,804; total, $31,558,689 56. On the 1st of December last you accepted a section of 196.4 miles of this road, and on the 12th of May of the present year a portion of 40.1 miles, making a total number of miles approved 529.41.

December 5 last I accepted the southern division of the Cairo and Fulton Railroad, (125.96 miles,) commencing at the Arkansas River, (Little Rock,) and ending at the Red River, (Fulton;) also, the first twenty five miles, lying immediately south of the boundary line between the States of Missouri and Arkansas.

The amount of stock of the Texas and Pacific Railway Company authorized by law is $50,000,000; capital stock issued: scrip stock for partial payments on account of subscriptions, $600,000; full paid stock, $1,000,000; total, $1,600,000. The indebtedness of the company is as follows: first mortgage 6 per cent gold construction bonds issued, $9,210,000; first mortgage land grant 7 per cent currency bonds issued, $9,251,000; floating debt, $2,207,444 45; debt of the Southern Pacific Railroad Company to the State of Texas, assumed by the Texas and Pacific Company, $204,964 69; total, $22,473,409 14. The receipts from the transportation of passengers for the year ending 30th June, 1874, were $269,488 86; of freight, $572,453 13; from express, $6,906; United States mail, $14,318 63; from telegraph, $420 17; and from miscellaneous sources, $8,394 83; total, $871,981 62. The expenditures for same period were: for conducting transportation, $184,973 22; motive power, $172,133 51; maintenance of way, $239,794 07; maintenance of cars, $54,357 06; general expenses, $39,474 56; total, $690,732 42; for current construction—improving road, widening gauge, ditching, grading, &c.—$336,319 58. There are three hundred and twenty miles of this road now in operation; one hundred and forty six and nine-hundredths miles (from Marshall to Dallas, Texas,) have been completed and accepted since last report; one hundred and seven miles are graded, bridged, and tied, ready for the iron. The company's assets are as follows: three hundred and twenty miles of constructed and equipped road; one hundred and seven miles of partially constructed and equipped road; three hundred and fifty miles of telegraph line, $20,708,986 68; accounts collectible, $78,481 77; supplies on hand, $188 990 78; cash on hand, $97,183; total, $21,018,642 18. The road will extend from Shreveport, La., on Red River, to San Diego, Cal., with a branch from Marshall, Texas, to Texarkana, there connecting with the Cairo and Fulton Railroad, and from Texarkana, through Paris and Sherman, connecting with the main line at Fort Worth. Over this route the surveys have determined that in an engineering and commercial point of view the line to be adopted is as follows: Leaving Shreveport, the road runs almost due west through Caddo Parish, Louisiana, and through the counties of Harrison, Gregg, Upshur, Wood, Smith, Van Zandt, Kaufman, Dallas, and Tarrant, in Texas, passing through the towns of Marshall, Hallville, Longview, Willow Springs, Gladewater, Hawkins, Mineola, Grand Sabine, Will's Point, Elmo, Terrel, Forney, Mesquitte, and Dallas, to Fort Worth, at the junction of the West and Clear Forks of Trinity River, in Tarrant County. The distance (by the company's line of route, as shown by their report) from Fort Worth to San Diego is 1,457.64 miles; from Shreveport to San Diego, 1,676.64 miles, and from Texarkana to San Diego, 1,693.63 miles. In addition to the main line from Shreveport to San Diego, the company have the Jefferson division, from Marshall to the Transcontinental Division, at a point five miles west of Texarkana, sixty nine miles, (distance from Marshall to Texarkana, seventy four miles,) and the Transcontinental division, from Texarkana to Fort Worth, two hundred and thirty six miles.

The amount of stock of the Denver Pacific Railway and Telegraph Company, subscribed as authorized by law and paid in, is $4,000,000. The receipts for the year ending June 30, 1874, for transportation of passengers, were $165,910 71; of freight, $112,462 74; miscellaneous earnings, $8,152 84; total, $286,525 79. The expenditures for the same time were $130 975 68, leaving net earnings $155,550 11. The cost of construction and equipment of the road to the date above stated was $6,493,800, and the indebtedness of the company to that date was $2,706,223 68.

Boston and Providence Railroad.

The earnings of this road for the years ending September 30, 1873 and 1874, were as follows:

	1873.	1874.

Compared with the previous year, the gross earnings show a decrease of $134,828 99, with a decrease in expenses of $140,899 31. The report says:

The last Annual Report of the Directors of this Corporation, was made to its Stockholders soon after the commencement of what was termed the "panic" in the business community, and which has been followed by a period of almost universal depression and discouragement in every department of industry and traffic, of unexpected severity and duration. More than an entire year has elapsed and still the causes which produced the change from an apparently high condition of prosperity to one of extreme inactivity and depression, have not yet ceased to operate. From these reverses the railroad interest has not been exempt, but has been compelled to bear its full share in the disastrous experience which has attended the commercial and manufacturing enterprises of the country. In presenting that Report the Directors were not unmindful of the fact that the period embraced in its tables had been one of exceptional success in all departments of our operations, and that its results exhibited a larger percentage of increase in our gross receipts over previous years, than in any single year of the existence of the Corporation. In view of the condition of things the Directors called the attention of the Stockholders to the judiciousness of the liberal expenditures which they had made during that season of prosperous traffic, in the following words:

"It will be seen that many of these expenditures have anticipated substantial supplies and improvements required for the future, and thereby enabled us to encounter with safety a less prosperous season, if the present depressed condition of the business of the country should continue for any length of time to affect injuriously its railroad interests.

"In any event, while it is a source of satisfaction to know that our provision for the future has placed us in a position of comparative strength and security, in which to encounter a less prosperous period, it will serve as an admonition to the managers of the Road so to administer the trust confided to them by the Stockholders as to do what is in their power, by exacting such a rigorous retrenchment and such strict fidelity on the part of all who are employed in the service of the Corporation, as will maintain, so far as is practicable, the sound condition, both of its material and its financial affairs, which the Corporation has hitherto enjoyed."

Since these views and purposes were expressed, the experience of the Directors, in common with that of the managers of every other railroad corporation, who have been obliged to witness the steady decline in their receipts for more than a year, has not only justified the prudence of their previous action, but the assurance then given of their intention to apply the only remedy for a reduction of our receipts by a vigorous reduction of our expenses as far as was practicable, has been redeemed to an extent far beyond their expectations.

This will be apparent to the Stockholders, by a careful examination of the accompanying tables furnished by the Treasurer, and a comparison of them with the corresponding items in his statement of the previous year.

It is to be observed also, that the accounts of the Treasurer, exhibit as charges against the earnings of the Road, embraced in its ordinary expenditure, many items which in other, and in the judgment of the Directors, less satisfactory modes of keeping railroad accounts, are not included in this comparative view of the financial condition of the Corporation, and which, if excluded, would largely increase the apparent balance in favor of the reduction of expenses—in other words, according to his system everything is shown upon the books as it exists in fact, so that every Stockholder may be able to judge of the real value of his property in the Corporation without being compelled to sift and analyze the various accounts under which its receipts and expenses are entered, in order to comprehend its actual condition.

It will be seen that there is a largely increased amount of taxation of our property in almost every city and town in which it lies, and though this indicates a greatly increased market value of that property, the property itself is of no greater essential value to the Corporation in carrying on its operations, than if it stood at its original cost. There is also in these accounts a considerable item of interest which does not ordinarily appear in railroad accounts as charged to expenses, and which has arisen mainly out of new acquisitions of property by the Corporation in other connecting roads authorized by the Stockholders by their vote in 1872, the wisdom of which action has been amply vindicated by its results. Although authority was then given to the Directors to issue bonds to the extent of one million of dollars, they have not thought it expedient to burden the Treasury for so long a period as twenty years with a debt that can probably be met within a much shorter period. They have therefore limited the issue of bonds to one half the sum authorized, and for the further requirements of the Corporation have given its notes payable at various periods from one to seven years, and in such sums as, with a fair degree of prosperity from year to year, will enable us without inconvenience to pay the whole indebtedness thus created within the last mentioned period.

The report of the Directors to the Railroad Commissioners shows the number of miles run by our trains during the year to have been 789,468, against 816,554 in the last previous year. The whole number of passengers carried this year 8,486,280, against 3,741,580 for the former period. The whole number carried one mile 38 625,149, against 41,224.077, and the number of tons of freight carried this year 738,668, against 827,575. Notwithstanding this temporary falling off in the business of the road, it is a gratifying feature of the statistics furnished by the Treasurer, that of the $134,828 99 in the reduction of our receipts, nearly $100,000 of it is due to the diminution of our freight business, and only about $35,000 to the falling off of receipts from passengers. It is still more a source of satisfaction to the Directors to be able to state that of the large number of passengers transported on our trains not one has been injured in the cars.

We have laid during the year 18¼ miles of steel rails, including 2¼ miles on the Providence Division, not heretofore reported, giving us 59 miles of track upon which they have been substituted for the less durable and in the end less economical iron rails with which the road was originally constructed. Under the system of renewals which has been adopted, we shall soon have the entire road laid with steel, the result of which will be, not only to reduce in a great degree the annual amount of this large item of our expenses, but to diminish in a large measure the annual cost of wear and tear of the equipment of the road. The good effects of this change from iron to steel are already apparent, in both these respects; neither the road, nor its equipment, having ever been in as good a condition as they are at the present time.

In submitting this Report of our operations for a year which the Directors trust and believe will prove to be exceptional in its depressing influences upon the railroad as well as all other industrial interests, they deem it a fair subject of congratulation, that what has been accomplished during so unfavorable a season, has required them neither to diminish the customary dividends to the Stockholders, nor to abridge in any essential degree the convenience and comfort of the traveling public, while they have still maintained in all its departments the high standard which has been attained, both for the road and its equipment, in completeness and efficiency.

President.—John H. Clifford.

Directors.—John H. Clifford, George W. Hallet, T. P. I. Goddard, Wm. R. Robeson, F. M. Weld, Joseph W. Balch, Henry A. Whitney.

Treasurer.—B. B. Torrey.

Superintendent.—A. A. Folsom.

Erie Railway.

CAPTAIN TYLER'S REPORT.

(Continued from page 1541.)

International Bridge Connection.

During the past year a branch, 4¼ miles long, has been constructed, between a junction with the Niagara Falls branch, near East Buffalo, and the International bridge recently constructed in connection with the Grand Trunk of Canada at North Buffalo. The completion of this branch was for some time delayed, in consequence of obstructions placed in the way of the Erie by the New York Central in regard to the crossing of the tracks of the latter company. But a commission, legally appointed at Buffalo, has at length decided upon the terms of the crossings, and the connection has been made. It will form a link in an important route, between Chicago and Jersey City, via the Michigan railways, the Canadian railways, and the Erie. The full advantage of it, can, however, hardly be realised until the gauge of the Erie has been changed; and in the meantime, machines will be required for transferring the bodies of the cars between narrow and broad gauge trucks, to avoid damage and delays to the through traffic in the transhipment of the contents of the cars. Looking to the nature of this through route, to the distance by it between Chicago and New York, and to the terminal facilities on the Hudson River of the Erie, it will undoubtedly form one of the best routes for the conveyance of the produce of the West to the Atlantic seaboard; and it will also form, when other improvements have been carried out, an excellent route to points in the New England States.

The Erie will further be able, in seasons when the navigation is closed, to send by it return cargoes of coal into Canada and to the westward.

Improvements of Gradients.

In consequence of the configuration of the portions of the Allegheny range, and of the country occupied by the Erie, between Jersey City and Lake Erie, that line passes over six summits, already referred to—namely, the summit between the Hudson and the Wallkill rivers; the Otisville summit, 895ft. above the sea, between the Wallkill and Delaware rivers, and 75¼ miles from New York; the Gulf summit, 1,366.38ft. high, and 184 miles from New York, between the Delaware and Susquehanna rivers; the Almond summit, 1,760 .17ft. above the sea, and 344 miles from New York, between the Susquehanna and Genesee rivers; the Cuba summit, 1,677.42ft, high, and 377¼ miles from New York, between the Genesee and Allegheny rivers; and the summit between the Allegheny and Lake Erie, 1,595.58ft. above the sea, and 436 miles from New York.

The ruling gradients of the Eastern division, 87¼ miles long, between Jersey City and Port Jervis, are now 60ft. per mile in each direction; those of the Delaware division, 104¼ miles long, between Port Jervis and Susquehanna, are 16ft. per mile, rising westward, excepting at the Gulf summit, between Deposit and Susquehanna. This summit is approached from the east, on gradients of 57ft., and from the west of 60ft. per mile, and the trains are assisted over it by pushing engines, at an additional cost of about $90,000 a year. The ruling gradients of the Susquehanna division, 139¼ miles long, between Susquehanna and Hornellsville, are 11ft. per mile in each direction. The gradients of the Buffalo division, 91 miles long, between Hornellsville and Buffalo, though somewhat irregular, may be stated at from 44ft. to 48ft. per mile in each direction as a maximum. On the western division, 128 miles long, between Hornellsville and Dunkirk, the ruling gradients are 52ft. to the mile ascending westward, and 40ft. to the mile ascending eastward.

An ordinary locomotive engine, with cylinders 16in. in diameter, by a stroke of 24 in., with driving wheels 5ft. in diameter, and weighing 30 to 35 tons, can thus take only sixteen loaded cars over 87¼ miles of the Eastern division, over 6 miles of the Delaware division, and over the 94¼ miles of the Rochester division; whilst it can take eighteen loaded cars over the 91 miles of the Buffalo division, twenty loaded cars over the 94¼ miles of the Rochester division, and forty loaded cars over 98 miles of the Delaware division, and over 140 miles of the Susquehanna division. There are thus two divisions in the middle of the line of low gradients, on which the standard length of trains is forty loaded cars, and the standard weight is, say, 800 tons; and these two divisions extend continuously for 244 miles, with the exception of the Gulf summit, over which these heavy trains are assisted by an extra engine. But there are at each end of these 244 miles divisions of heavier gradients, on which the standard loads of trains are necessarily reduced to sixteen or twenty cars, weighing, say, 320 or 400 tons. As a large proportion of the traffic, is through traffic, it is the more desirable that, as far as is possible, consistently with an economical result, improvements should be effected, so as to admit of trains of the same size and weight being hauled without the expense and delay attendant on breaking them up and remarshalling them on different parts of the line. Examinations and surveys have been made over all the heavy grade divisions of the line, to ascertain how far it may be possible to improve the gradients; and to enable this desirable object to be carried out, Mr. Chanute, the chief engineer of the company, who takes much interest in this subject, informs me that the following are the results obtained:—

As regards the first summit, between the Hudson and the Wallkill rivers, the ruling gradients might be reduced from 60ft. per mile in each direction to 26ft. per mile eastward and 35ft. per mile westward, with the exception of a gradient of 40ft. to the mile, four miles long, ascending westward, at Hohokas; and this might be effected by the construction of short loop-lines in different places; the total length being reduced by 1 mile, and the cost being $2,000,000. As regards the second summit, at Otisville, the ruling gradients might be reduced to 25ft. per mile by the construction of about 33 miles of new line, including the construction of a tunnel 7,000ft. long. The length of the line would in this case be increased by 7 miles, and the cost would be about $3,000,000. As regards the third summit, the gradients are already conveniently concentrated, and no improvement could be made except at an expenditure the interest on which would exceed the present cost of assisting engines. The gradients over the fourth summit, on the Buffalo division, might be reduced from, say, 44ft. to 48ft. to the mile, by certain alterations in the location of parts of the line, to a maximum of 16ft. per mile to the eastward and 21ft. per mile to the westward. This great improvement it is proposed to carry out whilst adding a second line of rails, which it is absolutely necessary to do. The most important alteration would be the raising of the timber viaduct, elsewhere referred to as the Portage bridge, over the Genesee Valley, and which is already 234ft. high, to a height of 254ft., and the cost would not otherwise be heavy. The ruling gradients ascending westward over the corresponding summit, between the same valleys, on the western division, could only be improved by constructing a new line across from the Buffalo division near Nunda to a point west of Cuba, and thus increasing the length of the line. The ruling gradients, ascending eastward to this summit, might probably be reduced to 25ft. per mile. The gradients over the summit between the Genesee and Allegheny rivers might be reduced to 10ft. or 15ft. per mile by the construction of a new line about 35 miles long, and 2 miles shorter than the present line from Genesee to Olean. This line appears, indeed, to have been proposed when the railroad was originally constructed, and it would, I am informed, have been adopted if difficulties had not been expected in consequence of its passing for a few miles through the State of Pennsylvania. On the Buffalo division west of the Genesee the ruling gradients can be reduced, to within 3 miles east of Attica, by frequent changes of location during the construction of the second line of rails, to 21ft. per mile ascending westward and 16ft. per mile ascending eastward; and this might be done at moderate expense. But thence to Buffalo, where the line has already been doubled for about 30 miles, maximum gradients of 35ft. to 40ft. to the mile would still remain; and no further improvement could be made on the western division between the Allegheny Valley and Lake Erie.

It is considered that if the above improvements were carried out it would be possible to run eastward standard trains of forty loaded cars, or, say 800 tons gross, along the entire distances between Attica and Jersey City on the one hand, and between Salamanca and Jersey City on the other hand. But this would have to be done by the adoption of a regular system of different classes of locomotives for the different divisions, and by the further employment of assisting engines at five different points. The ordinary engines, with four coupled wheels and bogie trucks under their leading ends, would still be used on the Delaware and Susquehanna divisions; the "Mogul" engines, with six coupled wheels and Bissel bogies under their leading ends, on the Buffalo division; and "consolidation" engines, with eight coupled wheels and Bissel bogies on the eastern and western divisions; and assisting engines would be required, as at present, between Deposit and Susquehanna, and from Hornellsville to Tip-top summit, as well as to some extent at the Hohokas gradient in the eastern division, and on the gradient east of Attica on the Buffalo division.

I have thought it desirable to enter thus in some detail into the improvements which might be effected in the alteration of gradients with a view to further economy in working. But it is obvious that, except at certain points where such improvements can be carried out at moderate cost in the course of constructing a second line (which must in any case be done), it would be unwise to contemplate heavy expenditure in the construction of new portions of the line until after providing for more necessary objects, such as the laying down of steel rails, the doubling of the track, the alteration of the gauge, the erection of engine houses and coal trestles, and the provision of other improvements more easily carried out if not more immediately remunerative. And even then each case of new construction of portions of loop line must be considered and thoroughly discussed on its own merits with reference to the cost in working which might be saved, and the interest to be paid on the money to be found for carrying it out. Of course, the greater the increase in the traffic, the greater would be the saving effected by the adoption of such improvements in the gradients.

Alteration of Gauge.

One of the most important questions for immediate discussion, if not the most important, is that of reducing the gauge of the rails from its present dimension of 6ft. to what is called the standard gauge of the country. Unfortunately that gauge is not uniform, but varies mainly between 4ft. 8½in. and 4ft. 10in, for districts more immediately connected with the Erie. In the event of a change, the precise gauge adopted would, probably, be a compromise gauge of 4ft. 9½in., which is already to some extent in operation. By the adoption of wider treads to the wheels, the cars are made to run over the different gauges without change within the above limits. But the wider gauge of 6ft, is of course only available for engines and cars constructed specially for that gauge; and the Erie cannot, therefore, receive the cars of other lines, or send its own cars to other lines, without the car tucks being changed. A system of sliding the wheels on the axles, and so adapting them to run on gauges both of 4ft. 8½in. and of 5ft. 6in. was, a few years ago, extensively tried on the Grand Trunk of Canada and the railways in connection with it. A thousand cars were at one time running on that principle, and a considerable amount of success was at first obtained; but it was at length found that accidents occurred, in consequence of some of the fastenings having either not been properly secured before starting or fallen out in running, and it became desirable to change the gauge of the whole line for upwards

of 1,800 miles—which has this year been completed—rather than to continue the use of this and other devices for overcoming the disadvantages of break of gauge. It is impossible to state precisely in figures the loss to a company like the Erie which a break of gauge entails. It is not merely the cost of transferring the various articles of produce or of transport from one car to another, or of transferring the cars from trucks of one gauge to trucks of another gauge; nor is it merely the delay occasioned to the traffic by such operations. Besides the cost of providing facilities at various points for these purposes, and of supervising and working them, and the difficulty of collecting the transfer cars in readiness at different points, or arranging for the proper disposal of the transfer trucks, there are also ideas of difficulties exaggerated in the minds of travelers and freighters which tend to cause traffic to shun those routes on which breaks of gauge are known to exist.

When there is sharp competition between various routes, that route which suffers from breaks of gauge feels the effect of it most keenly, and as the rolling stock of the various continuous systems tends to become employed more and more as common property the disadvantage of an isolated gauge is more seriously felt. No one circumstance has probably militated hitherto in a greater degree against the success of the Erie than the difference of its gauge from that of so many other lines forming junctions with it or running in continuation with it; and no better investment of money could, probably be made than that of spending $8,500,000, which the change is estimated to cost, in placing it on an equality with its competitors in this respect. For long through traffic, carried 1,000 miles and upwards, and sometimes for much greater distances, and especially for fully loaded wagons in full trains carried over such long distances, and requiring powerful engines, a wider gauge than 4ft. 8½in. might, of itself, be considered to be advantageous. As a matter of practice, there is not a greater proportion of dead weight to net load in the goods traffic on the Erie than in that on the generality of lines on the standard gauge. No material saving, in working and maintenance, on the Erie could be expected from the change of gauge alone; but in avoiding, as already stated, cost, delay, and inconvenience in tranfer operations, in the common utilisation of rolling stock, and, above all, in avoiding isolation, there can be no doubt whatever that one of the greatest steps which can be taken towards making the Erie a dividend paying line would be the reduction of its gauge to the common or compromise standard; and the sooner this can be done the smaller will be the ultimate cost of the operation. Of the two other alternatives which present themselves, the laying of a third rail over the whole of the line, or over those portions of it on which it would be most required, is one; and the employment of machines, known as Dodd's machine or Nutter's machine, at the various necessary points, is another. But the extension of a mixed gauge has the serious disadvantages of entailing enormous expense and great complication in the permanent way, and in the working of the traffic; and of only being after all a means to an end which may be accomplished more readily, more quickly, more conveniently, and ultimately more economically by a sudden alteration of gauge effected at a time when all proper preparations for it have been carefully made. The employment of machines for lifting the bodies of the cars and changing the trucks has never yet been tried on a large scale, so as to produce results as satisfactory as might be expected from such a system. If money cannot be found for the larger operation of a radical change, and even pending such a change, it might no doubt be found desirable to provide a number of such machines as a means of temporarily overcoming the above disadvantages. Taking as an instance the traffic which will be exchanged with the Canadian lines as the result of the connection at Buffalo between the Erie and the International bridge, it is only a certain proportion of the car bodies which would require to have their trucks changed. The passengers, except in the case of sleeping cars, will transfer themselves from one carriage to another; the cattle require, in any case, to be taken out of the cars for rest and refreshment, if not for sale; and it is only the cars loaded with through traffic of certain descriptions for which it would be necessary to provide machines for lifting the bodies and changing the trucks.

As regards the cost which would be incurred by a change of the gauge, it is interesting to consider what cost has been similarly incurred in other cases, and I may therefore cite the experience which has been obtained in this respect on the Grand Trunk of Canada. On the main line of that railway, between Sarnia, London, and Buffalo, the cost of changing the permanent way, from a gauge of 5ft. 6in. to a gauge of 4ft. 8½in., over a distance of 216 miles, with 16 per cent extra of sidings, averaged $506 per mile of main line. On the same railway, between Stratford and Montreal, over a distance of 421 miles of main line, with 18 per cent extra of sidings, the change having been effected over the whole length in portions of two days, the cost averaged $448 per mile of main line. It was estimated that the cost of similarly changing 552 miles, being the remainder of the Grand Trunk recently changed, would average, including 10 per cent extra for sidings, $362 per mile of main line. The cost of changing the gauge of such of the engines as could thus be dealt with was from $3,000 to $3,500 per engine; and the cost of changing the gauge of the cars was $50 per truck. Besides the above expenses, there are the questions of providing, before the change can be commenced, sufficient numbers of new engines and new car trucks of the gauge to be adopted; and the loss of traffic receipts during the operation must also be taken into account. The number of new engines required to be previously purchased depends partly upon the number of engines of the old gauge which are adapted for the change, and partly upon the length of the line to be simultaneously operated upon, as well as upon the number which it is possible to draw from work for conversion previously to the change. And the numbers of new car trucks to be previously purchased are affected by similar considerations. Such engines as are not suitable for change, and cannot otherwise be disposed of, are worth only their market value as scrap, excepting as regards any of their parts which can be used in the repair of old or the construction of new engines. The disturbance to the traffic during the operation decreases in proportion to the length of line changed at once, but the greater that length the greater the cost of the new engines and trucks to be previously purchased. By operating simultaneously on a whole line the expenses are saved, more or less considerable, according to the amount of the traffic, in providing points and means of transferring the traffic, or, in other words, of preventing as far as possible the inconveniences and delays incidental to break of gauge during the progress of the work. The average cost of new freight car trucks was $450 and of new passenger car trucks was $1,000 each last year on the Grand Trunk. With a Nutter machine, the erection of which cost $3,000, about 100 cars had their trucks changed in twenty four hours.

Locomotive Department.

This department was, when I was in America, presided over by Mr. Howard Fry, who was formerly on the South Eastern of England, and for seven years assistant locomotive superintendent on the eastern district of the Grand Trunk of Canada. He joined the Erie in July 1873, and had then charge of the locomotive stock of that company, and of the sheds and shops in connection with it; but he has since left the Erie and joined the Pennsylvania. The head-quarters of the department are at Susquehanna, 191 miles from New York, and 231 miles from Buffalo.

There are on the books of the company 505 engines as belonging to this department. Of these 472 are now in existence, either working on the road or undergoing repair. The remaining 33 have nothing to represent them. Of the 472 existing engines there were, on the 22nd June, 1874, 59 under repair on various parts of the line, and this appears to be about the average number ordinarily under repair: 29 of these are either undergoing thorough repair or being rebuilt, 14 are undergoing extensive repairs, and 16 daily or running shed repairs. Of these 472 engines the boilers of 178 are under 5 years of age, the boilers of 214 are between 5 and 10 years of age, the boilers of 51 are between 10 and 15 years of age, and the boilers of 29 are over 15 years of age.

From a careful survey which has been made of the whole of this stock, it would appear that the depreciation of it may be expressed as 4.7 per cent below what it would be if the engines were all in thorough good working order, and they would not probably compare unfavorably with the engines of other American lines.

I learn that during the summer of 1873 a high rate of expenditure was maintained upon the engine stock, and that in the ensuing winter the expenditure was cut down to a point which was considered sufficient to maintain it in the condition at which it had then arrived. Under the above reduced expenditure I find that the following repairs were effected:—During the six months from September 1873 to April 1874 fourteen new steel fire boxes were applied, fourteen engines were fitted with new cylinders, fifteen engines were fitted with new steel driving wheel tyres, and all the passenger engines received new leading truck wheels, fitted with Krupp's steel tyres; sixty five engines had their driving wheel tyres turned up, and 123 engines received repairs which cost over $500 each. During that period the engine repairs amounted to $7 62c. per engine mile. During the six months previous, from April 1873 to September 1873, these repairs amounted to $8 98c. per engine mile. The expenditure for engine repairs on four good American roads, per engine mile, for 1873, is shown in the following table:

New York Central	$6 65c.
Pennsylvania Railroad	5 44
Baltimore and Ohio	5 95
Lake Shore	5 02

It is impossible to make exact comparisons between these railroads and the Erie, or between one of these railroads and another, because the cost of such repairs varies very considerably with the number of new engines that have recently been purchased, and the number of engines that have been rebuilt, as well as the degree of uniformity to which they have attained. The costs given above are exclusive of the wages of engine drivers and firemen, and of the amount of fuel consumed by the engines when running, though they include the fuel used in the sheds and shops, and all shop expenses. On the Erie, as on many other American railroads, the fuel consumed and wages earned by the engine drivers and firemen are accounted for by the traffic department, and not as commonly in England by the locomotive department. It has not hitherto been the custom on the Erie to measure out the fuel to the engines, but it is desirable that this important means of obtaining economy in the consumption of fuel should in future be adopted. I saw at the stations of Hornellsville and Susquehanna an arrangement which had been perfected within the previous month for that purpose; and it is now intended to extend the system to all the stations at which engines receive their supplies of fuel. Small hopper trucks, holding 2½ net tons, or 5,000 lbs. of coal each, are kept loaded in the coal trestles, and are run out on little tramways over the tenders, and the coal is dropped from them into the tenders, on the release of a hinged bottom. The number of each truck load supplied to each engine is recorded by the foreman of the coal shippers. The engines of the Erie consume coal only, obtained principally from the Towanda and Barclay mines, which are leased by the Erie through the intervention of the Towanda Coal Company; and partly also from the Lackawanna Coal Company, which supplies anthracite coal, and partly from the bituminous coalfields in connection with the Bradford branch.

(To be continued.)

RAILROAD EARNINGS—MONTHLY.

	January	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

American Railroad Journal

Saturday, December 13, 1874.

Stock Exchange and Money Market.

Money has been more active during the week, with call loans quoted generally at 3@5, and best mercantile credits at 5½@7 per cent per annum, showing a somewhat firmer range. At these figures, however, the more prominent borrowers have been readily accommodated to the full extent of their requirements. The increased demand has been in good part for speculative use at the Stock and Go'd Boards. The more extensive clearances of the City Banks indicate the magnitude of the inquiry for aid. There has been a further outflow of currency to the interior, which told against the City Bank reserves, as also against the Sub Treasury currency board. The liberal specie exports account substantially for the loss of specie by the City Banks. The Sub Treasury slightly augmented its specie average. The City banks last week further reduced their reserve of legal tender notes $3,080,200, and their deposit item $3,135,200, while also diminishing their specie average $2,862,100. They report an increase of $3.787,200 in the loans and discounts, and of $128,500 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $47,401,936 against $49,566,-170, the preceding week; and a coin board of $55,031,082 against $54,528,254, on the previous return. The City bank exchanges, during the week, were $530,080,508, or a daily average of $88,388,418. The customs revenue of the port, during the week, was $1,857,000. The City banks reported their average of gold last week at $14.467,200, and their greenback average at $50,221,700. Their deposits stood at $219,632,-100. The loan item was $286 072,800. The circulation was $25,012,100.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $9,158,-500.

The aggregate of the outstanding U. S. currency, of all denominations, Dec. 1, was $429,987,311. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is now $351,500,000.

The U. S. Treasury balances at the opening of business on Wednesday were as follows: Currency, $15,521,490; special deposit of legal tenders for redemption of certificates of deposit, $48,-305,000; coin, (including $22 718,900 in coin certificates,) $80,387,534.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 47 millions.

With more favorable financial news from Europe, and the recommendations as to specie payments by President Grant, in his annual message to Congress, operating against the speculators for a rise, Gold has been depressed and lower, on a less active demand, especially on speculative account; the market closing irregularly. The extremes of the week have been 110½@112¼, closing on Wednesday at 110⅞, as against 112 on Wednesday of the preceding week. The specie outflow last week was $2,400,888, mainly to the Continent. The imports of specie at this port since Jan. 1. have been $5,351,769, against $17,-890,422 same time last year. The customs demand for Gold last week averaged $309,500 a day. Foreign Exchange has been less active, but held generally with firmness, with Bankers' sixty day bills on London closing on Wednesday at $4 84¾@$4 85⅛; sight bills on London at 4 90@$4 90⅛ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $4,103,914. The exports for the corresponding week of last year were $5,170,064, and for 1872 $4,586,084. The total exports since January 1, this year are $269 321,960 against $282,349,109 last year and $225,590,047 in 1868.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $5,517,786.

Government Securities have been quite active, and quoted stronger in price through the earlier dealings; but, influenced, in good part, by the decline and irregularity in Gold, the market ruled lower toward the close.

U. S sixes of 1881 closed on Wednesday of this week at 119⅛@119¾; U. S. Five-Twenties of 1862, at 112¼@112½; U. S. Five-Twenties of 1864 at 114¼@114⅛; U. S. Five-Twenties of 1865 116¼@116⅜; U. S. Five-Twenties of 1865 consolidated, 118¼@118⅜; U. S. Five Twenties

of 1867, 119¼@119⅜; U. S. Five-Twenties of 1868, 119½@119⅝; U. S. Ten-forties at 113⅝@114; U. S. Fives of 1881, (Funding Loan) 112@112⅜; Six per cent. currency Sixes from 116¼@116½.

Business at the Stock Exchange has been quite active, but the course of prices has been quite generally against operations for higher values. The demand for State and Railway bonds has been fair with prices quoted about steady. Railway and miscellaneous share property has been quite brisk, but unusually variable as to prices, influenced largely by the pressure to sell some of the more prominent speculative shares, like those of the Pacific Mail, which have been seriously damaged by the newspaper discussions of the week.

In general business, a fair show of activity has been made in most lines. Breadstuffs, Provisions, and Cotton have been dealt in with comparative freedom, but closed weaker as to values. Wool and Leather, in good demand and quoted steady. Most other kinds of Produce, in rather moderate request. Dry Goods, Hardware, and Boots and Shoes have been inactive. The Metal trade has been quite tame, as a rule. American Pig Iron has been offering more urgently, and has been heavy and irregular. Eglinton Pig Iron quoted from yard at $37; Glengarnock, $39@$40; No. 1 American Pig at $25@$27; No. 2 do. at $23@$25; Forge, $22@$25; English Rails at $47 50@$50, gold; American Rails at works, $50@$55; Old Rails, $30. Wrought Scrap, $30@$32. Ocean freights have been less active and at close, quoted weaker.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Western Union Telegraph.

The Western Union Telegraph Company have declared a dividend of 2 per cent. from the net earnings of the three months ending December 31, 1874, payable on the 15th of January, 1875. A comparative statement of the receipts, expenses and profits for the years ending December 31, 1873 and 1874, has been published, from which it appears that the gross receipts for the current year (the returns for November being nearly complete, and December estimated) are $9,530,749 55, against $9,282,033 86 for 1873, showing

an increase of $248,715 89 for the current year, while the expenses have been reduced from $7,047,016 88 in 1873, to $6,454,088 76, being a difference of $592,927 62 in favor of the current year, and that the profits are $3,076,650 79, against $2,235,017 28, being an increase of $841,643 51 over the profits of 1873.

Railroad Earnings.

The earnings of the Union Pacific Railroad in October, 1874, were $1,141,937 77, against $1,170,586 41 in October, 1873, a decrease of $28,648 64. For the ten months ending October 31, 1874, the earnings were $8,662,122 75, against $8,536,611 02, for the corresponding period of the previous year, an increase of $125,511 73.

The earnings of the Indianapolis, Cincinnati and Lafayette Railroad in October, 1874, were $174,630, the expenses $100,222, and the net earnings $74,408. In October, 1873, the earnings were $176,204, the expenses $112,067, and the net earnings $64,137—showing a decrease in earnings of $1,574, with a decrease in expenses of $11,845, making the increase in net earnings $10,271.

☞ Mr. Abram S. Hewitt, one of the Receivers of the New York and Oswego Midland Railroad, says that during the first year of his Receivership the railroad was run, at a loss amounting in the aggregate to over $300,000. Of this sum, however, over $100,000 was expended for construction purposes, and the result is that the road is now in much better order than when it came into the hands of the Receivers. It is now no longer run at a loss; on the contrary, the earnings are equal to the expenses, and were it not for the floating debt accumulated during the past year, there would be no trouble in keeping it permanently available for public use. He thinks that timely relief by the State will put the road in a self sustaining condition.

☞ The directors of the Chesapeake and Delaware Canal Company have decided to declare no dividend for the past six months. It is stated that the company have money enough on hand to declare the dividend, but have determined not to do so because of the great expense incurred in the renewal of the canal which was broken in 1878, and the depression in business. It is also stated that the company hope to commence declaring a regular semi annual dividend on the first of next June.

☞ A project is on foot to build a railroad from Colusa, Cal., due west about ten miles, and thence a little west of north about thirty miles. The estimated cost is $400,000. The Colusa *Sun* says: "If one branch of the road should run up Freshwater canyon, over to Antelope valley, it would give us most of the trade of Lake county, all the travel to the Springs, and all the mining business."

☞ The regular quarterly dividend of two per cent. on the capital stock of the New York Central and Hudson River Railroad Company has been declared, payable at the company's office, on the 15th proximo. The transfer books will close on the 15th inst. and reopen Jan. 20.

☞ The Painesville and Youngstown narrow gauge railway is nearly completed, the track being laid to Youngstown.

The Coal Trade.

The total of anthracite marketed for the week ending on the 28th Nov., amounted to 368,960 tons, and for the coal year 17,514,845 tons, against 18,450,839 tons to corresponding time last year, being a decrease of 935,914 tons. The bituminous tonnage for the week is 63,376 tons, and for the year 3,081,857 tons, against 3,112,158 tons to same time last year, giving a total of all kinds for the week of 427,336 tons, and for the year of 20,596,702 tons, against 21,562,997 tons to the same time last year, being a decrease of 966,295 tons. The Philadelphia *Ledger*, of 7th inst., from which the above is taken, adds:

The coal and coke tonnage of the Pennsylvania Railroad last week was 93,477 tons, and for the year 3,045,717. Of anthracite and bituminous there were 3,020,540 tons, and of coke 432,694 tons. This includes the tonnage of coal both east and west. The anthracite coal trade from the Pennsylvania coal mines is pretty well over for the current calendar year, except for the line supply of coal. The short production of anthracite coal for the year as compared with that of last year, though the returns are not fully made up, is very nearly approximated in the figures above given. It will not be far from 900,000 tons. The decrease in the bituminous production will be greater, as it has suffered materially in the west. If the past history of the growth of the coal trade may be taken as a basis for estimating its future, there is reason to believe that the production of 1875, and probably yearly for several succeeding years, will considerably increase. In the decade from 1862 to 1873, there was an averaging annual increase of 10 per cent, just doubling the amount in that time. It is true there was not in each and every year of the ten, an increase of 10 per cent, for, as in the present year, there was occasionally no increase on the next preceding year, but in a very few years this halt in the average was overcome, and the annual average made up. There is nothing in the progress of the country nor in the development of its material resources, to warrant any change in the coal trade for the future from that of the past. The production and carrying of coal, hard and soft, for the decade alluded to, was from 22½ millions to about 45 millions of tons. A like progress, the current decade, would give a total production and tonnage of 90 millions of tons! Great as are the transportation facilities for coal, any one conversant with the trade will readily see how severely they will be taxed to market the amount, and what immense sums of money the owners of the mines and the carrying companies must handle, and as is presumed, with corresponding return of profits. The several anthracite coal regions in their respective supplies, lose this year as compared with 1873, as follows: The Schuylkill region shows a loss of 92,145 tons, the Lehigh region 208,786 tons, the Wyoming region 594,827, the Shamokin 45,255, the Lykens Valley 5,978, and the bituminus region 31,101 tons.

☞ The Ponaganset (R. I.) Railroad Company has been organized by the choice of the following directors: James Y. Smith, Amos D. Lockwood, Alanson Steere, Thomas Pray, Jr., and George Hutchins.

☞ The engineer corps of the Atlantic and Great Western railway are engaged in surveying the proposed railway route of the Atlantic and Lake Erie railroad between New Lisbon and Salineville.

Northern Central Railway.

An adjourned meeting of the stockholders of this company was held in Baltimore on the 8th inst. to receive the report of the committee appointed in April last to examine into the affairs of the company, and to negotiate for a lease of the road to the Pennsylvania Railroad Company, or a guarantee of dividends by the latter company, or some other arrangement satisfactory to the stockholders. Two reports were submitted, neither of which was signed by a majority of the committee, and both of which were laid on the table until the annual meeting in February next. The following Board of Directors was elected: S. M. Shoemaker, George Small, S. M. Felton, W. MacVeagh, Wistar Morris, Thomas A. Scott, M. B. Greensfelder, R. Oppenheimer, M. B. Sellers, H. P. Borie, J. N. Hutchinson, and J. C. Bullitt. At a subsequent meeting of the directors, Thomas A. Scott was chosen President, and A. J. Cassett, General Manager of the Pennsylvania Railroad, was chosen Director, vice Scott.

Finances of the United States.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE TREASURY.

The moneys received and covered into the Treasury by warrants during the fiscal year ending June 30, 1874, were as follows:

From Customs		$163,103,883 69
From internal revenue		102,409,784 90
From sales of public lands		1,852,428 93
From tax on circulation and deposits of national banks		7,030,088 17
From repayment of interest by Pacific Railway Companies		1,028,895 56
From Customs' fines, penalties, &c.		651,271 76
From labor, drayage, storage, &c.		741,485 23
From sales of Indian trust lands		903,439 50
From fees—consular, letters patent and land		1,898,189 74
From proceeds of sales of Government property		1,699,017 68
From marine hospital tax		852,879 98
From steamboat fees		274,490 91
From profits on coinage, &c.		447,970 72
From tax on seal skins		856,610 42
From miscellaneous sources		1,691,808 70
Total ordinary receipts		$284,441,090 84
Premium on sales of coin		5,087,665 22
Total net receipts, exclusive of loans		$289,478,756 06
Payment by the British Government of the award of the tribunal of arbitration at Geneva		15,500,000 00
Excess of net receipts from certificates of deposit of legal tenders, &c., over redemptions		17,207,475 28
Total net receipts		$322,186,231 29
Balance in Treasury, June 30, 1873	$181,192,028 50	
Amount since received from late depositary, Cincinnati, Ohio	1,028 78	
Total	$181,193,067 28	
Deduct unavail'ble balances with depositaries carried to their debits on books of the Register, & to the credit of the Treasurer of the U. S.	13,730 18	
		181,179,337 10
Total available cash		$453,365,568 39

The net expenditures by warrants during the same period were:

For civil expenses	$17,627,115 09
For foreign intercourse	1,508,064 27
For Indians	6,692,462 09
For pensions	29,038,414 66
For military establishment, including fortifications, river and harbor improvements, and arsenals	42,313,927 22
For naval establishment, including vessels and machinery, and improvements at navy yards	30,932,587 42
For miscellaneous, civil, including public buildings, light houses, and collecting the revenue	50,506,414 25
For interest on the public debt	107,119,815 21
Total net ordinary expenditures, exclusive of the public debt	$285,788,800 21
Premium on bonds purchased	1,895,073 55
Total	$287,133,873 76
Award of Geneva Tribunal, investment account	15,500,000 00
Total net disbursements	$302,633,873 76
Balance in Treasury June 30, 1874	150,731,694 63
Total	$453,365,568 39
It will be seen by this statement that the net revenues for the fiscal year were	$289,478,756 06
And the ordinary expenses	287,133,873 76
Leaving a surplus revenue of	$2,344,882 30

During the months of July, August and September of the fiscal year 1874, bonds to the extent of $12,936,450 were purchased for the sinking fund account.

The receipts during the first quarter of the current fiscal year were—

From Customs	$46,651,200 10
From internal revenue	26,314,615 38
From sales of public lands	391,465 88
From tax on circulation, &c., of national banks	3,596,148 23
From repayment of interest by Pacific Railways	217,941 97
From Customs' fines, &c	30,540 81
From Consular, patent, and other fees	451,257 11
From proceeds of sales of Government property	522,546 77
From miscellaneous sources	1,255,832 57
Net ordinary receipts	79,431,048 27
From premium on sales of coin	1,453,237 72
Total net ordinary receipts	80,884,285 99
Receipts from certificates of deposit of legal tenders and coin certificates in excess of redemptions	5,247,068 24
Balance in Treasury June 30, 1874	150,731,694 63
Total available	$236,863,048 86

The expenditures during the same period were as follows:

For civil and miscellaneous expenses, including public buildings, light houses and collecting the revenues	$20,838,410 77
For Indians	3,032,752 93
For pensions	8,913,407 18
For military establishment, including fortifications, river and harbor improvements, & arsenals	11,618,290 99
For naval establishment, including vessels and machinery, and improvements at navy yards	8,122,728 17
For interest on the public debt, including Pacific Railway bonds	32,787,899 38
Total ordinary expenditures	$85,313,489 42
Balance in the Treasury, Sept. 30, 1874	151,549,559 44
Total	$236,863,048 86

For the remaining three quarters it is estimated that the receipts will be:

From Customs	$115,850,000 00
From internal revenue	78,784,000 00
From sales of public lands	1,000,000 00
From tax on national banks	3,800,000 00
From Pacific Railways	500,000 00
From Customs' fines, &c	200,000 00
From Consular, patent, and other fees	1,200,000 00
From sales of public property	1,000,000 00
From miscellaneous sources	2,100,000 00
Total	$208,434,000 00

For the same period it is estimated that the expenditures will be:

For civil, miscellaneous, including public buildings	$48 060,000 00
For Indians	5,000,000 00
For pensions	21,442,000 00
For military establishment	28,500,000 00
For naval establishment	17,000,000 00
For interest on the public debt	70,000,000 00
Total	$190,002,000 00

For the current fiscal year, from the foregoing account of the actual receipts and expenditures for the first quarter, and of the estimates of the same for the remaining three quarters, the estimates being based on the assumption that Congress will not increase the expenditures by deficiency or other appropriations, it is expected that the revenues will amount to $284,318,285 99, and that the ordinary expenses will be $275,315,489 42, which will leave a surplus revenue of $9,002,796 57 to be applied to the sinking fund.

The sum of $31,096,545 will be required under the law for this fund, and therefore, unless the revenues shall increase beyond the amount anticipated, there will be a deficiency in the sinking fund account for this year of $22,093,748 43.

It is estimated that the receipts for the fiscal year ending June 30, 1876, will be:

From Customs	$170,000,000
From internal revenue	106,000,000
From sales of public lands	1,500 000
From tax on national banks	6,500,000
From Pacific Railways	1,000,000
From Customs' fines, &c	500 000
From Consular, patent, and other fees	1,500,000
From sales of public property	1,500,000
From miscellaneous sources	4,500,000
Total	$293,000,000

It is estimated that the ordinary expenditures for the same period will be:

For civil expenses	$17,000,000
For foreign intercourse	1,400,000
For Indians	7,500,000
For pensions	30,500,000
For military establishment, including fortifications, river and harbor improvements, and arsenals	38,000,000
For naval establishment, including vessels and machinery, and improvements at navy yards	22,500,000
For civil, miscellaneous, including public buildings, light houses, collecting the revenues, mail steam ship service, deficiency in postal revenues, public printing, &c	54,000,000
For interest on the public debt	98,000,000
For interest on Pacific Railway bonds	3,878,000
Total ordinary expenditures	$272,778,000

If these estimates of the revenues and expenditures shall prove to be approximately correct, there will be a surplus of revenue of about $20,222,000. The amount necessary for the sinking fund is not included in the above estimate of expenditures, and to provide for it the sum of $32,140,914 will be required. The surplus revenues which can be applied to this fund ($20,220,000) will be insufficient to the extent of $11,920,914, and there will therefore be a deficiency of that amount.

The estimates received from the several Executive Departments are as follows:

Legislative establishment		$2,968,342 10
Executive establishment		18,549,048 03
Judicial establishment		3,605,250 00
Foreign intercourse		1,344,785 00
Military establishment		31,641,526 50
Naval establishment		19,096,567 65
Indian affairs		6,851,681 96
Pensions		30,500,000 00
Public works:		
Treasury Depart	$6,650,943 81	
War Department	17,409,937 50	
Navy Department	1,791,500 00	
Interior Departm't	877,248 00	
Department of Agriculture	22,840 00	
Department of Justice	47,000 00	
		26,299,469 31
Postal service		9,914,378 00
Miscellaneous		12,591,169 58
Permanent appropriations		146,673,551 76
Total		$310,080,769 89

REDUCTION OF THE PUBLIC DEBT.

During the fiscal year the public debt was reduced by the sum of $5,762,447 65, as will appear by the following statement:

Principal of the debt July 1, 1873	$2,234,482,998 20
Interest due and unpaid, and accrued interest to date	42,356,652 82
Total	$2,276,839,646 02
Less cash in the Treasury	131,179,837 10
Debt, less cash in the Treasury	$2,145,660,808 92
Principal of the debt July 1, 1874	2,251,690,468 43
Interest due and unpaid, and accrued interest to date	38,939,087 47
Total debt	$2,290,629,555 90
Less cash in the Treasury	150,731,694 63
Debt, less cash in the Treasury	$2,139,897,861 27
Showing a decrease during the year, as above stated, of	5,762,447 65
This decrease is represented by the excess of receipts over expenditures	2,344,882 30
The interest due and unpaid June 30, 1874, was less than June 30, 1873, by	3,417,565 35
Total	$5,762,447 65

By the monthly statement of the public debt issued June 30, 1874, the reduction of the debt was shown to be $4,730,472 41. The difference between this and the preceding statement is thus explained:

The monthly debt statement is made up at the close of business on the day of its date, and embraces only the moneys officially reported to the department at the time of its issue, whereas the foregoing annual statement of receipts and expenditures includes revenues which were deposited at the different places of deposit throughout the country within the period covered by the accounts, and unascertained at the time of the issue of the monthly statement. The books from which the annual statement of receipts and expenditures is prepared are usually kept open for a period of forty five days, so as to include, at the date of closing the accounts, all the revenues which may have been deposited within the year which the statement represents.

The difference between these two statements arises from the difference of dates at which they are made up, and by a comparison of them as regards the cash in the Treasury at the commencement and close of the last fiscal year it will be seen that by the annual statement of receipts and expenditures there was a gain of $1,031,976

New York, Saturday, December 19, 1874.

The Cheap Transportation Agitators.

The precise reasons which determined the selection of Richmond as the late meeting place of the Cheap Transportation movement, have not been made public; but as New York has the largest interests in the actual cheap carriage of merchandize and produce, of any of the Eastern cities, it is no special detriment to our city that it was not held here, since the advantages of this entrepot and depot for both inland and seaboard destination are so well known, and those of Richmond are so little known, and at any rate, are of no present use to her, that both ways the association's recommendations escape provoking the jealousy of Boston, Philadelphia and Baltimore.

The members declare their association to be non-partisan, as it should be; it cannot strictly be said, however, to be wholly non-political, for its action may have much to do in providing closer bonds between the Great West and the seaboard, certainly; and possibly also new ties between northern and southern, or western and southern States.

An examination of the subjects of their deliberation, and a comparison of the views of intelligent gentlemen in New York, quite recently, enables us to give some practical views of the subject and the methods proposed by the Richmond Convention. It is not very surprising to see in the Resolutions of the Committees a fresh recommendation of the four great water routes to the seaboard, which have had the endorsement of President Grant, and which may be expected to appear in Congress.

Of the wisdom of the policy of committing to the federal government the task of opening up routes of travel and traffic between the several sections there may be an honest difference; but it is admitted that it would be difficult to set the limits where it should stop; and for this paramount reason many are opposed to Government assuming any such functions at all. The construction of the Pacific Railroad, partly as a military measure, is entitled to the exception, if any exception there can be; but it is the common impression that if State or National aid is to be granted, it had better be in the shape of guarantees to a private corporation, or corporations, rather than have the work done, and the expense sent directly to the Government—since in one case the total responsibility can be fixed beforehand, while in the latter case the doors of the Treasury would be open to unlimited draughts.

There is a question which lies deeper and behind this whole matter of canals and railroads, State or private construction and management. It is this: What are the transportation needs of the country; and what is the proper remedy or appliance?

In regard to the actual amount of freights moved from the States west of the Allegheny chain to the seaboard cities, and of goods transported back again to the West, there are only imperfect statistics at least. While the amount which is seeking transportation, or in other words, which would be available for shipment if the minumum of actual cost of carriage were reached, is one largely of conjecture. Over and above this, calculations are sometimes made of the stimulus which would be given to the producing classes of the West, by cheap freights, whereby the present crops might be doubled, quadrupled, or multiplied, if the demand and the consequent market rates, in consuming States would justify such an expansion.

Some of the western statisticians have estimated the available surplus which would be sent eastward, if the transportation did not add so much to the cost, at 30,000,000 tons. The aggregate through transportation of all the trunk roads, with the canals and St. Lawrence is only about 7,000,000 tons. Now a large portion of the crops must be converted into the flesh of animals, or left to waste. Let us consider the feasible plan for ensuring by a self-regulating device, at least Cheaper Transportation by the construction of fresh water-ways between the Upper Mississippi and Lake Michigan, and thence through added canals to the St. Lawrence. The objections to this expenditure are two fold; first, this navigation is available only half the time; and, secondly, a part of the chain lies through foreign, and possibly hostile, waters. The connection between the Ohio River and the Cheapeake Bay, via the James and Kanawha Rivers, though free from both the above objections, is confronted with the very great cost of surmounting the mountain chain of 2,000 feet, by a canal—estimated at $30,000,000. Of the projects for connecting the Tennessee and Georgia rivers, and of opening the mouths of the Mississippi, the one may be said to be premature; while we have no assurance that the other would be permanent.

Turning to the railroads, we are met by the underlying difficulty as to whether we must leave private enterprise free to collect all it can, restrained only by the limits of competition; or look to the legislative authority to protect the public; and in the latter event, whether we shall seek it through the Federal Congress or through the States. Either course is fraught with difficulties. It is easy for gentlemen who appear before the public with written essays or speeches on Transportation to say that "the railroads charge too much;" and that "they should be held in restraint by the sovereign will of the people;" but the trouble about it is, that the same complaint, if effective, would soon be heard against millers, grocers, tailors and the like. Again, if we resolve to apply the curb through the law who is to control the legislature? "*Quis custodiet, ipsos custodes.*"

If, on the other hand, we turn our faces to the National Congress, what better are we? Instead of confining itself to the necessary and sufficiently embarrassing work of collecting revenues and administering the government, it was diverted into

a disciplinary power over the 70,000 miles of railroad of the country, it would assume a task altogether too heavy and too dangerous for it. Congress would be converted into a veritable bear-garden wherein railroad magnates would be centres of influence and power, and demoralization be complete. There remains, then, the experiment, now being tried in England, of a Railway Commission with full power to hear appeals between railroad corporations themselves, and between Railroads and their patrons—the people. This, also, is a dangerous power to be lodged in the members of the Commission, and in the hands of the Executive—who would have their selection.

Northern Central Railway.

At the adjourned meeting of the stockholders of this company, held in Baltimore on the 8th inst., the following resolutions, offered by Mr. Thomas A. Scott, were adopted with but few dissenting voices:

Resolved, That the general office of this company be located in the city of Baltimore.

Resolved, That the incoming board are hereby authorized and empowered to adopt every means available to secure the largest amount of traffic over the line to and from the city of Baltimore at the rates current over competing lines, provided that all its connecting lines will agree to give it not less than a pro rata proportion of freight and passenger receipts.

Resolved, That the incoming board be instructed to report at the next annual meeting a full exhibit of the actual condition of the company, and of every interest that is held by it and of the cost and estimated value of all its properties, and also the resources of the company.

Resolved, That the incoming board be authorized to make such arrangements for terminal facilities in the city of Baltimore as may be required to meet the wants of the company from time to time.

Resolved, That the incoming board are hereby instructed not to make a lease of any other road, or indorsement of the bonds of any company, without first making a report in writing to the stockholders, at a meeting, of which thirty days notice shall be given, and having the approval of said stockholders.

☞ The trustees invite sealed proposals for the foundations, masonry and superstructure (in one contract) for the great railroad bridge over the Ohio River at the foot of Horne street, Cincinnati, for the Cincinnati Southern Railroad. Proposals will be received until January 18, 1875, and must be on printed forms and directed to the board of trustees, at their office, No. 70 West Third street, Cincinnati, O. Plans and specifications can be seen at the Engineer's office, at the same place.

☞ The Gulf, Colorado and Santa Fe road invite proposals for building the first section of the road, from Galveston, Tex., west to Columbia, on the Brazos river, a distance of 50 miles. The whole work will be let together, or the grading and bridging separately. Information as to the location, grades, etc., can be had on application to Braxton Bragg, Chief Engineer, Galveston, Texas.

☞ The first train over the cut from Athens to Parkersburg, on the Marietta and Cincinnati Railroad, arrived at Parkersburg on the 15th ult. This cut-off shortens the distance between Cincinnati and Parkersburg ten miles. It extends from Athens to Parkersburg, a distance of thirty two miles. The old line from Marietta to Athens will be operated principally as a freight line.

Old Colony Railroad.

The earnings of this road for the years ending September 30, 1873 and 1874, were as follows:

	1873.	1874.
From passengers	$1,431,707 76	$1,456,315 11
" freight	774,752 85	752,838 19
" expresses	74,781 67	72,299 41
" rents	24,941 06	23,388 43
" mails	28,459 33	41,063 30
" miscellaneous	39,933 54	40,385 24
" extra baggage	2,675 61	3,519 95
	$2,377,251 82	$2,390,309 63
Expenses, viz:		
Passenger department	$239,712 58	$250,687 84
Merchandise "	240,398 37	198,997 39
Locomotive "	451,675 80	412,483 82
Maintenance of way	387,166 73	428,431 47
General expenses	170,917 98	156,210 68
Miscellaneous	86,144 13	90,719 14
	$1,576,015 59	$1,537,530 34
Earnings less exp.	$801,236 23	$852,779 29
City and town taxes	$25,519 95	$24,555 90
State tax	63,677 49	71,879 50
Interest on bonds, debt, etc.	233,433 16	281,243 27
	$322,630 60	$377,678 67
Net income	$478,605 63	$475,100 62
Add balance of income per last report		611,502 21
Add for premiums received on bonds sold		41,821 67
Total		$1,128,424 50
Deduct amount paid in settlement of disputed claims for damage by fire in Plymouth County in June, 1873	$22,487 15	
Deduct dividend Jan. 1, 1874, $3 50 per share.	228,221 00	
Deduct dividend July 1, 1874, $3 50 per share.	232,631 00	
		483,339 15
Balance of income account September 30, 1874		$645,085 35

The dividend of Jan. 1, 1875, is to be taken in part from this balance.

The gross receipts of the road were, for the year ending Sept. 30, 1874.	$2,390,309 63
For the year ending Sept. 30, 1873.	2,377,251 82
Increase in receipts	$13,057 81
The working expenses for the year ending Sept. 30, 1874	$1,537,530 34
For the year ending Sept. 30, 1873.	1,576,015 59
Decrease in working expenses.	$38,485 25
The amount paid for interest was, for the year ending Sept. 30, 1874	$281,243 27
For the year ending Sept. 30, 1873.	233,433 16
Increase	$47,810 11
Amount paid for taxes was, for the year ending Sept. 30, 1874	$96,435 40
For the year ending Sept. 30, 1873.	89,197 44
Increase	$7,237 96
The net earnings, after paying interest and taxes, were, for the year ending Sept. 30, 1874	$475,100 62
For the year ending Sept. 30, 1783.	478,605 63
Decrease	$3,505 01

The amount of interest paid includes one coupon upon the bonds issued to provide means to purchase stock in the steamboat companies, from which no income has as yet been received, the time for the semi-annual dividends not having been reached.

There has been a decrease in freight receipts of $21,914 66, while there has been an increase in the tons carried of 8,476.

The decrease in receipts shows that a larger proportion of low priced freight has been carried.

Coal tonnage for 1874	149,092
Coal tonnage for 1873	126,429
Increase	22,663

The increase from passengers was $24,607 35, of which $12,620 72 is from local business. The increase in the number of passengers carried was 118,476.

The equipment of the M. & T. R. R., consisting of one locomotive, three passenger cars, one baggage car, twenty four long box cars, nine long platform cars and one short platform car, has been added to the equipment of the road.

Two locomotives, five passenger cars, five freight cars and seventeen coal cars have been added to the rolling stock.

One locomotive, five passenger cars, three baggage cars, twenty five freight cars and twenty five gravel and coal cars have been rebuilt.

1,030 tons of steel, 1,320 tons of new iron rails and 91,797 new sleepers have been used in repairing the track; 2,059 tons of rail have been taken up, repaired and relaid.

The new depots at Campello and Brockton have been completed, and others built at Rock and South Wareham.

New side tracks have been constructed to the extent of 17,232 feet.

These additions and improvements being within the old line of the road, the Directors have considered a proper charge to expense account, and they have been accordingly paid for from earnings. They have added to the permanent value of the property of the company, which is now in excellent condition.

The amount expended for these improvements and additions is as follows:

Cost of new equipment	$50,436 84
New stations	25,061 40
17,232 feet of side track, about	20,000 00
Cost of 1,030 tons of steel rails in excess of iron at $30 per ton	30,900 00

The number of sleepers laid is largely in excess of those taken up, and has considerably improved the track, which was before in good condition.

The Westinghouse and vacuum brakes are now used on 24 locomotives and 103 cars.

The mileage of trains has increased the past year 22,905 miles, and the computed expense per mile run is $1 18 against $1 22 last year.

The total amount of our business has increased but slightly the past year. In common with other railroads we have felt the effect of the general stagnation of business. The manufacture of iron, which in various forms is extensively carried on along our line, has been particularly depressed, and many of the largest establishments have temporarily closed their works or diminished production. The result has been at many stations a reduction in receipts, which has, however, been more than balanced by new or increased business at other points. With a return of the usual business activity in the community we may hope for largely increased receipts.

Some progress has been made in the construction of the bridge at Fall River, and its completion within the next year is expected. Its cost to this company will probably be not far from $175,000.

After the completion of this bridge, and establishing a connection with the Fall River and Providence Railroad, our railroad line would seem to be complete, and no further extensions required to develop the business of the section of country which depends upon our company for its transportation.

The Directors have, under the authority conferred by the stockholders in May last, subscribed for $741,000 in stock in the Old Colony Steamboat Company, and for $30,681 67 in stock of the Nantucket and Cape Cod Steamboat Company.

The results, so far as now ascertained, are highly satisfactory.

Our business the past season with Nantucket and the Vineyard has been much increased.

The New York business, upon which our prosperity largely depends, has been satisfactory.

It should be understood that this company is in no manner liable for any contracts or losses of the steamboat companies, and incurs no risk beyond the amount it has invested in the stock of these companies, which is less than the amount of the usual dividends for two years upon its stock.

While the indirect advantage to be gained by the establishment of substantial steamboat companies running boats in connection with our line, and managed in harmony with its policy, is very great, the Directors believe that no loss will follow the investment we have made in the stock of these companies.

It is too early to determine what return will be made in dividends on these investments.

The results of the business during the past five months, since the boats have been run by the new company, have fully met the expectations of the Directors.

A contract has bren made during the year for the operation of the Union Freight Railroad by this company, which will enable us to receive and deliver freight along the whole water front of the city, and transfer our cars to any of the railroads terminating in Boston.

The equipment of the road is as follows: 41 passenger, 15 freight, and 6 switching locomotives; 137 passenger, 25 baggage, 806 long box, 10 short box, 338 long platform, 24 cattle, 72 stone, 13 short platform and 461 coal and gravel cars. Number of miles run by passenger trains, 913,714; by freight trains, 408,471; by gravel trains, etc., 55,194—total miles run one year to September 30, 1874, 1,377,379, an increase over the year ending Sept. 30, 1873, of 22,905. Number of passengers carried the past year, 4,375,316; do. carried one mile, 63,673,026. Tons of merchandise carried the past year, 633,727; do., carried one mile, 18 250,612.

President.—ONSLOW STEARNS.

Directors.—Onslow Stearns, Uriel Crocker, Benjamin Finch, Oliver Ames, Charles F. Choate, Samuel L. Crocker, Jacob H. Loud, Thomas J. Borden, Royal W. Turner, Francis B. Hayes, Ephraim N. Winslow, John S. Brayton, Prince S. Crowell.

Treasurer.—JOHN M. WASHBURN.

Superintendent.—J. R. KENDRICK.

Erie Railway and its Connections.

CAPTAIN TYLER'S REPORT.

(Continued from page 1573.)

I find that between September 30, 1872, and September 30, 1873, there were rebuilt six engines, two at Jersey City, and four at Susquehanna, and that between September 30, 1873, and the present time there have been nine engines rebuilt, one at Jersey City, one at Buffalo, and seven at Susquehanna; there were also purchased during these years, between September 30, 1872, and September 30, 1873, three, and between September, 30, 1873, and the present time, nine engines. Properly to perform the service of the Erie, with its present traffic, it is necessary that, at least, thirty three new engines should be purchased, to replace those engines whose numbers are on the books, but which are not now in existence; and, looking to the future, without considering the increase that may be expected in the traffic of the road, it is furthermore necessary that twenty five engines be rebuilt annually. By this means the present traffic might be more effectually worked, and the expenditure in engine repairs might be reduced to a much lower proportion per mile—say from 8c. per engine mile, which it is at present, to 5c. or 6c. in the course of two or three years. The economy which may thus be effected in the engine repairs will be very considerable, and may be estimated to amount to a saving of, say, $200,000 a year on the present figures. The average expenditure for fuel during the last four years appears to have been, as far as can be ascertained, 9.69c. per mile, and further economy may be effected in this respect when the different classes of engines have been reduced in number, and when a standard system of construction has for some time been adhered to, when the engines are worked for a smaller number of hours per day, and when all the engines are of a more economical construction as regards the sizes of the fire boxes, and the introduction of better valve motions. Probably a further $150,000 might be saved annually on this account. There are 341 four wheel coupled engines with bogie trucks, and 108 six wheel coupled engines with bissel trucks under their leading ends. Some of the switch (or shunting) engines are without trucks. With a view to greater safety in the case of the passenger engines, the cast-iron wheels commonly employed in the bogie trucks have been superseded as regards the leading wheels by wrought iron wheels with steel tyres; it being properly considered that the liability to fracture of the flanges and other parts of the cast iron wheels, which would be less important in other situations, is more dangerous in the leading wheels of an engine. Several serious accidents have occurred, on this and other lines, from the leading wheels of the trucks breaking under passenger engines. Some of the freight engines have been similarly altered, and it is obviously desirable that the remainder should be altered as soon as possible. A large proportion of the engines have heretofore been highly decorated with brass work and otherwise. This system has now been discontinued. The engines which are being constructed and altered are made plain, with iron sheeting, and are being painted a dark color. The saving thus accruing is found to be, for brass work and decorative painting discontinued, not less than $300 per engine; besides which there will be a still greater saving on account of labor in polishing the brass work, and labor and materials in keeping the decorative painting in repair.

Steel tyres only are used on the driving wheels of all the engines, excepting on what are called pushing engines, or assisting engines, on the Susquehanna incline, about eight in number, which are fitted with cast iron tyres. These cast iron tyres are unknown on English railways, but they are employed on several American lines.

The greater number of the engines are tender engines, and all the tenders run on bogie trucks. The engines and tenders together weigh as follows: For the six wheeled coupled engines, with bissel trucks, the weight averages 80,000lbs., and for the tenders 45,000lbs.; for the four wheel coupled engines with bogie trucks, the weight averages 72,000lbs., and for the tenders 45,000lbs., when loaded and in working order. The diameter of the driving wheels on passenger engines varies from 5ft. 6in. to 6ft., and on freight engines from 4ft. 6in. to 5ft. The diameter of the cylinders is generally 17in, or 18in., with a stroke of 22in., so that these engines are capable of hauling heavy loads. The freight engines run commonly with loads of forty cars over the low grades on the Delaware and Susquehanna divisions, 244 miles between Port Jervis and Hornellsville, where the heaviest grades do not exceed (except in passing the summit between Deposit and Susquehanna, where pushing engines are employed) 16ft. to the mile, or 1 in 330. A train of forty wagons, loaded, may be computed to weigh between 700 and 800, or, say, 800 tons, besides the weight of the engines. On other divisions the weights hauled are not so great, owing to the nature of the gradients. On the eastern division, between Jersey City and Port Jervis, 87¼ miles, with a maximum gradient of 60ft. to the mile, the load is eighteen cars, weighing, say, 360 tons. On this division, the Mogul, or six wheel coupled engines, are principally employed. On the Western division, the maximum gradient is 52ft. to the mile, and the load is about eighteen cars, weighing, say, 360 tons.

Unfortunately, these engines are, as has been already stated, of various types, built by different manufacturers at different times, according to the opinions of different engineers; and it will be impossible fully to attain the desired system of economy until they have been reduced to a smaller number of standard types required for different purposes. The greater the number of classes of engines, the greater the difficulty in keeping duplicate portions on hand, to be used in case of accident or of required renewal. Delay, therefore, occurs in the repairs of the engines which would not otherwise be necessary; larger amounts of expensive materials are required to be kept on hand than would be necessary if there were fewer types of such materials. The engines are now being constructed from designs which have been prepared with a special view to the employment of a small number of patterns of the different parts; the same boilers, cylinders, valve motions, and other details, will then apply as well to the six wheel coupled engines as to the four wheel coupled engines. All future engines will also be constructed with a view to their easy conversion to narrow gauge engines, when the time shall arrive for altering the gauge of the road from 6ft. to 4ft. 8½in., and the same system is being followed as the engines come into the shops for extensive repairs. The cost of converting one of the existing engines is estimated at $3,000, whereas it is believed that the cost of altering an engine built with a view to conversion will not exceed $800. The principal item in the conversion of existing engines is the alteration of the fire box, which entails an expenditure of $1 500. In new or altered engines the fire box is made of the required width for the narrower gauge, and no further alteration in this respect then becomes necessary. In new or altered engines, also, the cylinders are so cast that the saddle between them is the only part which will require renewal. The tender and car axles are how constructed with a view to their being shortened and turned down, as required, to suit the narrower gauge.

CAST IRON WHEELS.

Some interesting statistics are recorded in this department in regard to the durability of cast iron wheels used in the bogie trucks, under the leading ends of the engines, under the tenders, and under the passenger, freight, or other cars.

The wheels used for these various purposes are generally of the same character. They are of cast iron, with a sufficient proportion of white iron to enable the chill to sink to an average depth of half an inch into the treads and flanges; and the question is the more interesting, inasmuch as wheels of this description are in almost universal

employment in America, though they are not regarded with favor in the United Kingdom. They cost about $20 a piece when new. They weigh about 500lbs. for a wheel of 33 inches in diameter, which is principally employed, and they are worth from $7 to $10 a piece when worn out or defective, according to the varying prices of old iron.

I find with reference to the car wheels of 28, 28, 30 and 33 inches diameter, that there has been an extraordinary difference in the durability of the wheels from different manufacturers. The average durability of the wheels from the different manufacturers has been, respectively, 2 7-30, 8 12 30, 19 11-30, 22 7-30, 25 14-30, 33 15 30, and 36 16 30 months. As regards the wheels under the engine trucks, the average from four manufacturers for the durability of such wheels has been, respectively, 14 1-30, 14 23 30, 15 8 30, and 24 3 30 months.

It is impossible to determine precisely the mileage of the cars for the periods above stated; but a wheel lasting three years would probably run 80,000 miles during that period. The mileage of the wheels under the engines can be more accurately ascertained, and may be considered to amount, for two years and one month, to 55,000 miles. The average life, therefore, of a cast iron car wheel from the best makers may be taken to be about 80,000 miles, and of a similar cast iron wheel under an engine truck about 55,000 miles. The durability of these and other wheels depends, of course, on the speed at which they run, the loads which they carry, and the descriptions of track on which they travel, as well as upon the materials of which they are composed, and the care employed in their manufacture.

Car Stock.

The car stock owned by the Erie comprises 222 first class passenger cars, 50 second class and emigrant cars, 76 baggage and express cars, 38 milk cars, 3,552 box freight cars, 407 box stock cars, 171 other stock cars, 197 oil cars, 279 oil tank cars, 2,421 flat cars, including gondola cars, 2,479 eight wheeled, and 1,495 four wheeled coal cars, 35 eight wheeled, and 181 four wheeled cabooses, 27 derrick and tool cars, 200 gravel dump cars, three paymasters' cars, one directors' car, and one officers' car. Of these 197 passenger cars may be said to be in good condition, and twenty five in fair working order. Of the second class and emigrant cars thirty six are in good condition, eight in reasonable working order, and six require repairs or rebuilding. Of the baggage and express cars sixty five are in good condition, and eleven in fair working order. Of the milk cars twenty are in good condition, fourteen in fair working order, and four require repairs or rebuilding. Of the box freight cars, 500 of which were formerly owned by the Union Car Company, 2,052 are in good condition, 1,000 are in fair condition, and 500 require to be repaired or rebuilt. Of the box stock cars 107 are in good condition, 200 are in fair working order, and 100 require repairs or rebuilding. Of the other stock cars, 151 are in good condition, and twenty are in fair working order. Of the oil cars 172 are in good condition, and twenty five in fair working order. Of the oil tank cars, 254 are in good condition, and twenty five in fair working order. Of the flat and gondola cars, 1,821 are in good condition, and 550 in fair working order whilst fifty require repairs or rebuilding. Of the eight wheel coal cars, 1,729 are in good condition, 550 are in fair working order, and 200 require repairs or rebuilding. Of the four wheel coal cars, 745 are in good condition, and 750 in fair working order. Of the eight wheel cabooses, fifteen are in good condition, fifteen are in fair working order, and five require repairs or rebuilding. Of the four wheel cabooses, 124 are in good condition, fifty one are in fair working order, and six require repairs or rebuilding. Of the derrick and tool cars, twenty four are in good condition, and three are in fair working order. Of the gravel dumps, 149 are in good condition, and fifty one in fair working order. Out of a total, therefore, of 11,885 cars owned by the Erie, 7,666 are in good condition, and 3,298 are in fair working order, and 871 require repairs or rebuilding, which is being gradually done.

Besides the above there are leased by the Erie thirty nine first class cars from the Pullman Palace Car Company, all of which are in good condition. There are leased from the Barclay 842 four wheel narrow gauge cars, of which 300 are in good condition, and forty two are in fair working order. There are also leased from the Jefferson Car Company 1,500 four wheel coal cars, which may be stated to be in fair working order. The total number, therefore, of cars leased by the Erie is 1,881, of which 339 are in good condition, and 1,542 are in fair working order. We thus obtain a total of 13,716 cars, of which 8,005 are in good condition, 4,840 are in fair working order, and 871 require to be repaired or rebuilt.

The most important improvement which requires to be made in the company's car stock is in obtaining in all future construction uniformity of the bogie trucks and running parts for the different classes of vehicles.

The Union Steamboat Company.

The Union Steamboat Company is an important organization under the laws of the State of New York. It is practically owned by the Erie in the proportion 8,750 out of 10,000 shares. The fleet of this company consists of fifteen steamers of an aggregate carrying capacity of 14,000 tons, and added to this fleet are also seven steamers owned by Mr. Charles Ensign, of Buffalo, with an aggregate carrying capacity of 10,500 tons. These last are freighted by the Union Steamboat Company, being allowed the same divisions of rates with the railways, and by contract each steamer pays to the Union Steamboat Company $5,000 per year. The steamers of this combined fleet appear to be kept in a high state of efficiency and condition, and to be well regarded by insurance interests. The season of active operations commences on the opening of navigation, which varies from March to May in different years, and closes on 1st December. The routes and lines are as follows, all starting from Buffalo:—Two steamers to Toledo, Ohio; three to the Lake Superior copper regions; four to Green Bay, Wisconsin; and thirteen to Milwaukee and Chicago. In the course of these various trips, stoppages are made at all way ports where trade offers.

During the season of 1873 this company carried one ninth of all the grain shipments of Chicago, and, reducing flour to grain by weight, delivered over 13,000,000 bushels at Buffalo. They delivered to the Erie in Buffalo 177,500 tons, and to various consignees in Buffalo 184,400 tons, making an aggregate amount of east bound deliveries of 361,900 tons. The greater part of the freight to Buffalo consignees consisted of grain, which went forward mostly to New York via the Erie Canal. The amount of freight received by this company in Buffalo from all sources for transportation west was 100,632 tons, of which there was received from local shippers in the city of Buffalo 55,012 tons, from the Erie Canal 17,007 tons, and from the Erie Railway 28,620 tons. The largest item of freight handled by this company is grain, which may be taken to illustrate the proportion of the lake trade of Buffalo carried by the company, and the proportion given to the Erie. In the season of 1873 this company delivered in Buffalo 9,792,798 bushels of grain; of this amount there was delivered to the Erie 4,061,631 bushels. It appears, by reference to the report of the Secretary of the Buffalo Board of Trade, that the entire receipts of grain by lake were 65,046,292 bushels, and the proportion, therefore, of this amount carried by this company was about one seventh of the whole, of which less than half was delivered to the Erie. If that railway company had been furnished with a sufficient supply of cars, or if it had a proper elevator at Jersey City, thereby largely increasing the service of its cars, the steamboat company might have doubled its deliveries of grain to the Erie. The necessity of an elevator at Jersey City, referred to elsewhere, is undoubtedly of prime importance to both companies, as well as other terminal requirements there and at Buffalo. It would be better, also, if the entire fleet of steamers were owned by the Union Company. Many vexatious questions arise from time to time between the owner of the seven steamers above referred to, and the management of the Union Steamboat and the Erie companies. The business appears to be a remunerative one. It is stated that no vessel owners on the great lakes, who have adhered exclusively to that business, have failed to acquire wealth; and that the history of the Union Company also illustrates the same result. Starting with a fleet of old and small steamers it is now in good financial condition, with a superior fleet created wholly out of its own earnings and profits. There can be no doubt of the importance of this connection to the Erie.

New England Connection.

The Newburgh branch of the Erie diverges, as already indicated, from the main line at Greycourt, 55 miles from Jersey City. It is 18¼ miles in length, and has descending gradients eastward. It enters the business centre of the city of Newburgh, on the Hudson River, 60 miles north of the city of New York; and it gives to the Erie a tide water outlet 36 miles nearer tha nJersey City to Buffalo. At Fishkill, opposite Newburgh, the Dutchess and Columbia terminates at the Hudson River, and, in connection with a very imperfect ferry, affords a railway connection with New England. At Fishkill, also, the New York and New England (late the Boston, Hartford and Erie) is to terminate directly opposite the Erie terminus at Newburgh; and it is intended, as I am informed by Mr. Homer Ramsdell, jointly by this and the Erie, to form a transfer company for their mutual benefit, the Dutchess and Columbia also sharing equitably in the expenses and benefits with the other corporations. For this purpose the necessary lands have been secured on both sides of the river, which combine great advantages at their respective river connections for coal shoots and other purposes for the future traffic of these railways, with a depth of water in the Hudson River sufficient for the accommodation of any vessel that can enter New York harbor. I have had frequent occasion to refer to the value of the New England traffic, and it has, I learn, long been the policy of the Erie and New England to enter into alliance for securing mutually a free interchange of business between the Eastern cities and the West. The Commonwealth of Massachusetts advanced to the Boston, Hartford and Erie, during the years of 1868 and 1869, the sum of $3,000,000, and the Erie advanced a sum of $4,000,000, with a view to the completing of its line, and thus opening up another great route to the New England States. But, from a want of skill in the management, the work was suspended in 1869, and the property is now managed by trustees. A comparatively small sum would, however, finish the road which is now in operation—

	Miles.
From Boston to Waterbury	150
Providence to Willimantic	58
Brookline to Woonsocket	33
East Thompson to Southbridge	18
Dedham Branch	2
Total	261

It is equipped with rolling stock, valued at $1,250,000. Only 76 miles—known as the western division, between Waterbury and Fishkill—remain unfinished, on which $2,500,000 have been expended, and the work of grading is three-fourths done.

Coal Properties.

The coal properties in which the Erie Railway Company are interested, are in three different districts, and they are nominally owned by three separate companies. First the coal lands and mines owned and leased by the Towanda Coal Company in Barclay, Bradford County, Pennsylvania. Secondly timber and mineral lands and mines of the Northwestern Mining and Exchange Company in Elk and Clearfield and Jefferson Counties, Pennsylvania. Thirdly the lands and

mines in the Wyoming and Lackawanna Valleys, embracing the northern anthracite coal field of Pennsylvania.

ATLANTIC AND GREAT WESTERN RAILWAY.

This railway runs from a junction with the Erie Railway at Salamanca, New York, for 388 miles to Dayton, in the State of Ohio, with the Franklin branch from Meadville Junction to Oil City, nearly 34 miles long, and 127 miles of leased lines from Cleveland to Sharon, New Lisbon and Vienna, crossing the main line at Leavittsburg. There is also the Silver Creek branch 1¼ miles long. In addition to the above there are under contracts for lease, the Shenango and Allegheny Railway, of which 33½ miles are completed and running; the Pithole Valley Railway, 7 miles long; and the Pennsylvania Petroleum railroad, now under construction between Erie and Petersville, and points southeast of the latter city. The total length of the whole, main line and branches, is therefore as follows:

	Miles.
Salamanca to Dayton	388 07
Cleveland to Youngstown	67.10
Youngstown to State Line	13.00
State Line to Sharon	1.50
Niles to New Lisbon	35.00
Girard to Vienna	8.55
Junction to Oil City	33.78
Shenango to Harrisville	32.00
Pithole to Oleopolis (Pithole Valley)	7.00
Total	586.00

The Atlantic and Great Western Railway Company, or those interested in it, control at present the Cleveland, Columbus and Cincinnati Railway, to which I shall hereafter specially refer, and by its means gain direct access to Indianapolis. From Dayton there is a second means of communication with Cincinnati over the Cincinnati, Hamilton and Dayton road, on which there is a broad as well as narrow gauge; and traffic is also transferred at Dayton to a limited extent as well as at Galion. There is a direct means of communication with St. Louis via the Indianapolis and St. Louis Railway in connection with the Cleveland, Columbus, Cincinnati, and Indianapolis Railway; and at Cincinnati a second connection with St. Louis is formed by means of the Ohio and Mississippi Railway. The Atlantic and Great Western Railway from Salamanca to Dayton, 388 miles long, is laid throughout with a single line, and on a gauge of six feet between the rails. The Franklin branch, from Meadville junction to Oil City, 33.78 miles long, is also a single line on a six feet gauge. The leased line in the Mahoning division, from Leavittsburg to Cleveland, 50 miles long, is laid with four rails, or, as it is called, with a straddle track, to accommodate the six feet and 4 ft. 8½in. gauges. The Shenango and Allegheny line is on a gauge of 4ft. 9½in., as well as the Niles and New Lisbon, the Vienna, and the Hubbard branches, and the Pithole Valley Railroad. The Cincinnati, Hamilton and Dayton Railroad is laid with a (straddled) mixed gauge of 6 feet and 4ft. 9½in.; and the extension of the Cleveland, Columbus, Cincinnati, and Indianapolis Railway to Cincinnati is on a "compromise" gauge, between 4ft. 8½in. and 4ft. 10in. of 4ft. 9½in.

TRAFFIC.

The principal staples of traffic are coal, oil, lumber, and grain; and there is a considerable amount of flour, and, except recently, of cattle. Crude oil is carried from Oil City and from Harrisville in large quantities to Cleveland and other stations, where it is refined, and it is then carried eastward over this and the Erie systems of railway, as well as westward.

PASSENGER TRAFFIC.

The Atlantic and Great Western Railway Company depend mainly for passenger traffic, (1) upon local business, and (2) upon through traffic between the southwest and New York via the Erie Railway. The south western centres of the through traffic are chiefly Cincinnati and St. Louis. The main route heretofore open to them for through passenger traffic between Chicago and New York has been via the Lake Shore and Michigan Southern Railroad, by Cleveland, Leavittsburg, and Salamanca; and the distance by that route is 1,016 miles. There is break of gauge by that route at Cleveland only. The distance by the Pennsylvania Railway from Chicago to New York via Pittsburgh and Philadelphia is 916 miles. The Lake Shore and Michigan Southern Railways being one, and in close alliance with the New York Central Railway the Lake Shore and Michigan Southern Companies naturally send their traffic by the New York Central route, and the Atlantic and Great Western Company are consequently unable to obtain more than a small portion of such traffic. As regards the through traffic from St. Louis and Cincinnati, the Atlantic and Great Western Company have obtained a fair proportion of it mainly by the use of superior sleeping and day coaches, originally supplied by the Erie and Atlantic Sleeping Coach Company, but since leased to the Pullman Car Company; and by keeping good time with their through trains. The principal through passenger traffic is from Chicago to New York. This is a business traffic, and it is estimated that there are five passengers between Chicago and New York to one passenger between Cincinnati and New York; the latter being mainly a pleasure traffic, passing eastward in the early summer and westward at the end of the autumn, and being comparatively light for the remainder of the year. There does not appear to be much hope of greatly increasing the through passenger traffic of the Atlantic and Great Western Railway with its present facilities. There is, however, under construction, and expected to be opened in November next, a railroad called the Baltimore, Pittsburg and Continental Railroad, which is, perhaps, more commonly known as the Baltimore and Ohio Western Extension. It crosses the Atlantic and Great Western line at Mansfield, and it will afford a through route via the Erie and Atlantic and Great Western Railways between New York and Chicago, 979 miles in length. The distance from Mansfield to Chicago will be 306 miles, and the maximum gradient on the line from Mansfield to Cbicago is said to be 26ft. to the mile. Negotiations have already been commenced for an interchange of traffic with that line. The Baltimore and Ohio Company will not have any opposing interest to traffic between that line and New York via the Erie and Atlantic and Great Western Railways, the object of that company being to obtain west bound traffic from New York and from the coal and oil districts of the Atlantic and Great Western Railway, and to give to the Atlantic and Great Western Company in return east bound traffic, which is most important, in the proportion, usually of three to one, as between Chicago and New York, for New York and the New England States. When at some future time the important connection between the Atlantic and Great Western Railway and Pittsburg is made, for 76 miles, between Youngstown and that city, then the Atlantic and Great Western route between Chicago and Pittsburg, though 23 miles longer than the Pennsylvania Company's route between those cities, would be a better line in point of gradients, and would, in ordinary times, command a large and paying traffic at moderately good rates for cattle, coal, and iron.

FREIGHT TRAFFIC.

The general freight traffic between the Mahoning and other districts comprises about 40 per cent of the whole of the Atlantic and Great Western Railway Company's traffic. This traffic includes the carriage of the ores from Lake Superior and Cleveland to the Mahoning district, the carriage of coal from that district to Cleveland and to intermediate points, and the carriage of oil from the region below the Mahoning district to the refining works at Cleveland, and thence to New York, or else of crude oil or refined oil from the oil regions to New York and other places. There has been further a large grain traffic from the Toledo and Wabash Railroad, via the Lake Shore Railroad to Cleveland, taken by the Atlantic and Great Western and Erie route to New York; and a new route has lately been opened by which such traffic may be considerably improved. This new railroad from Toledo to Mansfield (87 miles long) has been constructed by the Pennsylvania Company, and negotiations are in progress for the carrying of traffic from the Wabash district by this route along the Atlantic and Great Western and Erie Railroads from Mansfield to New York and New England. This new line will also be important as affording access to Toledo for coal and iron from the Mahoning district. Passing westward from the Mahoning district, the next important point of traffic is Akron, where 2,000 barrels of flour are at times manufactured daily; and the greater part of this traffic, as well as of the grain and other agricultural products, passes along the Atlantic and Great Western Railway. Akron, containing 13,000 inhabitants, has increased rapidly of late years. Though some business is done with Chicago, there is not much Chicago traffic carried from Mansfield, where the Atlantic and Great Western Railway crosses the Pittsburg, Fort Wayne and Chicago, and the Baltimore and Ohio Railroads. At Urbana, the Atlantic and Great Western Railroad crosses the Panhandle and the Cincinnati, Sandusky and Cleveland Railroads. A considerable traffic of grain, flour, cotton, whiskey, tobacco, packed meats, and pork, are taken at this point; and this the best freight communication at present existing between the Atlantic and Great Western Railway and Chicago and Indianapolis. From Dayton there is also a considerable agricultural traffic, partly from the surrounding country, and partly from the Miami Canal. A siding has lately been put in for the convenient transfer of corn from the canal boats to the railroad cars. From Hamilton there is a direct connection with Indianapolis, Louisville, Evansville, Cairo and Memphis, and latterly with Little Rock, and by a new line with the Texas system. This traffic has averaged twenty five cars a day during the winter, and is capable of considerable increase during each succeeding winter. Cincinnati, which is connected by the Cincinnati, Hamilton and Dayton leased line with the Atlantic and Great Western system at Dayton, is the most important point at the west end of that system. It is a city of 225,000 inhabitants, with beautiful suburbs, and a large surrounding population. It is the largest manufacturing centre of the west, and its manufactures amounted during the past year to upwards of $140,000,000. In coming from a late spring in New York, I found a few days afterwards a ripened harvest in this neighborhood. I learn that out of 24,727 loaded cars forwarded from Cincinnati during the year, ending July 1874, 52 per cent went by the Erie and Atlantic and Great Western route; 25 per cent by the Cleveland, Columbus, Cincinnati, and Indianapolis Railroad to the Erie and New York Central routes; and 23 per cent by the Pennsylvania Railway route. And at the same time, of 18,867 loaded cars received at Cincinnati, 56 per cent came by the Erie and Atlantic and Great Western route; 22 per cent from the Erie and New York Central Railways over the Cleveland, Columbus, Cincinnati and Indianapolis route; and 22 per cent by the Pennsylvania route.

The Chesapeake and Ohio system has lately taken a large share of the Cincinnati traffic by water communication of 150 miles to Huntington, and thence by rail to Richmond, and steamer to New York. By carrying that freight through in six days, at a reduction of from $10 per ton received in the previous winters to $6, they caused a corresponding reduction of rates by the other routes and to other points during the past winter.

(To be continued.)

☞ Work on the Felton and Santa Cruz Railroad will commence as soon as the survey is completed. It must be finished by May 1, 1875.

☞ Mr. F. Alexandre has been chosen President of the Pacific Mail Steamship Co., vice Russell Sage, resigned.

American Railroad Journal.

Saturday, December 19, 1874.

Stock Exchange and Money Market.

In financial and commercial circles, business has shown less activity; and the consequent inquiries for Money for the requirements of operators in the local markets have been less urgent; while the demand from the interior has been fair. Rates have been comparatively steady, closing more favorable for the leading borrowers, with call loans quoted at from 2@5, generally at 3@4 and best mercantile credits at 5½@7 per cent per annum. The City Bank averages, on the last weekly exhibit, all indicated a further falling off, the most important changes having been the decrease in the legal tender reserve, partly through the outflow of currency to the interior. The Sub Treasury is also a loser, in the line of cash balances, as the result of the week's operations; the alteration against the office being most notable in the line of specie, due, in good part, to the export drain. The City banks last week further reduced their reserve of legal tender notes $751,400, and their deposit item $1,224,100, while also diminishing their specie average $248,400. They report an increase of $1,159,700 in the loans and discounts, and $208,300 in their circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $47,182,528 against $47,401,936, the preceding week; and a coin hoard of $52,784,729 against $55,034,032, on the previous return. The City bank exchanges, during the week, were $464,782,336, or a daily average of $77,463,722. The customs revenue of the port, during the week, was $1,608,000. The City banks reported their average of gold last week at $14,218,800, and their greenback average at $49,470,300. Their deposits stood at $218,408,000. The loan item was $284,903,300. The circulation was $24,804,300.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $9,087,100.

The aggregate of the outstanding U. S. currency, of all denominations, Dec. 1, was $429,987,811. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is now about 347 millions.

The U. S. Treasury balances at the opening of business on Wednesday were as follows: Currency, $14,820,000; special deposit of legal tenders for redemption of certificates of deposit, $48,305,000; coin, (including $22,000,000 in coin certificates,) $77,500,000.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 49 millions.

Gold has been more active, and, toward the close, quoted stronger. The speculative inquiry has been more confident, in view of the free export movement. The customs drain has been moderate for the season. The extremes of the week have been 110¾@111¾, closing on Wednesday at 111⅜@111½, as against 110⅞ on Wednesday of the preceding week. The specie outflow last week was $2,774,900. The imports of specie at this port since Jan. 1. have been $5,523,912, against $18,520,688 same time last year. The customs demand for Gold last week averaged $267,167 a day. Foreign Exchange has been comparatively slow of sale, with Bankers' sixty day bills on London closing on Wednesday at $4 84½@$4 85; sight bills on London at 4 90 @$4 90½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,541,818. The exports for the corresponding week of last year were $5,375,915, and for 1872, $5,703,541. The total exports since January 1, this year are $275,863,773 against $287,725,620 last year and $231,293,588 in 1868.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $5,531,358.

Government Securities have been more freely dealt in, and quoted higher, closing buoyantly. The demand has been mainly on investment account.

U. S sixes of 1881 closed on Wednesday of this week at 120½@120¾; U. S. Five-Twenties of 1862, at 113@113⅛; U. S. Five-Twenties of 1864 at 114¾@115; U. S. Five-Twenties of 1865 116⅞@117⅛; U. S. Five-Twenties of 1865 consolidated, 119@119⅛; U. S. Five-Twenties of 1867, 120⅛@120⅜; U. S. Five-Twenties of 1868, 120⅛@120⅜; U. S. Ten-forties at 114¼@114½; U. S. Fives of 1881, (Funding Loan) 113@113⅛; Six per cent. currency Sixes from 116⅜@116⅞.

At the Stock Exchange, the week has been comparatively tame, and values on the restricted speculative dealings, have been unsettled, closing weak. The demand for State and Railway bonds has been moderate and prices have been quoted easier in several instances. Railway and miscellaneous share property has been in much less request, and has been quite variable as to values, closing heavily.

General business, has been on a moderate scale, in the leading kinds of produce and merchandise. Breadstuffs have been less freely dealt in, and, at the close, quoted easier in price. Provisions and Cotton also lower, on a restricted movement. Groceries and Tobacco, in less demand, and less buoyant as to values. Wool has been more sought after, and held very firmly. Hides and Skins tamer; Leather, brisker; Petroleum, and Naval Stores, dull. Dry Goods, and Hardware, comparatively quiet. The Metal trade has been devoid of animation, though, in most instances, buyers have had the advantage. The most important transactions in Pig Iron have been sales of 7,000 tons No. 1 Extra Thomas, deliverable next season on p. t. And in Wrought Scrap Iron, 500 tons at $28. Eglinton Pig Iron quoted from yard at $35 50@$36; Glengarnock, $37@$38; No. 1 American Pig at $25@$26; No. 2 do. at $22@$24; Forge, $19@$23; English Rails at $47 50@$50, gold; American Rails at works, $50@$55; Old Rails, $30. Wrought Scrap, $28@$30. Ocean freights have been moderately active closing less firmly.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Illinois Central Railroad.

During the month of November, 1874, 5,504.44 acres of Land were sold for $27,783 47.

The Cash collected on Land Contracts during the same time was $34,997 09.

The Traffic on the Main Line in Illinois, in November, 1874, was $490,093 50, against $484,207 32 in November, 1873.

The Traffic of the Iowa Lines, (leased at 35 per cent of gross receipts) was $152,144 50 in November, 1874, against $151,832 15 in November 1873.

The total traffic on the main Line in Illinois, and on the Iowa Lines, in November, 1874, were $642,238, against $636,039 47 in November, 1873—an increase of $6,198 53.

☞ A survey is now being made between Gloucester City, N. J., and Woodbury, with a view to the feasibility of continuing the narrow gauge railway from the former to the latter city.

☞ John W. Garrett, Esq., has been unanimously elected President of the Baltimore and Ohio Railroad Co., for a seventeenth term.

☞ The completion and opening to public travel of the Nashua and Rochester Railroad was celebrated in Nashua, N. H., on the 16th inst.

The Coal Trade.

The supply of anthracite coal from all the regions for the week ending December 5, is stated by the Philadelphia *Ledger* at 294,195 tons, and of bituminous 58,355 tons, making an aggregate of 352,550 tons. The supply of coal sent from all the regions so far this year is 20,939,215 tons against 21,751,151 tons to corresponding period last year, showing a decrease of 811,933 tons, of which decrease 785,261 tons are anthracite. The coal and coke tonnage of the Pennsylvania Railroad last week was 97,695 tons, and for the year 3,143,612. Of anthracite and bituminous there were 3,191,188 tons, and of coke 453,408 tons. This includes the tonnage of coal both east and west. The anthracite coal trade from the Pennsylvania coal mines is pretty well over for the current calendar year, except for the line supply of coal.

☞ The McConnelsville and Ohio River Railroad Company, with a capital stock of $500,000, has filed a certificate of incorporation with the Secretary of State of Ohio. The line is to extend from McConnelsville through Morgan, Noble, Guernsey and Belmont counties, to a point on the Ohio river near Powhatan. The corporators are F. M. Atkinson, R. C. Miles, W. H. Atkinson, G. R. Atkinson, J. H. Israel and Nicholas Gallagher.

☞ The coupons of the Preferred Construction bonds of the Chesapeake and Ohio Canal Company, due July, 1861, will be paid at the banking house of Alex. Brown & Sons, Baltimore, on and after the 23d inst.

☞ The Third Mortgage bonds of the Cleveland and Pittsburg Railroad Co., maturing May 1, 1875, will be paid at any time before maturity at the Farmers' Loan and Trust Co., New York, with accrued interest to date of presentation.

☞ The Missouri, Kansas and Texas Railroad Company have notified the New York Stock Exchange of their intention to issue $7,000,000 of preferred stock in shares of $100 each.

☞ The stockholders of the Franklin Telegraph Company have confirmed the late lease of the line to the Atlantic and Pacific Telegraph Company.

Railroad Earnings.

The earnings of the Central Pacific Railroad in November, 1874, were $1,314,000, against $1,228,751 in November, 1873, and $1,293,957 in November, 1872. For the eleven months ending November 30, 1874, the earnings were $13,138,903, against $12,803,027 for the first eleven months in 1873, and $11,886,969 for the first eleven months in 1872.

The earnings of the Cincinnati, Sandusky and Cleveland Railroad for November, 1874, were $61,033 33, the expenses $40,000, and the net earnings $21,033 33. In November, 1873, the earnings were $51,739 99, the expenses $46,697, and the net earnings $5,042 99—an increase over the previous year of $15,990 34.

The earnings of the Burlington, Cedar Rapids and Minnesota Railroad in November, 1874, were $109,536, against $105,430, in November, 1873, an increase of $4,106. From January 1 to November 30, 1874, $1,120,174, against $1,061,876 during same time last year, an increase of $58,798.

The Chicago, Danville and Vincennes Railroad earned in November, 1874, $71,193, against $64,230, in November, 1873, an increase of $6,963.

The St. Louis, Alton and Terre Haute Railroad (Main Line and Branches) earned in November, 1874, $158,432, and in November, 1873, $131,886, an increase of $26,546. For the year to that date the earnings were: in 1874, $1,646,350; in 1873, $1,806,579—decrease, $1,602 29.

The earnings of the Denver and Rio Grande Railroad for the week ending November 30, 1874, more $843,798; same week last year, $538,738—increase, (56.6 per cent) $305,060.

The earnings of the Midland Railway of Canada for the week ending Nov. 30, 1874, were $3,658 84; and for the year to that date $288,152 58, against $303,129 51—a decrease of $14,976 93.

The earnings of the St. Louis, Iron Mountain and Southern Railroad Company for the first week in December were $84,200; same week in 1873, $51,001 58; increase, $33,198 42.

Meeting of Pig Iron Manufacturers.

A convention of manufacturers of pig iron was held in Philadelphia on the 10th inst., in pursuance of a call issued by the committee of seven appointed for the purpose at that meeting held on the 24th ult. After reading the call for the meeting, and the resolutions adopted at the previous meeting, the committee reported the following agreement, which was almost unanimously adopted:

The undersigned, pig iron manufacturers, believing that the greatly decreased demand in the consumption of pig iron imperatively demands a corresponding decrease in the amount produced; and believing also that through over production a crisis now exists in the pig iron business which requires prompt and energetic action to save it from threatened bankruptcy and ruin; and believing also the proper and most effective remedy is to be found in a decrease of production to correspond with the demand for consumption we, the undersigned furnace owners, in person and by their representatives, hereby agree, each with the other, that we will severally decrease the production at our respective works to a quantity not exceeding one half the capacity of our several furnaces and to faithfully continue and maintain such decrease of production for and during the whole of the year 1875, provided that this agreement shall not be binding until signed by the representatives of at least two thirds of the furnaces, exclusive of charcoal, in the United States; and provided further, that the signers to this agreement may withdraw and be released from the same on giving two months' written notice to the Secretary of the American Iron and Steel Association of their desire and intention to do so.

The following resolutions, offered by Col. Kauffman, of Lancaster, Pa., were adopted:

Resolved, That in our judgment it would be disastrous to the manufacturing and commercial interests of the country to attempt the resumption of specie payments in the near future, and that if attempted it would only be a failure.

Resolved, That the only way to resume is to get the business of the country in such condition by the regulating of the tariff on imports as will keep the balance of trade in our favor, and by that means keep our specie from going out of the country.

Resolved, That we heartily approve of the 3-65 bill of Judge Kelley, and ask our representatives in Congress to use all honorable means for its passage.

Mr. Whittaker, of Hellertown, Pa., presented the following resolution, which was adopted:

Resolved, That this Convention, representing the pig iron manufacturers of this country, earnestly protest against the ratification of the proposed reciprocity treaty with Canada, believing that such treaty, if ratified, would result in completely breaking down the barriers which now exist against the introduction to our markets of the products of low priced European labor; in disastrously impairing the revenues of the Government; in preventing the payment of the interest on our national debt, and in continuing indefinitely the general distress which now prevails.

On motion of Mr. Ainey, an Executive Committee of five was appointed to carry out the plan of curtailing production. The committee is as follows:

Messrs. Wm. H. Ainey, Allentown; J. B. Moorhead, Philadelphia; W. H. H. Gere, Geddes, New York; James I. Bennett, of Pittsburgh and H. L. Brooke, of Baltimore.

The meeting then adjourned.

Erie Railway.

At a meeting of the directors of this company, held on the 10th inst., the President submitted a statement of which the following is an abstract:

The earnings of the road for the year ending September 30, 1874, were: passengers $3,705,574 06, freight $9,714,110 92, coal $4,025,931 52, mails and express $915,493 54, and miscellaneous $237,788 72—total, $18,598,898 76. Against which are charged: general expenses $936,820 23, transportation department $6,663,826, road department $3,485,662 20, rolling stock department $2,477,429 89—total, $13,563,738 32; leaving a net revenue over working expenses of $5,035,160 44.

Compared with the previous year the earnings show a decrease of $1,413,707 75, with a decrease in working expenses of $76,904, making a decrease in the net earnings of $1,336,803 75.

The entire interest and rentals payable by the company for the year ending Sept. 30, 1874, exclusive of that payable on account of the $15,000,000 of Second Consolidated Mortgage Bonds, (the final disposition of which was made by Mr. Gray, while in London,) amounted to $4,005,900 per annum, in currency, equal to $333,825 per month For the ensuing year there will have to be added to the above amount the interest on these $15,000,000 of bonds.

On the 1st of July the floating debt of the company was $2,344,298 74. On the 1st of the present month it was $1,521,015 02, showing a reduction, by payments to that date out of the earnings, of $823,283 72, which has since been further reduced in the sum of $100,000, leaving as the present debt the sum of $1,421,015 02 only.

A comparative statement is given showing that the earnings of the road for the months of July, August, September and October, 1874, were $6,274,688 99, the expenses $4,301,764 03, and the net earnings $2,072,924 96. For the corresponding months of 1873, the earnings were $7,311,043,05, the expenses $5,096,486 15, and the net earnings $2,214,556 90—being a decrease in earnings of $936,354 06, in expenses of $794,722 12, and in net earnings of $141,631 94.

A comparative statement of the transactions of the supply department is also given showing that the purchases during the four months named were: in 1874, $526,806 25; and in 1873, $1,364,641 91—a difference in favor of 1874 of $837,835 66.

The earnings for the first week in December, 1874, are given at $526,774 57, against $496,878 46 for the first week in December, 1873.

With the earnings at $22,000,000 per annum, and the expenses not reduced below 62 per cent, a net revenue of $8,360,000 would be the result, an amount sufficient to discharge the entire interest and rental accounts and leave a balance of $3,199,100 to be applied in such a way as the directors, or stockholders might direct.

With reference to the use of steel rails, the President says: "Believing that there is great economy in the use of steel rails instead of iron, I have, since this Board took charge of the property of the company, purchased 6,000 tons thereof, using iron only so far as necessary to exhaust that on hand and to keep the track in repair but steel entirely for renewals. I believe this to be sound policy, and hope it will have the approval of the Board. The roadway and equipment is daily being improved."

Atlantic and Gt. Western Railway.

At the annual meeting of the stockholders of this company, held on the 14th inst., the following gentlemen were elected directors: J. H. Devereux, William H. Upson, New York; C. Otis, Reuben Hitchcock, Henry E. Parsons, Sobieski Ross, A. Hegewisch, Thomas Warnock, John Tod, James H. Fay, George T. Perkins, James F. Clarke and John Clinton Gray. At a meeting of the new board held subsequently an organization was effected with J. H. Devereux as President, F. E. Rittman, of Meadville, Penn., as Vice President, and Mr. Warnock, of Meadville, as Secretary. Mr. Devereux then made the following appointment of officers, acting under his authority as Receiver of the company: P. D. Cooper, General Superintendent, Cincinnati, Ohio; F. E. Rittman, Treasurer; Thomas Warnock, Auditor; Charles Latimer, Chief Engineer, Meadville; W. B. Shattuck, General Passenger Agent, and G. G. Cochran, Assistant General Freight Agent, Cincinnati, Ohio. A statement of the operations of the road for the fiscal years ending September 30, 1873 and 1874, was presented, of which the following is an abstract:

Statement showing the cost of road, equipment and appurtenances as effected by the trustees of reorganization, and the securities of this company used by them for the purpose of obtaining possession of the road and its franchises, together with sundry credits arising from sales of securities from sale of material and from claims collected belonging to the property so obtained.

Atlantic and Great Western first mortgage bonds		$12,903,825 00
Atlantic and Great Western second mortgage bonds		8,526,679 69
Atlantic and Great Western third mortgage bonds		27,983,000 00
Atlantic and Great Western preferred stock		9,876,250 00
Atlantic and Great Western common stock	$16,246,898 60	
Atlantic and Great Western less returned	1,458,250 00	
		14,788,648 60
Atlantic and Great Western fractional certificates issued		5,213 12
Atlantic and Great Western reorganization stock outstanding		655,500 00
Ohio division first mortgage bonds outstanding		2,416,300 00
Erie and New York Central Railroad bonds outstanding		14,000 00
Total		$77,169,416 41

CREDITS.

By cash and supplies furnished by the trustees out of above Atlantic & Gt. Western securities and from claims collected	$1,281,184 66	
By cash received in exchanging a bond for fractional certificates	50	
By material sold out track	634,540 25	
		1,915,725 41
Net cost		$75,253,691 00

Comparative statement of earnings and operating expenses for fiscal years ending 30th September, 1873 and 1874, with a note giving an analytic comparison of operating expenses between the years named:

	1873.	1874.
Gross earnings	$5,315,489 18	$4,838,257 08
Operating expenses	3,479,532 03	3,629,315 84
Net earnings	$1,835,957 10	$1,208,941 24
Cost of operating	65.46 p. c.	75 p. c.

NOTE.

The operating expenses for the year ending Sept. 30, 1874, were	$3,629,315 84
In which was included the cost of all track material used in that year, but if as in 1873 it had been charged to construction, it would have reduced the expenses by	311,386 00
And have made the operating exps.	$3,317,919 84
And have made the cost of operating 68 58 per cent against 75 per cent as shown above.	
The operating expenses for the year ending Sept. 30, 1873, were	$3,479,532 03
To which if a like cost of materials used in track in 1874, as shown above, be added	311,386 00
It would make the operating expenses for 1873	$3,790,918 03
And the cost of operating 71.32 per cent against 75 per cent in 1874.	
If to the operating expenses of the year ending 30th Sept., 1873	$3,479,532 02
There be added the total cost of the material used in track in that year, but which was charged to construction	671,302 22
It would make the total operating expenses	$4,150,834 25
And the cost of operating 78.59 per cent against 75 per cent in 1874.	
If in the fiscal year ending 30th September, 1874, the same rates for passengers and for freight had been received as were received in 1873, and had the total cost of materials used in track in 1874 been charged to construction, the result would have been as follows:	
There would have been earned additional for passengers	$111,771 77
There would have been earned additional for freight	504,262 84
Total additional earnings	$616,034 61
To which add the actual earnings of 1874	4,838,257 08
And the total earni'gs for 1874 would have been	$5,454,291 69
And this would have reduced the cost of operating to 60.83 per cent against 65.46 per cent in 1874.	

Statement of loss incurred since September 1, 1871:

Accrued interest on bonded debt for year ending September 30, 1872, viz:—Estimated—

On first mortgage bonds from Jan. 1 to Sept. 30, 1872	$852,035 88	
On second mort. bonds from March 1 to Sept. 30, 1872	401,663 21	
On reorganizati'n stock from Sept. 1, 1871, to August 31, 1872	181,103 04	
On bonds of Erie and New York Central R. R. from Mar. 1, 1872, to Sept. 30, 1872	571 66	
On first mort. Ohio Division from April 1, 1872, to Sept. 30, '72	83,517 00	
Total	$1,518,890 79	
Less balance to credit of income account for same period	855,670 25	
		$663,220 54

Accrued interest on bonded debt for year ending Sept. 30, 1873, viz:—Estimated—

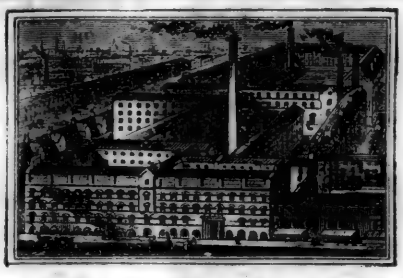
On first mort. bonds from Oct. 1, '72, to Sept. 30, 1873	$1,159,830 20	
On second mort. bonds from Oct. 1, 1872, to Sept. 30, 1873	698,414 22	
On reorganizat'n stock from Sept. 1, 1872, to August 31, 1873.	51,156 67	
On bonds of Erie and New York Central R. R. from Oct. 1, 1872, to Sept. 30, 1873	980 00	
On first mort. Ohio Division from Oct. 1, 1872, to Sept. 30, '73	178,003 00	
Total	$2,088,384 09	
Less balance to credit of income acco'nt for same period	129,162 82	
		1,959,221 27

Accrued interest on bonded debt for year ending September 30, 1874, viz:—Estimated—

On first mort. bonds from Oct. 1, '73, to Sept. 30, 1874	$1,176,000 00	
On second mort. bonds from Oct. 1, 1873, to Sept. 30, 1874	710,000 00	
On reorganizat'n stock from Sept. 1, 1873, to Sept. 30, 1874	44,289 20	
On bonds of Erie and New York Central R. R. from Oct. 1, 1873, to March 1, 1874	402 51	
On first mort. Ohio Division from Oct. 1, to Sept. 30, 1874	168,000 00	
Total	$2,098,691 71	
On leased lines rental trust bonds, 1872, from Jan. 1 1874, to Sept. 30, 1874	311,957 75	
On leased lines rental trust bonds, 1873, from Jan. 1, 1874, to Sept. 30, 1874	184,868 30	
*On Western extension certificates from Jan. 1, '74, to Sept. 30, '74	131,050 43	
		2,726,568 19
Balance to debit of income account as per table No. 11		590,094 07
Total as per balance sheet		$5,939,104 07

* NOTE.—There will be a credit to "accrued interest" on Western extension certificates arising from dividends on stock of C. C. C. and I. R. R., when trustees' account will be entered on the books.

Statement showing the total cash received by the Treasurer, the sources from which it was received and on what account it was expended, for the twelve months ending September 30, 1874:



RECEIPTS.

To balance from Sept. 30, 1873	$116,347 18

Manufactory of the Spencérian Steel Pens, Birmingham, England.

SPENCERIAN
DOUBLE ELASTIC

STEEL PENS

The superiority and excellence of these justly celebrated Pens, are appreciated, as is shown in their constantly increasing sale. They are comprised in 15 numbers, of which *one number* alone has an annual sale of more than

5,000,000.

The *Spencerian Pens* are manufactured of the very best material by the most expert workmen in Europe, and are famous for their elasticity, durability, and evenness of point.

The Spencerian Pens are for Sale by all Dealers.

We make Fifteen Numbers of Pens, differing in flexibility and fineness of point, adapted to every style of writing, as follows:

No. 1. College Pen. *Point Fine; Action Perfect.* This is a great favorite with our leading penmen, is largely used in the Schools and Commercial Colleges throughout the country, and gives better satisfaction than any Pen before the American Public.

No. 2. Counting-House Pen. *Point Fine and Flexible,* well adapted to the use of Correspondents and Accountants.

No. 3. Commercial Pen. *Point Medium.* An Easy Writing Business Pen.

No 4. Ladies' Extra Pen. *Point Extra Fine and Flexible.* For Delicate Fine Hand Writing this is a very superior Pen.

No. 5. School Pen. *Point Fine, Medium in Flexibility.* For a durable School Pen it has never been equaled.

No. 6. Flourishing Pen. *Point Long, Flexible and Medium in Fineness.* For Off-hand Flourishing.

No. 7. Quill Pen. *Point Medium, Quill Action.* A Smooth, Easy Writing Pen. Its name well represents its qualities.

No. 8. Congress Pen. (New.) *Medium Flexible Point.* A *very* superior Pen for all styles of writing. This Pen undergoes a process that renders it non-corrosive and *three times* more durable than any ordinary steel Pen.

No. 9. Bank Pen. *Point Long and Flexible.* A great favorite with Accountants, Tellers, &c.

No. 10. Custom-House Pen. *Point Medium.* Well adapted to all styles of Bold-hand Writing.

No. 11. University Pen. *Point Medium, very Smooth and Flexible.* The action of this celebrated Pen is very fine.

No. 13. Epistolaire Pen. *Point very Fine and very Flexible.* This is the Finest Pointed Pen made, and for very Delicate Writing, Map and Fine Pen Drawing, it has no equal.

No. 13. Engrossing Pen. *Point Blunt and Smooth.* Particularly adapted to Coarse-hand Writing and Engrossing.

No. 14. Artistic Pen. *Flexible, with extra fine Point.* This Exquisite and Truly Celebrated Pen is the Best Pen extant for Fine Ornamental Writing.

No. 15. The Queen. *Point extra fine.* Admirably adapted to all kinds of Fine Writing.

☞ *Sample Cards containing all the FIFTEEN Numbers, securely enclosed, will be sent by mail on receipt of 25 cents.*

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

PASSENGER CARS
Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the
HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

Miller's Platforms, Buffers and Couplers.

WONDERFUL SUCCESS OF A MOST VALUABLE INVENTION.

In the United States and Canadas there are 697 Railroads; and of this number 587 are now using the above Improvements, leaving only 110—mostly small roads having only from 2 to 5 cars—still using the old style of platform and coupler. On these 587 roads there has been no case of telescoping of cars, no lives lost or injuries sustained in coupling cars, nor has any person or persons fallen between the platforms since the cars were changed. The violent side swaying of cars when running at a speed of 20 miles or more per hour, is prevented on these roads by the above Improvements, and consequently the breaking of rails under passenger trains has also ceased on said roads. On each and every one of these roads, it is admitted by the Managers that these Improvements have made an annual saving equal to their cost, and that cars are not as safe without as with them.

A trial of seven years on the great trunk lines has established the truth of the above, and proved the accuracy of the inventor's predictions as made public in a printed circular published six years ago, and noticed in these columns. In that circular the statement was also made that the Improvements were *perfect* at that date, which time and use have proved to be true. There has been no change made in them since their first introduction, not even the slightest. The hook-head was modified from the first model filed with the first application in the patent office, so as to admit of the old style link and pin coupling, which was required in introducing the Improvements, but when the old system is entirely done away with, hooks may be made in the original form and of cast iron, reducing their cost below that of the link and pin draw head and coupling. That this time will come, ere long, is beyond question, as the annual increase of roads using the Improvements plainly shows, and their value as a means of economy and safety is daily becoming better known to Railroad Managers. This is a conclusion to which foreign Railway Managers readily arrive when inspecting the American system of Railroads, and as a natural consequence the Improvements are now being placed upon several roads in Great Britain, Germany, Russia, South America and every country to which the products of American Mechanism are called.

The above facts were obtained by our reporter from Col. Miller's office records and statistics through the kindness of his clerks—the Col. being out of town.

With the foregoing statement before us a slight indulgence in figures will be excused by our readers. Taking it for granted that an average of five persons were killed on each road in coupling cars or in the various dangers arising from low platforms and slack couplings, on the 587 roads now using the Improvements, and we have 2,935 as the number of human lives annually saved by the use of these Improvements.

Then, again, if ten persons are more or less maimed each year by the same causes, we have the round sum of 5,870 saved from injuries. If each person killed by accident costs the Railroad Company $5000 (the limit by statute) the aggregate saving in this particular is $14,675,000 annually; quite a little item and of some comfort to the Accident Insurance Companies for whom there could be added a large figure (more than half a million) saved by prevention of lesser injuries. Finally the case is summed up as follows: Under this system of making up and running trains—

Telescoping is impossible;

Oscillation is prevented, and consequently broken rail accidents do not occur;

In coupling cars, no lives are lost or injuries sustained;

Falling between or under the cars is utterly impossible; and, in brief, no Railroad Company can afford to run trains without them. Under the old system 20 miles per hour is the maximum of *safe speed!* Under the new 60, and more miles may be run per hour with greater safety as the Compression Buffers keep the train steady under the most rapid motion. Then why may not trains equipped with these Improvements be safely run from New York to Chicago in 18 hours including stops? and from New York to San Francisco inside of 4 days including stops? What say you, managers of the "*big lines?*" Shall we carry the Great Mail from New York to Chicago inside of 24 hours next season? Echo answers—"We expect to do it!!"

Carolina Central Railroad.

This road was completed on the 15th inst., the last rail having been laid and the last spike driven on that day. The first train from Charlotte reached Wilmington on the 15th inst., and on the 19th an official excursion to Wilmington from Charlotte took place. Trains are now running regularly between Charlotte and Wilmington, a distance of 188 miles. The Charlotte *Democrat* says:

To the great energy and perseverance of Messrs. Edward Matthews and Watson Matthews, of New York, and President Roberts and Superintendents Fremont and Johnson, and Col. Ames, the contractor, are our people indebted for the completion of this road. Mr. Edward Matthews, by hard work and surmounting many difficulties, has furnished most of the money to finish the work, and certainly deserves credit for the enterprise displayed in the matter.

The Carolina Central Railroad Company is a reorganization of the Wilmington, Charlotte and Rutherford Railroad Company, the property and franchises of the latter company having been sold in 1873 under foreclosure of the first mortgage and purchased by some of the bondholders who organized under the above title. The work of

building the road from the Pedee River to Charlotte, a distance of fifty miles, was then commenced, and, as stated above, has just been finished. The road is completed west from Charlotte to Cherryville, a distance of about 43 miles, and will, at some future time be extended to the Tennessee River. S. L. Fremont, Esq., is Chief Engineer.

New York, Providence and Boston Railroad.

The business of this company for the years ending August 31, 1873 and 1874, has been as follows:

Receipts:	1873.	1874.
From passengers	$480,696 17	$457,986 24

Interest on 7 pr. ct. bonds issued 1869	56,140 00	
		313,790 00
Surplus		$69,846 58

Compared with the previous year the receipts of 1874 show an increase of $13,728 56, with an increase in expenditures of $13,411 93, making an increase in net receipts of $316 63. The president in his report says:

Notwithstanding the depressed state of business generally, since the panic of September last, the receipts are about $14,000 in excess of the previous year, the net earnings also being slightly increased.

The old track has received the usual repairs; 27,000 new ties, 500 tons new rails, have been laid; and over 5,000 old rails repaired at company's shop and relaid.

Number of miles run by regular passenger and freight trains, 471,415; construction trains, 15,015; total miles, 486,430; at a cost for fuel of 14 cents per mile.

The second track has been completed from Kingston to Stonington, and on July 1st trains commenced running over it for the entire distance of 50 miles between the latter place and Providence, adding very materially to the regularity of our trains, and to the capacity of the road for both passenger and freighting business.

This has involved the rebuilding of 8 bridges where the road crosses the Pawcatuck River between Kingston and Westerly, the original bridges having been built for a single track only. In addition to this expensive work, 8 highway and 4 single truss bridges have been built, and 8 more highway bridges extensively repaired. With the exception of the one at Apponaug, which will require two new trusses, almost every bridge for the entire length of the road had been rebuilt during the past two years.

In every case the cost of the work, when done to accommodate the old track, has been charged to repairs; but when done for the second track, it has been charged to construction account.

The completion of the second track has also made necessary, in some cases, the removal to another point, or rebuilding, of the station houses and platforms, all of which have been completed except at Kingston. At this point, owing to the difficulty of procuring the necessary land in the neighborhood of the old station, authority was obtained from the General Assembly to move the depot about three quarters of a mile farther south, where several acres of land have been conveyed to the company at a nominal cost. The necessary roads leading to the station have been laid out by the proper authorities, and on the completion of the new station houses, (to be immediately commenced,) it is believed a village will rapidly spring up, thus adding largely to the business of the road, and to the interests of the community generally.

The policy of running short local trains out of Providence, inaugurated two years since, has been continued, and the number of trains increased the past year. We believe, that when the public are fully convinced that they can rely on having frequent and cheap communication, the country adjoining the road, within a reasonable distance, will be rapidly filled up by a class of people doing business in the city; and within a very few years the receipts from this daily travel will probably form a large and constantly increasing source of revenue.

Application having been made by the Warwick Railroad Company for permission to make a connection with our track at "Auburn Station," such permission has been granted, and an arrangement entered into by which, on completion of said road, this company will stock and run it for one year, at actual cost, including wear and tear, any deficiency in receipts to be made good by said Warwick Railroad Company.

The Wood River Branch Railroad, in which, as you were informed last year, this company has an interest, was put in operation about 1st July. We are informed that the business has fully equaled the expectations of its projectors, and that the prospects for the future are encouraging.

The value of fuel and materials is $110,648, being $31,737 in excess of previous year.

The increase of capital stock, of which 20 per cent was called in just before the close of the last fiscal year, was completed in October, excepting 720 shares, which were disposed of by public auction, in April, at 125, and the premium obtained, amounting to $18,000, was divided pro rata among the parties entitled thereto.

The company holds $178,000 of the seven per cent bonds of the issue of 1869. $76,000 will be held to retire the six per cent bonds due in 1878, and the balance will be available for future improvements.

The number of passengers carried over the road the past two years is as follows:

	1873.	1874.
Through passengers	178,044	166,874
Local "	377,315	371,644
Commuters	106,192	99,742
	656,551	637,760

The amount of freight transported over the road the past two years is as follows:

	1873. Tons.	1974. Tons.
Through freight	188,065	189,950
Local "	59,689	64,160
	247,754	254,110

Salesbury, Providence, R. I.; Nathan F. Dixon, Westerly R. I.; John A. Burnham, Boston, Mass.; A. S. Matthews, Stonington, Conn.

Superintendent.—A. S. Matthews.

Assistant Sup't.—J. B. Gardiner.

Treasurer.—Henry Morgan.

Secretary.—F. B. Noyes.

☞ The Montclair Railroad has been sold under foreclosure of the second mortgage bond of $780,000, for $3,000, and bought by Abram S. Hewitt, trustee, for the account of the bondholders.

New Corporations.

Certificates of incorporation of the following companies have been filed with the Secretary of State of Ohio:

The Springfield, Jackson and Pomeroy (Narrow Gauge) Railroad Company, with a capital stock of $2,000,000. Route, from Springfield through Clarke, Madison, Fayette, Highland, Ross, Pike, Jackson, Vinton and Meigs counties to Pomeroy—passing through the towns of South Charleston, Jeffersonville, Washington C. H., Greenfield, Bainbridge, Waverly and Jackson C. H. The corporators are George H. Frye, J. H. Thomas, J. T. Warder, A. P. Gatch, George W. Jones, James Pursell, Madison Pavey, William W. Bell, George I. Rucker, R. R. Seymour, Elijah C. Rockhold, James Emmitt, W. S. Jones, John C. H. Cobb, Horace L. Chapman, John L. Long and Henry F. Austin.

The Van Wert, Paulding and Michigan Railroad Company, with a capital stock of $50,000. Route, from Paulding to and intersecting with the Toledo, Wabash and Western Railroad. The corporators are Alonzo H. Selden, V. V. Pursel, David C. Carey, J. P. Gassen and Warren Baldwin.

The Scovill Avenue Railroad Company, of Cleveland, Ohio, with a capital stock of $150,000. The corporators are Horace Wilkins, J. H. Hardy, John Coon, John Wilkins and Henry Wilkins.

The Butte Silver Mining Company of Big and Little Cottonwood Districts, Utah, with a capital stock of $300,000, in shares of $100 each. Principal office in Marietta, Ohio. The corporators are John C. Paxton, Daniel F. Sayre, A. B. Waters, W. L. Robertson and J. R. Waters.

The Occidental and Orient Steamship Company, of San Francisco, has been incorporated. The directors are Leland Standford, Charles Crooker, David D. Colton, Lloyd Tevis and Mark Hopkins. The capital is $10,000,000 in 100,000 shares of $100 each.

Articles of incorporation have been filed in the office of the Secretary of State of Minnesota, of the "Taylor's Falls Copper Mining Company."

The books for the Miami Valley Narrow gauge Railroad were recently opened at Lebanon, Ohio, and in one hour's time $26,000 were subscribed.

Boston and Northwestern Railroad.

Upon inquiry, we learn that the subscriptions to the stock of the Boston and Northwestern Railroad are tolerably well advanced toward the sum necessary to secure a charter from the harbor line in South Boston into the town at Weston, at the point selected for a convenient junction with the Fitchburg and Massachusetts Central Railroads.

While the subscriptions have been going on the surveys have been pushed with the utmost vigor, and both the construction of the line and the grades appear more fit and ready than they did at the beginning. Seven tenths of the line will be absolutely straight. The curves upon the remainder are none of them sharp. Five-tenths of the way is upon a perfectly level grade; thirty-five per cent of the remainder is upon an up grade of 26 4-10 feet to the mile going West. The 15 per cent is upon a grade nowhere exceeding 40 feet to the mile going West. This grade of 40 feet is 13 feet better and easier than the promoters originally expected. There is no up grade coming East, the way in which the heavy traffic mostly comes, exceeding 26½ feet to the mile.

It has been alleged, in opposition to this railroad, that it crosses many of the main lines of railroad with which it was intended to form a junction at grade. This is not so. There is no grade crossing on any railroad on the way, and there will be but three highways which it will be proposed to cross at grade, each of which is of small importance and none within the limits of the city of Boston.—*Boston Journal.*

Central Railroad of New Jersey.

The Central Railroad Company of New Jersey, wishing to establish a fund from which to draw from time to time, as the necessities of the company may require, have executed a consolidated mortgage on all their railroads, whether main line or branches, terminal stations, station houses, shops, equipment of all sorts and all the appurtenances of the railway, to secure bonds amounting in the whole to not over $25,000,000. Of these bonds a sufficient amount will be reserved to exchange or pay at maturity the existing $5,000,000 first mortgage bonds, the $600,000 Newark branch bonds assumed by this Company, the $175,000 bonds outstanding of the issue due 1875, and also so many of the $5,000,000 convertible bonds as may not be converted into stock when that privilege comes into operation in 1875. The remainder of the bonds will be created from time to time as required.

The proceeds of the loan are required for the following purposes:—

Payments for coal interests, now appearing as part of indebtedness	$1,000,000
Steel rails to complete relaying the main tracks	750,000
New shops	500,000
Coal wharves and new dumping facilities at Port Johnston	400,000
Advances for new branches, second track, etc., on Lehigh and Susquehanna division	500,000
Improvements on Central road, new station houses, new tracks, filling Bay bridge	250,000
Bulkheads, filling, etc., at Communipaw, including settlement of riparian rights with State of New Jersey	600,000
Additional equipment	500,000
Total	$4,500,000

The new security is called "Central Railroad of New Jersey First Consolidated Bonds." They are coupon bonds of $1,000 each, dated September 1, 1874, due July 1, 1899. Interest seven per cent, quarterly, January, April, July and October. Trustee—The New York Guaranty and Indemnity Company. Five million of these bonds, Nos. 1 to 5,000, have been placed on the list of the New York Stock Exchange. The length of road owned and operated by the Company is as follows:

	Miles.
Main line, double track, 74 miles	146.80
Main line, three and four tracks & sidings	86.21
Newark branch, double track	11.20
Perth Amboy branch, single track	17.61
Other branches, sidings, etc.	5.18
Total single track	267.00
Leased roads:	
Lehigh and Susquehanna Railroad	122
Lehigh and Susquehanna branches	53
South Branch Railroad	15
Total	190

The balance sheet of the company states the capital stock at $20,000,000; bonded and other debts, $16,014,456; undivided profits, $671,510; total, $36,687,256. This is represented by 267 miles of single track road, valued at $12,304,616; station houses, shops, etc., $3,284,386; ferry boats, $524,046; equipment, $8,094,580; Wilkesbarre coal stock, $4,953,169; other property and bills receivable, $7,526,457. The gross earnings in 1873 were $8,881,366, the expenses $4,215,584, and the net earnings $4,665,782.

Finances of Alabama.

The following act has been approved by the Governor:

Section 1. Be it enacted by the General Assembly of Alabama, that the Governor of this State be, and he is hereby authorized, by and with the advice and consent of the Senate, to appoint two citizens of this State who shall constitute a Board of Commissioners, who shall hold their office for the term of two years from the date of their appointment, unless the duties hereby confided shall be sooner performed. The Governor of the State shall, ex-officio, also be a member of said Board of Commissioners.

Sec. 2. Be it further enacted, that it shall be the duty of said Commissioners, and they are hereby authorized and empowered to take charge and ascertain, liquidate, and adjust, the subsisting legal liabilities of the State of Alabama on the bonds issued, and the bonds indorsed by the State of Alabama, and the coupons on the same, in such manner as the interests of the State may require, and by negotiation to provide for the payment of such amount of the said several legal liabilities, as may be arranged for under the powers hereby conferred, and the interest that may be agreed to be paid upon the principal so negotiated, in such a manner and at such times as to them may seem advisable, and for this purpose said Commissioners shall, by advertisement or otherwise, at as early a day as practicable, require the presentation of all claims of the character aforesaid to them, with the amount claimed, and may inquire into the consideration alleged to have been paid or given to the State therefor, or that is alleged in support of the liability claimed against the State; provided, however, that no adjustment of said alleged liabilities or any part thereof, or an arrangement for the payment of any sum in discharge thereof, shall be binding on the State unless and until approved and ratified by the General Assembly thereof.

Sec. 3. Be it further enacted that said Commissioners be and they are hereby required to report their action in the premises to the Governor, who shall at each session of the General Assembly during the continuance of said commission, communicate the same or so much thereof as may not be incompatible with the public interest to the General Assembly of the State of Alabama.

The Governor has appointed L. W. Lawler, of Talledega, and T. B. Bethea, of Montgomery, as Commissioners. They are men of great financial ability.

Richmond and Danville Railroad.

At the annual meeting of the stockholders of this company held in Richmond on the 16th inst., Col. A. S. Buford was re-elected president, with Messrs. A. Y. Stokes, W. T. Sutherlin, W. L. Owen, Strickland Kneass and H. Haupt directors. The two latter are of Pennsylvania.

The Report of the President, which was presented, shows that the gross earnings of the road for the year (including the Piedmont railroad,) were $925,798 99; total expenses of operation for the year, $597,682 70; surplus of earnings over expenses, $328,116 29. Ratio of expenses, 64.55 per cent. Compared with last year the earnings are $31,330 43 less; the expenses $87,922 76 more.

Under authority heretofore given the company is about to sell to the Pennsylvania Company $1,600,000 of its bonds at a price that realizes 80 per cent. on the par value. This arrangement, it is asserted, will enable the company to satisfy nearly the whole of its indebtedness on bills payable. This is part of the $6,000,000 six per cent. gold bonds heretofore authorized.

Erie Railway and its Connections.

CAPTAIN TYLER'S REPORT.

(Continued from page 1603.)

The population of St. Louis is upwards of 400,000, and it is the great commercial city of the southwest. It owed its importance originally to the transfer at it of cargoes of steamers passing between the Upper and the Lower Mississippi; and afterwards to the radiation of railways from it towards the north, south, east, and west. Next to Chicago and Cincinnati it is the third city of importance as regards packed meats and pork curing; and it is the principal city for the manufacture of flour in the west. In consequence of friendly relations between the Atlantic and Great Western and the Ohio and Mississippi railroads, the former Company obtains as much traffic from St. Louis as from Cincinnati. The Ohio and Mississippi Railway Company changed their gauge from 6ft. to 4ft. 8½in. four years ago for a length of 340 miles between St. Louis and Cincinnati; and since that time the break of gauge at Cincinnati has to some extent operated against the increase of traffic by that route, a larger proportion of traffic having passed since that time over the Baltimore and Ohio railroads. Negotiations are, however, in progress with a view, until a change of gauge can be effected on the Atlantic and Great Western railroad, of changing the trucks of the cars at Cincinnati, so as to run the cars through between St. Louis and New York, and perhaps other places.

WAY and WORKS.

The right of way of the Atlantic and Great Western railroad is commonly 60ft. wide in the State of New York, the same in Pennsylvania, and 100ft. in Ohio, varying where greater width was occasionally required for heavy embankments or cuttings, or where the cost of land was excessive.

PERMANENT WAY.

The track is laid with rails of a flat footed section, varying from 56 to 68 lbs. to the lineal yard. Rather more than 100 miles are laid with steel rails, 32 miles with steel topped rails, and 36 miles with 56lb. English iron rails, 100 miles with 60lb. American iron rails, and the remainder with 68lb. American rails, making in all 550 miles on the main line and Mahoning divisions. The Shenango and Allegheny branch is laid for 33 miles with 56lb. rails, and the Pithole Valley, and the Silver Creek branches with 56 lb. rails. Between Salamanca and Dayton, 350 out of the 389 miles of rails are fished at the joints, whilst the remaining 39 miles have wrought iron lip chairs at the joints. All these rails are fastened on the usual American plan, by wrought iron spikes to the ties or sleepers. The estimates for the year 1874 for the track department, amounting to $1,724,230, comprise $250,425 for 7,155 tons of iron rails re-rolled and laid, and $903,500 for 9,035 tons of new steel rails. It is not desirable that any but steel rails should in future be employed in the 1st and 2nd and Mahoning divisions, on which there are running respectively 3,500,000 tons, 4,000,000 tons, and 4,000,000 tons of gross traffic annually; though iron rails may, if they can be obtained of good quality, be considered sufficient with the present traffic on the 3rd and 4th divisions, on which there are respectively 3,000,000 and 2,500,000 tons of gross traffic annually. There are already 32 miles in the 1st division, 28½ in the 2nd division, 13 on the Franklin branch, 28 on the Mahoning division, making a total of 101½ miles of steel rails. To maintain the track in good repair, it is desirable to provide further for 20 miles of steel rails for the 1st division, 10 miles for the 2nd division, and 20 miles for the Mahoning division; and 20 miles of iron rails should be provided for the other divisions. In order to lay the divisions above referred to entirely in steel, 20,000 tons would be required; but this work might be spread over three or four years, according to the severity of the winters and the increase of the traffic, these being the most important elements for consideration in regard to the renewal of rails.

SHARON BRANCH.

Of all the branches or improvements for the Atlantic and Great Western Railroad Company, none is perhaps more important to its interests, and none requires more speedy attention, than the branch to connect the main line, from a point 2 9-10ths miles west of Shenango, through the thriving town of Sharpesburg, with the Mahoning division at Sharon, Pennsylvania, a distance of rather more than 13 miles. By building this link, 12 blast furnaces and two rolling mills, besides a vast coal field (new), would be reached, opening a traffic from Cleveland estimated by Mr. Ferris (superintendent of the Mahoning division) at 100,000 tons of ore, or 10,000 car loads per annum, besides the production of these works and mines, and other supplies, with extensive passenger traffic, much of which would pass over the Atlantic and Great Western and Erie roads.

PETROLEUM.

The following statistics in regard to the district have been kindly forwarded to me by Mr. McKelvy:

Statistics of the Pennsylvania District. Compiled July 10, 1874, for Captain H. W. Tyler.

Year.	Total Annual Production in Barrels.	Average Price per barrel at the Wells.
1859	82,000	....
1860	500 000	....
1861	2,113,600	$2 79
1862	3,056,606	1 42
1863	2,611,359	3 65
1864	2,116,182	7 85
1865	2,497,712	6 48
1866	3,597,527	3 78
1867	3,347,306	2 54
1868	3,715,741	3 95
1869	4,210,720	5 12
1870	5,673,195	3 45
1871	5,715,900	4 15
1872	6,531,675	3 75
1873	9,884,719	1 72

As will be seen from the foregoing facts, the city of Titusville and its neighborhood forms a great central position of oil traffic, and it is likely much to increase in importance in that respect during the next few years. Its natural advantages in this respect have had their effect in attracting the various competing railway Companies.

CLEVELAND.

An important point to be noted in reference to the refining and transportation of oil is the situation of Cleveland and its connection with the Atlantic and Great Western system. Cleveland is one of the principal points for refining oil in the United States. The Atlantic and Great Western Company, with the improvements already referred to, will be able to control the mass of the traffic between the oil district of Cleveland. The oil refined at Cleveland is in an admirable position for reaching both eastern and western markets. During seven months of the year it has communication by water as well as by railway with New York; and it is in a first rate position for sending refined oil to St Louis, Cincinnati, and Chicago, which are the great centres for distribution of oil in the west and south. The Atlantic and Great Western and Erie system may therefore fairly be expected in the future to derive largely increased revenues from the transportation of crude and refined oil eastward and westward. The Atlantic and Great Western Company have the advantage of possessing, under their lease with the Cleveland and Mahoning Company, a river frontage from the foot of Cedar street past the Willow street bridge to State street, 2,300 feet in length, all of which is owned in fee by the Mahoning Company, and about 850 feet of further frontage continuously from the previous lot owned by the Atlantic and Great Western Company standing in the name of the late receiver, Mr. Potter. This frontage is used principally for iron ore, but one end of it, east of the Willow street bridge, for coals either exported from the Mahoning Valley or delivered to the steamers as fuel. It is possible to handle 800,000 gross tons of iron ore per annum on this wharf with present facilities, and this amount might be very much increased by further improvement. There is 14 feet of water opposite the wharves. In West River street, on the opposite side of the river to the freight shed and machine shops of the Cleveland, Columbus, Cincinnati, and Indianapolis Company, there is a further frontage of about 800 feet owned in fee by the Mahoning Company, and included in their lease to the Atlantic and Great Western Company, and about 500 feet more, in continuation, leased by the Atlantic and Great Western Company from private parties. Further on again for 800 feet the frontage belongs to the Mahoning Company, and is part of their lease, and the portion on the opposite side of the railway at that point is leased by private parties. This wharfage is entirely employed for the shipment of coal from the Mahoning Valley into lake steamers or other vessels for export to American or Canadian ports. The capacity of this wharf is about 350,000 tons per annum, working for only eight months in the year, while navigation is open. There is 13 feet of water opposite these wharves, and no vessels drawing more than 14 feet can enter Cleveland harbor. Further up the river there is a frontage of about 2,100 feet leased from private parties, for terms of twenty years, with only about 300 feet of wharfage constructed on it, and about 1,700 feet of frontage in extension of the above is owned in fee by the Mahoning Company, and leased to the Atlantic and Great Western Company, as well as the land for about 900 feet eastward, on which the engine shed and shops are erected. There is about 12 feet of water in the river opposite this frontage, which is being increased by dredging. As the numbers of cars both ways is already 800 daily, the space occupied by these latter buildings is much required for the improvement and rearrangement of the station yard, and with a view to the economical working of the traffic; and for this reason it is proposed, as described under the head "Locomotive Department," to remove the machine shops and engine shed to a point further eastward.

CLEVELAND, COLUMBUS CINCINNATI, AND INDIANAPOLIS RAILROAD.

The total length of the Cleveland, Columbus, Cincinnati, and Indianapolis Railroad is 471¼ miles, including the original main line between Cleveland and Columbus, 138 miles long, which was opened in February, 1851, and was the first through railroad built in the State of Ohio; the Bellefontaine or Indianapolis Division, between Galion and Indianapolis, 203 miles long; and the Springfield branch, between Delaware and Springfield, 50 miles long; all these being the property of the Company. There is also included in the 471 miles the leased line between Springfield and Dayton, 24 miles long, leased from the Cincinnati, Sandusky, and Cleveland Railroad Company; as well as the line between Dayton and Cincinnati, 48 miles long, which is leased from the Cincinnati and Springfield Company. There are also leased six miles from the Marietta and Cincinnati Company, and two miles, by which access is obtained to the Company's property in Cincinnati, from the Indianapolis and Cincinnati Company. In the two latter cases running arrangements only exist, though for long periods; but the other portions of railway leased are maintained and worked by the Cleveland, Columbus, Cincinnati, and Indianapolis Company. The Cleveland, Columbus, Cincinnati, and Indianapolis Company also own half of the line, 262 miles long, between Indianapolis and St. Louis; the other half being owned by the Pennsylvania Railroad Company, as referred to elsewhere. The steepest gradients on this line are 40 feet to the mile. The curves have mostly more than a mile radius; the sharpest curve, on the Indianapolis division, having a radius of 14 chains. The whole of these lines are single with the exception of the loops at the stations and 18 miles of second track, of which 13 miles are between Cleveland and Berea, and five are between Crestline and Galion. There are also 32 miles of second track, graded, and with first class masonry, completed for bridges, culverts, and cattle guards,

between Berea and Galion. The total length of sidings is equivalent to about 22 per cent. of the main line. Between Cleveland and Indianapolis there are altogether, though not consecutively, 160 miles laid with steel rails, and fished at the joints. Between Dayton and Cincinnati there are 48 miles laid with steel rails and fish jointed. The remainder of the line is laid with iron rails, and they have been fish jointed, excepting 55 miles, as the rails have been renewed from time to time. These 55 miles, occurring at different parts of the line, represent only those portions which it has not been found necessary to relay as yet with fish jointed iron or steel. The steel rails on the 48 miles on the south of Dayton weighs 57lbs. to the yard, but in all other cases, the rails, whether of iron or steel, weigh 60lbs. to the yard, and they are all of the usual American section, and secured to the sleepers by dog spikes. The sleepers are nearly all of them of white oak, while a few of them are of cherry, and there are 3,000 of them to the mile. The road is ballasted throughout with gravel, which varies in thickness from 6 to 15 inches. The Company are fortunate in possessing excellent gravel pits on their line, except on the Columbus Division, and the track is efficiently maintained, though new iron is required on certain portions of it here and there. There are seven stone viaducts on the Columbus Division (188 miles), 30 to 250ft. long, and two on the Indianapolis Division from 30 to 90ft. long. The greater part of the wooden bridges, which are not numerous in proportion to the length of the line, have been renewed within the last five years, and all of them within ten years. There are six bridges of iron, and they are, as well as the principal wooden bridges, on masonry abutments. In order to maintain the wooden bridges in thoroughly efficient condition, it is proposed to renew three of them during the present year; one on the Columbus Division, where a masonry arch is to be substituted for a timber girder of 45ft. a span; a second on the leased line north of Dayton, where it is proposed to renew in timber a bridge of 70ft. span; and a third is on the Indianapolis division, where either an iron or a new timber bridge will be substituted for the existing timber bridge, containing two spans of 50ft. each. At Cleveland the line of the Cleveland, Columbus, Cincinnati and Indianapolis Company runs into the Union Passenger Depot, which they own in connection with the Lake Shore and Cleveland and Pittsburg lines. This is a large stone building, with a roof covering six lines of rails and two platforms. There is also a commodious freight shed of brick on the property of the Cleveland, Columbus, Cincinnati, and Indianapolis Company, but jointly owned by that Company and the Lake Shore Company, with a wooden building, originally used, at the end of it. The above buildings are in a good situation on the northern part of the city, and on the shore of Lake Erie. In a central part of the city there is another large brick freight house, having a valuable frontage on the river. This is more than is required for the present freight wants of the Company, and is also used partly as a store shed. Near are extensive buildings, for the most part in brick with slated roofs, containing the machine shops, engine shops and other buildings.

On the south side of the main part of the city the company have lately acquired 35 acres of land, which will, no doubt, be very valuable when it is laid out, as contemplated, for the purposes of coal traffic and for heavy traffic of other descriptions. It affords river frontage 2,200 feet in length, besides a slip which has been constructed by the company 650 feet long, and affording 1,300 feet additional water frontage. This will again be largely increased by the construction of additional slips. At Columbus a large brick building is in course of construction, and is three parts completed, for the accommodation of the passenger traffic of seven different companies, and the Cleveland, Columbus, Cincinnati, and Indianapolis Company possess extensive grounds for all necessary station purposes. At Cincinnati the Company possess the freehold of 10 acres of valuable property in the heart of the city. Their freight shed will shortly require to be increased in size. They occupy the passenger depot of the Indianapolis and Cincinnati Railroad under the terms of their lease above referred to. At Indianapolis they are joint owners with other companies of the Union Passenger Depot. They have ample grounds at that station, but the buildings upon them require to be increased. Negotiations are in progress with parties owning adjacent properties, who propose to present the company with twenty five acres of land on which to erect new shops and other buildings for the locomotive and car departments, to be used in place of the existing building of that description, which, though sufficient for the present necessities of the company, are so located as to hinder the extension of the station yard and its better adaptation to freight purposes. The interested parties propose to make a further donation of 75 acres to the company by way of compensation for the expense of the removal, they being proprietors of considerable tracts of land in the vicinity, and their object being, by the alteration, to increase the value of their respective properties. These proposals will, if carried out, result in a very great advantage to the company. As a general rule, the company possesses sufficient land and facilities at their other station for carrying on their business, but there are some points at which improvements will require from time to time to be effected. The water accommodation in the way of tanks, &c., over the line has of late been largely increased, and is considered now to be sufficient for present necessities. The whole of the lines of this compano above mentioned run through a rich agricultural country, and reasonable rates having always been charged for local traffic, they have this advantage, that even when through rates are reduced by the competition of other lines, as they are at times, to considerably less than 1 cent per mile, the local traffic, which is principally dependent upon the results of the harvest, is not liable to have its rates further decreased in the same way by the competition of the other lines.

The financial position of the Cleveland, Columbus, Cincinnati and Indianapolis Railway appears to be exceptionally good. Its total liabilities, including 15,000,000 dollars of capital stock, amount to little more than 20,000,000 dollars. Its receipts for the year 1873 were 4,887,448 dollars, and its revenue expenditure, including taxes and interest on bonds, 3,779,809 dollars, leaving 1,107,638 dollars applicable to dividends. This company appears to have earned and paid, for twenty three years, regular semi annual dividends of 7 per cent or upwards, on the average. The dividend was unpaid for the first time in February last, owing to certain legal and financial complications in connection with the purchase and control of its stock by parties in the interest of the Atlantic and Great Western Railway. The earnings were, therefore, devoted to payments on account of construction and improvements. The coal traffic, which has been entirely developed within the last three years, and which, during 1873, amounted to nearly 300,000 tons, has, during the present season, been almost annihilated, from the general disturbed financial condition of the country. There has been one cause which has seriously affected the earnings of the present year. The properties above described at Cleveland, and the general improvements which have been made on the line, will place the company in a good position to take advantage of the increased traffic which must come upon the line when the present exceptional and depressed condition of this as well as other parts of the country has passed away.

Indianapolis and St. Louis Railway.

This railway is 262 miles long between Indianapolis and St. Louis, with one branch four miles long to Alton, and another, a coal branch, also about four miles long. The portion from Indianapolis to Terre Haute, 72 miles long, was completed five years ago, and is, as chartered, the Indianapolis and St. Louis railway proper, and the Company owning this line before completing it leased the line, 192 miles long, from Terre Haute to St. Louis for 99 years. The stock of the Indianapolis and St. Louis railway is owned jointly, in equal portions, by the Cleveland, Columbus, Cincinnati and Indianapolis Company, and the Pittsburg, Fort Wayne and Chicago Company, which is under lease to the Pennsylvania Railway Company. The Indianapolis and St. Louis Company pay for the leased portion of its road above referred to an annual rental of $450,000, and it has a bonded debt of $3,500,000. Its capital stock is $600,000, of which, as above stated, $300,000 is owned by the Cleveland, Columbus, Cincinnati and Indianapolis Company, and $300,000 by the Pittsburg, Fort Wayne and Chicago Company. The line is single throughout from Indianapolis to St. Louis, with sidings at the stations. It is laid with rails of the usual American section, weighing 60 lbs. to the lineal yard. One mile of the line is laid with steel, and the remainder with iron. The joints of the rails for about nine-tenths of its lengths are fished. The line runs for the most part through prairie land of rich agricultural character, and it depends mainly upon agricultural produce for its traffic. It competes for through traffic between St. Louis and the Atlantic with the Vandalia line, also running between St. Louis and Indianapolis, and belonging mainly to the Pennsylvania Company, as well as with the Ohio and Mississippi, running from St. Louis to Cincinnati, and the Toledo, Wabash and Western railway between St. Louis and Toledo. Besides Indianapolis with 70,000, and St. Louis with 400,000 inhabitants, there are intermediate stations on the line, the principal of which is Terre Haute, with 257,000 inhabitants, and eleven others, which contain from 2,000 to 5,000 inhabitants. By means of the magnificent bridge now completed over the Mississippi river at St. Louis, at a cost of $10,000,000, this line will be placed in direct communication with the railways on the west of the river. The earnings of this line are not sufficient to do more at present than to pay the rental, the interest on the bonds above referred to, and the operating expenses; but it is expected that, as the country progresses further in the rapid way in which it has hitherto grown, the business of this road will also increase. Coal of good quality is already being worked at eleven points in the neighborhood of the line in Clay County, about 55 miles from Indianapolis, is already a source of profitable traffic, and must become in future a source of large revenue to the Company.

Tucson and Guaymas Railroad.

Cyrus Strong, T. R. Morgan, J. C. Truman and D. B. Blair, of Binghamton, New York, have incorporated at that place the "Mexican Land Improvement Company of Sonora." The capital stock of the company is $15,000,000, and the principal place of business is at the town above named. The company contemplate extensive mining operations in Sonora and Arizona, but their principal object is to construct a railroad from Tucson, Arizona, to the city of Guaymas, Sonora, or El Paso. Blair is in the city of Mexico now for the purpose of obtaining from the Central Government a confirmation of the grants and privileges extended to the company by the State of Sonora. This incorporation closes the controversy which has existed for two years past about the enterprise, between Posten and Eldridge, of New York and Europe. It is a consolidation of their interests. Whenever the confirmation of the Acts of the Legislature of Sonora is obtained from the Mexican Congress, now in session, the incorporators say, the work will be commenced and pushed vigorously to completion.—*Sacramento Record.*

☞ The directors of the Kent County (Md.) Railroad Company have accepted the proposition of Mr. Hood, former superintendent of the Queen Anne's and Kent Railroad, to run regular daily trains from Chestertown to Massey's, and to supply the road with sufficient rolling stock to do the business until the road is sold.

American Railroad Journal.

Saturday, December 26, 1874.

Stock Exchange and Money Market.

The Money market has been moderately active. The main local inquiry for aid has been from speculative sources. Mercantile borrowers have not been urgent in their applications for accommodation. There has been a considerable outflow of currency noted to the interior, chiefly to the South, but this drain is not likely to continue very long. Preparations for the January interest and dividend disbursements have been making more notable progress, yet without leading to the usual serious, even if temporary, disturbance of the loan and discount market. Call loans have been quoted at from 3@5; and best commercial credits at 6@8 per cent per annum. The West is now returning currency to this point, which circumstance is favorable to the maintenance of the bank reserves. The City Banks, last week, reported diminished deposit, legal tender, and specie averages; with an increase in the loan and discount item. The Government office was also a loser of specie, while gaining slightly in the currency line. The financial and commercial position at the close of the year is, on the whole, much more satisfactory than had been anticipated some time since; and the new year is looked forward to much more hopefully. The City banks last week further reduced their reserve of legal tender notes $1,538,600, and their deposit item $2,700,200, while also diminishing their specie average $599,300. They report an increase of $506,500 in the loans and discounts, and a contraction of $72,700 in their circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $47,425,008, against $47,182,528 the preceding week; and a coin board of $51,110,464 against $52,784,729, on the previous return. The City bank exchanges, during the week, were $452,850,413, or a daily average of $75,475,069. The customs revenue of the port, during the week, was $1,432,000. The City banks reported their average of gold last week at $13,619,500, and their greenback average at $47,931,700. Their deposits stood at $215,707,800. The loan item was $285,409,800. The circulation was $24,731,600.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $7,264,250.

The aggregate of the outstanding U. S. currency, of all denominations, Dec. 1, was $429,987,311. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is now about 347 millions.

The U. S. Treasury balances at the opening of business on Wednesday were as follows: Currency, $14,553,969; special deposit of legal tenders for redemption of certificates of deposit, $49,870,000; coin, (including $21,279,800 in coin certificates,) $73,624,870.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 52 millions.

The Gold speculation has not been specially interesting, during the week. The dealings have been on a restricted scale, and the fluctuations in the price have not been important. The export movement has been liberal but has made no very decided impression on the course of the market. The customs drain has been light. The extremes of the week have been 111¼@111¾, closing on Wednesday at 111½, as against 111⅜ on Wednesday of the preceding week. The specie outflow last week was $2,849,386. The imports of specie at this port since Jan. 1, have been $5,537,590, against $18,520,688 same time last year. The customs demand for Gold last week averaged $238,667 a day. Foreign Exchange has been rather quiet, and weak as to price, influenced in part, by the more favorable financial advices from London. Bankers' sixty day bills on London closed on Wednesday at $4 84½@$4 85; sight bills on London at 4 89½@$4 90 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,508,850. The exports for the corresponding week of last year were $5,548,847. The total exports since January 1, this year are $281,672,623 against $293,273,871 last year.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,711,774.

Government Securities have been moderately active at generally well supported prices. The offerings of most issues have been restricted,

especially so of the later issues of Five Twenties, which have been in most favor with investment buyers.

U. S sixes of 1881 closed on Wednesday of this week at 121@121¼; U. S. Five-Twenties of 1862, at 113¼@113⅛; U. S. Five-Twenties of 1864 at 115⅛@115⅜; U. S. Five-Twenties of 1865 117⅛@117⅛; U. S. Five-Twenties of 1865 consolidated, 119⅝@119⅞; U. S. Five-Twenties of 1867, 120¾@121; U. S. Five-Twenties of 1868, 120¾@121; U. S. Ten-forties at 114¼@114½; U. S. Fives of 1881, (Funding Loan) 113@113¼; Six per cent. currency Sixes from 117⅛@117⅜.

Speculation at the Stock Exchange, has been excited and feverish. The course of values has been generally towards a lower range, under clique manipulations; but the later dealings indicated renewed firmness and buoyancy. Two or three failures in the Stock brokerage line; one of them resulting in the summary expulsion of the default ing operator. State and Railway bonds have been in moderate request and prices have been quoted about steady. Railway and miscellaneous share property has been variable, but, as already noted, closed stronger.

General business has been on a moderate scale, in most lines. Prices have not been seriously disturbed. Breadstuffs closed more firmly, on somewhat lighter offerings of stock, and a fair demand. Provisions have been less active, and hog products variable as to values; Beef, Butter and Cotton, about steady. There has been more animation in Cotton, but at lower figures; and in Petroleum, and Wool, at buoyant prices. Hides, steady, with more doing. Leather, in good demand. Tobacco, less sought after. Naval Stores, stronger on a moderate inquiry. Groceries, held with more confidence; Coffee, Teas, and Molasses in better request. Hardware and Dry Goods, quiet. The Metal trade has been generally inactive. The most important business has been in Steel Rails, of which some 18,000 tons have been sold for Chicago delivery at a price not made public. Iron and Copper quiet. Eglinton Pig Iron quoted from yard at $35 50@$36; Glengarnock, $37@$38; No. 1 American Pig at $24@$26; No. 2 do. at $22@$24; Forge, $21@$27; English Rails at $47 50@$50, gold; American Rails at works, $50@$52; Old Rails, $30. Wrought Scrap, $28@$30. Ocean freights have been quoted stronger, with more animation noted toward the close.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Progress of New Roads.

The completion and opening to public travel of the Nashua and Rochester Railroad was celebrated in Nashua, N. H., on the 16th instant.

The Carolina Central Railroad, connecting Wilmington and Charlotte, N. C., has been completed, and those cities are now connected by "hooks of steel."

The Utah Western Railroad is now completed for twelve miles west from Salt Lake City, and will be continued west to Stockholm as rapidly as possible.

The grading on the extension of the Utah Southern Railroad is completed to Payson.

The Lamoille Valley Railroad has been completed, and was formally opened on the 15th inst.

The completion of the Lowell and Andover Railroad was formally observed on the 17th inst.

The railroad between Eau Claire and Chippewa Falls, Wis., is completed.

The Eureka and Palisade Railroad in Nevada, is being built rapidly. It is now completed eight miles beyond Lodi, that is, twenty eight miles from Palisade, and the track is now being laid at the rate of a mile a day.

The survey of the proposed new route of the Vermont and Massachusetts division of the Fitchburg Railroad has been begun. It starts from a point near Wachusett station, thence through Westminster to Gardner. The object is to avoid the turn at Ashburnham Junction and to shorten the route.

The survey of the new railroad from Keene to Greenfield is twenty three miles.

The Iowa Southwestern Railroad will soon reach Iowa City. A large force is pushing it to completion between Clinton and Iowa City.

☞ The Philadelphia *Ledger* says that the Pennsylvania Railroad Company, after the payment of its semi annual cash dividend of five per cent, amounting to about $3,300,000 has a very handsome cash balance in excess. The current receipts of the company are quite large, and, with a steady retrenchment in every department, it is financially as easy as ever before. It is probable that the payment of its dividend scrip, due in March next, will be anticipated some time before maturity.

☞ The total bonded and coupon debt of the city of Memphis, Tenn., is stated at $4,582,897, in addition to which there is a floating debt of $2,000,000. The assets of the city are $1,317,680. The population of the city at present is 48,000, and the taxable wealth $29,539,714. Of the amount of its liabilities, $500,000 is passed due coupons, to meet which the city has $17,000 in its treasury.

☞ During the year ending November 30, 1874, these have been cancelled of the debt of Pennsylvania $1,280,186 57, as follows: $9,000 of 5 per cent bonds, $1,221,113 90 of 6 per cent bonds, $58 of "Relief" notes, and $19 67 of domestic creditor certificates.

☞ Orders have been given by the Southern Pacific Railroad, of California, to proceed at once with the construction of another section of 20 miles of the San Joaquin Valley line southward from Bakersfield, Cal. A force is already at work on the grading which is comparatively light.

Industrial Affairs.

About one thousand men are now employed in the Baldwin Locomotive Works, Philadelphia. Three locomotives for Brazil, and one for Cuba, will soon be completed and shipped. The firm have orders for sixteen first class engines from Brazil. They are also making six for the West Coast of South America, and a number for roads in different parts of the United States.

The National Locomotive Works at Connellsville, Pa., have closed a contract with the Cairo and St. Louis railway which will employ the establishment all winter.

The Cobourg Car Works, at Cobourg, Ont., and the Midland Manufacturing Company, at Port Hope, Ont., are each building two hundred and fifty cars for the Grand Trunk railway.

The Wason Car Manufacturing Company, Springfield, Mass., are about to begin work on their contract for cars for the New Jersey Central Railroad. They have also lately received an order from the same company for 1,000 pairs of car wheels and axles. These contracts furnish employment to about 400 men.

One thousand car wheels were recently shipped down the Housatonic Railroad by the Barnum-Richardson Company to the Pennsylvania Railroad Company.

The Sheffield steel works, at Windsor, Conn., have resumed operations, and are running mostly on cutlery stock, for which there is a good demand.

The Lochiel Iron Works, Harrisburg, Pa., started on full time on the 23d ult.

The Cheshire Iron works have started up again, with a force of 50 hands.

The Belfont furnace, at Ironton, Ohio. is preparing to go into blast next month.

Nearly all the Pittsburg glass works are in operation, some of them to full capacity.

☞ The Berks County Railroad, running from Reading to Slattington, Penn., 44½ miles in length, with a paid up capital of $93,000, has been sold for $500. This sale is subject to a lease of part of the road for 999 years to the Wilmington and Reading Railroad Company, and to a first mortgage for $1,500,000. The sale is the result of an agreement between the unsecured creditors of the road, whose claims amount to $500,000, and the mortgage bondholders. A new company is to be immediately organized to manage the road.

☞ The President of the Richmond and Danville Railroad Company, in his recent report, says that "the completion and opening in May last of the extension of the road of the Virginia Midland Company, between Lynchburg and Danville, has also instituted a local competition at the latter point, and to a material extent divides with the Danville road the business of that community."

☞ The Secretary of the Interior has decided that no lands shall be patented to the Union and Central Pacific Railroads under their Congressional grants until they pay the cost of the surveys of lands heretofore patented to them. This ruling is in accordance with a decision of the Supreme Court of the United States, that the Pacific Railroad Companies must pay the cost of survey prior to the issuance of patents.

The Coal Trade.

The supply of anthracite coal from all the regions for the week ending December 12, is stated by the Philadelphia *Ledger* at 239,945 tons, and of bituminous 51,805 tons, making an aggregate of 291,450 tons, an increase of about 75,000 tons on the corresponding time in December last year. The coal and coke tonnage of the Pennsylvania Railroad last week was 81,670 tons, and for the year 3,225,282. Of anthracite and bituminous there were 3,265,546 tons, and of coke 463,720 tons. This includes the tonnage of coal both east and west.

☞ Hon. B. T. Biggs has been re-elected President, and P. H. Irwin Treasurer, of the Queen Anne's and Kent (Md.) Railroad Company. P. H. Irwin will continue as Superintendent and Secretary.

☞ Trains on the Washington and Ohio Railroad now run to Round Hill, Loudoun County, only twenty five miles from Winchester, Va.

Sinking Funds.

Although it is a fallacy to suppose that a sinking fund can be contrived of such a nature that it shall of itself create any money, or (which is the same thing) that it shall of itself destroy debt, it by no means follows that a sinking fund may not be instituted and managed on such principles as to afford a most effective and useful machinery in the extinguishment of debt, and thereby facilitate the negotiation of loans for important public purposes. And by way of illustration we propose to recall the history of two of the earliest sinking funds known in the financial annals of Massachusetts; both of which, having fulfilled their functions, are now matters of the past, about which there can be no mistake of calculation.

1. By an act passed on the 4th of April, 1836, the legislature of Massachusetts authorized a subscription in the name of the Commonwealth for ten thousand shares in the Western Railroad Corporation. The cost of these shares was a million of dollars. In order to obtain this money, by an act passed on the 15th of April, 1837, the legislature authorized an issue of State scrip to that amount, bearing interest at the rate of five per cent. per annum, redeemable in twenty years; and further provided that—

The bonus or profit, if any, on the sales of the aforesaid scrip, together with all dividends of profits which may from time to time be declared on the railroad stock; and one half of all money which may be received from the future sales of the Commonwealth lands, with the interest thereon accruing, shall, until otherwise ordered by the legislature, constitute a sinking fund for the future purchase or final redemption of said scrip, and for the payment of interest on the State debt contracted by authority of this act; and if the same shall at any time be insufficient to the payment of such interest, the deficiency shall be paid from any money in the treasury not otherwise appropriated.

By a later act, passed in 1839, the appropriation of half the proceeds of sales of lands in Maine (which was at first to continue only "until otherwise ordered by the legislature") was made irrevocable. During the year 1837, scrip was issued to the amount of $238,000, and was sold at a premium of $11,650. The residue was issued from time to time during several years afterwards,

to an aggregate amount of $995,000, as assessments became due on the State subscription. Meanwhile, the sinking fund, starting with the premium of $11,650, and augmented by the proceeds of sales of land in Maine, gained in amount from year to year with such rapidity that seven years before the maturity of the scrip the fund was already large enough to cover the whole amount of the debt, so that it was no longer necessary to provide for further accumulation; and the legislature, by an act passed April 13, 1850, was able to provide that "the income of the Western Railroad stock sinking fund shall, after the present year, be paid into the treasury and be appropriated to the current expenses of the Commonwealth. On the 15th of July, 1857, when the debt became due, the fund amounted to $1,079,756 35, exceeding the debt by $184,756 35; the whole debt was thus readily extinguished, and there remained this handsome surplus, which was made the nucleus of another sinking fund for the extinguishment of other debts, into the history and operation of which we will not at present enter.

Of course it is obvious that the sinking fund did non *create* the million of dollars that were used to pay the debt; it was really the sales of lands in Maine which paid for the Western railroad shares. But it cannot be denied that the institution of the sinking fund provided a most convenient and effective *machinery* for the application of those sales to the purpose desired. Had the State treasurer proposed to borrow a million of dollars in 1837, on the engagement of the State to repay the money in instalments by applying in payment half the proceeds of the sales of lands to be made during the next fourteen years, nobody would have listened to him: a loan would have been impossible upon such terms.

2. A still more striking illustration is found in the history of the Western Railroad *loan* sinking fund. In the further pursuit of the policy of aiding the construction of the Western Railroad, the legislature by a series of acts passed in 1838, 1839 and 1841 authorized loans to that corporation amounting in the aggregate to four millions of dollars, by means of issues of State scrip to that amount, redeemable in thirty years; and to insure the ability of the corporation to meet the obligation at its maturity, provision was again made for the creation of a sinking fund. This *loan* sinking fund is to be distinguished from the *stock* sinking fund, which we have already described, being the property of the corporation, kept in the joint care of the treasurer of the Commonwealth and the treasurer of the corporation. Its creation was provided for in the following terms by the act of February 21, 1838, authorizing the first issue of scrip, which was substantially repeated in the later acts authorizing additional issues:

The premium of profits on the sales of said scrip or certificates of debt shall, when received, be paid by the treasurer of said corporation to the treasurer of the Commonwealth; and, after the said road shall be opened for use, a sum equal to one per cent on the amount of said scrip thus issued shall be annually set apart from the income of said road and paid to said treasurer; and the whole thereof shall be by him placed at interest, and the same with the interest annually accruing thereon shall constitute a sinking fund for the future purchase or final redemption of said scrip.

Sterling scrip was issued at various dates between April 1838, and July, 1841, falling due as follows:

Due April 1, 1868	£135,000
Due Oct. 1, 1868	337,500
Due Oct. 1, 1869	90,000
Due April 1, 1870	180,000
Due April 1, 1871	157,400
	£899,900

Being £100 less than £900,000, which at the rate of $4 44 was reckoned as the equivalent of $4,000,000.

The sinking fund which was designed to cancel this heavy indebtedness, after the lapse of thirty years, started with the modest sum of $55,550 35, on the 1st of January, 1839, the earlier issues of scrip having been sold at handsome premium. But the same advantage was not obtained in the sale of the subsequent issues. Moreover, as the annual payment to the fund of one per cent on the amount of the scrip did not begin, agreeably to the terms of the act, until after the road was opened for use, there were several years' delay before this chief resource became available—the first payment being made on the 31st of December, 1844. From that time forward, however, $40,000 was paid into the fund every year, and it was also augmented by its own accumulations.

From these and other causes, some of them growing out of the war, the fund would have been altogether inadequate to meet the full amount of the debt at maturity. But nevertheless the fund proved a most important auxiliary, and an effective instrument for the purpose for which it was designed. By the 1st of January, 1855, or ten years after the payments from the income of the railroad had begun, it fell but little short of $1,000,000. In 1868 the first portions of the debt, amounting to more than one half of the whole, became due, and were fully discharged.

The fund continued for three years longer. In pursuance of the provisions of an act passed by the legislature in 1868, scrip to the amount of £312,000 was issued the following year to the Boston and Albany Railroad corporation (upon which had been devolved the obligations of the Western Railroad in the matter) to assist it in meeting the payments of the original scrip; the corporation pledged this new scrip for moneys borrowed to redeem the original issue; but in the year 1870 the corporation paid the debt, and returned the new scrip to the treasurer of the Commonwealth, by whom it was canceled. By this means, and with the use of the residue of the sinking fund, the whole of the State indebtedness incurred in aid of the construction of the Western Railroad was extinguished by the 31st day of December, 1871, the commissioners remarking in their final report:—

"The fund is disbursed, the account closed, and the last dollar of liability of the Commonwealth on its bonds issued thirty years ago in aid of the Western Railroad Corporation is extinguished. No losses have occurred on any of the securities in which the fund was invested for the last twenty years, and but a very small amount before that time; nor has the fund ever been subjected to any expenses whatever for its management."

The facts stated in these closing words are certainly noteworthy; and while it is, of course, true that the sinking fund did not *create* any of the money with which the debt was extinguished, it is obvious that it afforded a convenient and potent process for discharging the debt; and it would be difficult, we think, for any person to show that any other method of dealing with such a subject would be more secure or more satisfactory to any of the parties interested.—*Boston Adv.*

☞ The Auditor of Virginia estimates the expenses of the government for the year ending September 30, 1875, at $1,289,750, not including the interest on the State debt. He believes no more than 4 per cent can be paid on the State debt, and no less would be accepted by her creditors; and estimating at that rate places the total of expenses and interest due January and July next at $3,381,297 40, of which $159,194 72 has been paid since October 1st, 1874, on account of overdue interest, and $86,263 56 on account of expenses of government. The Auditor thinks the present tax bill will produce sufficient revenue to meet government expenses and pay 4 per cent interest on the State debt; and that the prompt payment of 4 per cent will keep coupons so near par as to prevent speculation in them for the purpose of paying taxes.

☞ An effort is being made to secure the construction of the proposed Bay Ridge Railroad by the 1st of May next. The total cost it is estimated will not exceed $400,000, and operations will be commenced as soon as $100,000 shall have been subscribed, ten per cent. of which will be required to be paid down. The line will be as follows: Commencing on the bay of New York at or near Bay Ridge, in the town of New Utrecht, and running thence by the most direct route possible through Kings County and partly through Queens County and through the villages of East New York and Wood Haven, with branches to the village of Bath and to Coney Island. The entire length of the road will be about fifteen miles. A committee of prominent gentlemen are now engaged in obtaining subscriptions.

DOLLARS

TO THE AMOUNT OF TWO MILLION FIVE HUNDRED THOUSAND ARE TO BE DISTRIBUTED ON THE 27TH FEBRUARY BY THE PUBLIC LIBRARY OF KY., UPON THE OCCASION OF THEIR FIFTH AND LAST CONCERT.

Drawing Certain or Money Refunded
